EXHIBIT C

	2011.01.06 Friai Franscript Day 3 1/6/2011 3:03:00
IN THE UNITED STATES DISTRICT COURT	517
FOR THE EASTERN DISTRICT OF VIRGINIA	1 (The proceedings in this matter commenced at
RICHMOND DIVISION	2 9:20 a.m.)
:	3 THE CLERK: Civil Action No. 3:09CV00620,
ePLUS, INC., :	· ·
Plaintiff, :	4 ePlus, Incorporated v. Lawson Software, Incorporated.
v. : Civil Action : No. 3:09CV620	5 Mr. Scott L. Robertson, Mr. Craig T. Merritt,
LAWSON SOFTWARE, INC.,	6 Ms. Jennifer A. Albert, Mr. Michael T. Strapp, and Mr.
: January 6, 2011	7 David M. Young represent the plaintiff.
Defendant. :	8 Mr. Daniel W. McDaniel, Mr. Dabney J. Carr,
	9 IV, Ms. Kirstin L. Stoll-DeBell, and Mr. William D.
COMPLETE TRANSCRIPT OF JURY TRIAL	10 Schultz represent the defendant.
BEFORE THE HONORABLE ROBERT E. PAYNE	11 Are counsel ready to proceed?
UNITED STATES DISTRICT JUDGE, AND A JURY	12 MR. ROBERTSON: Yes, Your Honor.
	13 MR. McDONALD: Yes, Your Honor.
APPEARANCES:	14 THE COURT: All right. Thank you very much.
Scott L. Robertson, Esq. Jennifer A. Albert, Esq.	15 I apologize for keeping you-all waiting this
Michael T. Strapp, Esq.	16 morning. I had a mechanical malfunction that I needed
David M. Young, Esq. GOODWIN PROCTOR	17 to attend to, and I'm not very mechanically oriented.
901 New York Avenue, NW	18 All right, Mr. Robertson.
Washington, D.C. 20001 Craig T. Merritt, Esq.	
CHRISTIAN & BARTON	19 Dr. Weaver, I remind you you're under the
909 E. Main Street, Suite 1200 Richmond, VA 23219-3095	20 same oath which you took yesterday.
McIlliona, VA 23219-3093	21 THE WITNESS: Yes, Your Honor.
Counsel for the plaintiff ePlus	22 BY MR. ROBERTSON: (Continuing)
	23 Q Good morning, Dr. Weaver.
DIANE J. DAFFRON, RPR	24 A Good morning.
OFFICIAL COURT REPORTER UNITED STATES DISTRICT COURT	25 Q If we could have Plaintiff's Exhibit No. 1 back up
	516
516	1 on the screen again, the '683 patent, the cover page
APPEARANCES: (Continuing)	2 here.
Daniel W. McDonald, Esq.	3 Dr. Weaver, the jurors have seen this exhibit now
Kirstin L. Stoll-DeBell, Esq.	
William D. Schultz, Esq. MERCHANT & GOULD	4 several times and it's in their jury notebooks. This
3200 IDS Center	5 is at tab 2. Can you just tell us what is the title
80 South Eighth Street	6 of the patent?
Minneapolis, MN 55402-2215	7 A Electronic Sourcing System and Method.
Dabney J. Carr, IV, Esq.	8 Q Has the Court defined the term "electronic
TROUTMAN SANDERS Troutman Sanders Building	9 sourcing system"?
1001 Haxall Point	10 A Yes, it has.
P.O. Box 1122	11 Q What's your understanding as to what that
Richmond, VA 23218-1122	
	12 construction is?
Counsel for the defendant Lawson Software.	13 A In the glossary of claim terms, the "electronic
	14 sourcing system" has been defined by the Court to be
	15 an electronic system for use by a prospective buyer to
	16 locate and find items to purchase from sources,
	17 suppliers or vendors.
	18 Q What is your understanding of what a source is,
	18 Q What is your understanding of what a source is,19 sir?
	 18 Q What is your understanding of what a source is, 19 sir? 20 A A source would be a vendor or a manufacturer or a
	18 Q What is your understanding of what a source is,19 sir?
	 18 Q What is your understanding of what a source is, 19 sir? 20 A A source would be a vendor or a manufacturer or a
	 18 Q What is your understanding of what a source is, 19 sir? 20 A A source would be a vendor or a manufacturer or a 21 distributor.
	 Q What is your understanding of what a source is, sir? A A source would be a vendor or a manufacturer or a distributor. Q In the Court's construction of the claim term
	18 Q What is your understanding of what a source is, 19 sir? 20 A A source would be a vendor or a manufacturer or a 21 distributor. 22 Q In the Court's construction of the claim term 23 "catalog" or "product catalog," how does the Court

	5	75			577
1	the '70s, but the overall components of this system,		1	procurement systems.	
2	they haven't been available since the '70s, have they?		2	Q In your analysis and review of the documents and	
3	A I don't think so.		3	the deposition testimony, did you make a determination	
4	Q And you can take known technology and combine it		4	that these foundational software modules were required	
5	to come up with something new and useful; is that		5	as part of the Lawson infringing system?	
6	right, Doctor?		6	A Yes, in the documentation that I read it was very	
7	A Sure.		7	clear that the Lawson system foundation, LSF, had to	
8	Q The converting icon, I think you talked a little		8	be installed before you could install the modules of	
9	bit about this, but in the Lawson system, how do they		9	the S3 procurement system. Likewise, the process flow	
10	perform this functionality of the conversion to find		10	had to be there as well.	
11	similar, identical or generally equivalent items?		11	Q In your report, you called the Lawson system	
12	A I mentioned these UNSPSC codes. So I'll explain		12	foundation a prerequisite module. What did you mean	
	later in detail what they mean, but the gist of it is		13	by that?	
	that by using an 8-digit code, you are drilling down		14	A The LSF must be there before you can load the	
	to what's going to be called the commodity level of		15	modules that are the procurement suite.	
	information. And if multiple items have this same		16	Q In order to purchase the procurement suite	
	8-digit code, then by the definition of the code they		17	license, the procurement suite, does a customer of	
18	are generally equivalent and substitutable.		18	Lawson have to license this Lawson system foundation	
19	So the Lawson system uses this UNSPSC code in		19	and process flow?	
	order to accomplish that task.		20	A That's what the documentation says.	
	Q So now that you have discussed sort of the overall		21	Q Well, I think you touched on the process flow	
	functionality of the system in general terms and how		22	already, but let's take a look, if we can, at the	
23	it can perform it, you identified various software		23	Lawson requisition self service installation guide,	
	programs or modules that Lawson offers to do that		24	which is PX 131. It's in binder 3, Dr. Weaver.	
	functionality. Can they be configured in various		25	Is this document is entitled, "Lawson requisitions

	5	76			578
1	ways?		1	Self Service Installation Guide." Did you review this	
2	A Yes. Certain modules are required and certain		2	as part of your preparation for your expert report?	
3	modules are optional.		3	A Yes, I did.	
4	Q Did you prepare a demonstrative to show how these		4	Q So what is this document?	
5	various Lawson procurement S3 modules can be these		5	A This document explains to the customer how they	
	components can build to an infringing system?		6	should go about installing this requisition self	
7	A Yes, I have several demonstratives that build on		7	service module. We're going to call it the RSS.	
8	each other to illustrate how the software modules		8	Q If we could go to bar code 4. It's item 4 of this	
9	build on each other.			g g	
•	band on odon outon	- 1	9	document. There's a box entitled. "System	
10	Q. Let's go to the first demonstrative you have. And		9	document. There's a box entitled, "System Requirements" there. Do you see that?	
	Q Let's go to the first demonstrative you have. And		10	Requirements" there. Do you see that?	
11	this one is entitled "Lawson's electronic sourcing		10 11	Requirements" there. Do you see that? A I do.	
11 12	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is		10 11 12	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson	
11 12 13	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that?		10 11 12 13	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here?	
11 12 13 14	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology		10 11 12 13 14	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware	
11 12 13 14 15	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a		10 11 12 13 14	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the	
11 12 13 14 15	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system.		10 11 12 13 14 15 16	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row	
11 12 13 14 15 16	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation,		10 11 12 13 14 15 16	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation."	
11 12 13 14 15 16 17	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented		10 11 12 13 14 15 16 17	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's	
11 12 13 14 15 16 17 18	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to		10 11 12 13 14 15 16 17 18	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement	
11 12 13 14 15 16 17 18 19	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to need. For instance, communication with other modules.		10 11 12 13 14 15 16 17 18 19 20	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement components is the Lawson system foundation; is that	
11 12 13 14 15 16 17 18 19 20 21	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to		10 11 12 13 14 15 16 17 18 19 20 21	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement	
11 12 13 14 15 16 17 18 19 20 21 22	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to need. For instance, communication with other modules.		10 11 12 13 14 15 16 17 18 19 20 21 22	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement components is the Lawson system foundation; is that	
11 12 13 14 15 16 17 18 19 20 21	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to need. For instance, communication with other modules. The process flow is a module that controls and		10 11 12 13 14 15 16 17 18 19 20 21	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement components is the Lawson system foundation; is that right?	
11 12 13 14 15 16 17 18 19 20 21 22	this one is entitled "Lawson's electronic sourcing systems." And you have a yellow box there. What is that? A So as the name suggests, the platform technology foundation contains the modules that have to be in a functioning Lawson system. Two of those are the Lawson system foundation, which is, again, a set of common computer implemented activities that every software module is going to need. For instance, communication with other modules. The process flow is a module that controls and directs the approval process. So when a requisition		10 11 12 13 14 15 16 17 18 19 20 21 22	Requirements" there. Do you see that? A I do. Q Where is the information relevant to the Lawson system foundation here? A It says that the following software and hardware requirements must be met before you install the product. And then in the table below, the first row says, "Lawson system foundation." Q Okay. So before you can install Lawson's requisition self service, one of the requirement components is the Lawson system foundation; is that right? A That's what this says.	

collection of items and associated information including 1 Q Can we go to barcode -- page 70 in this document. If I 2 can find it myself. The Bates number ends with 318. various things? MR. McDONALD: Your Honor, I hate to interrupt. Our A Consistent Exhibit 112 ends at page 64 of the 301. 4 MR. McDONALD: I object to the characterization of 5 MR. ROBERTSON: Mr. McDonald, what page does it end the Court's construction. 6 in? 6 THE COURT: I didn't hear the last part. MR. McDONALD: My version ends at page 64. MR. McDONALD: Maybe it would be helpful just to put 7 8 Q So we were at page 70 in Plaintiff's Exhibit 112 at the up the construction itself Bates label that ended 318. And you just referenced this item THE COURT: All right. master, and in this document, this Lawson document says what is MR. ROBERTSON: Sure. Do you have glossary terms? 10 10 11 an item master. What does Lawson tell us as to how it defines 11 The jury has them. an item master? 12 THE COURT: The jury has them in the notebook. 12 A In the first sentence it says, an item master is a file Q So let me --13 13 which holds information about an item regardless of where that 14 THE COURT: What he objected to is you abbreviated 15 the term. Isn't that what your objection was? 15 Q So what, if any, relevance does that have to the opinions 16 MR. McDONALD: That is correct. Your Honor. 16 17 you're going to be offering in this case? 17 MR. ROBERTSON: I misunderstood. Let me go back 18 A Well, it confirms that the item master is going to be 18 then. utilized by requisitions and by purchase orders and that it is THE COURT: That's all he's objecting to. 19 19 MR. ROBERTSON: Thank you for the clarification, Your 20 the central repository where most of the vendor data lies 20 21 O And can this item master data store both stock and 21 Honor nonstock items? 22 Ω There's a catalog definition: correct? 22 23 A Yes, both 23 Yes Q By nonstock items, what do you mean by that? 24 You have it, and the jury has it. And it says it's an A Those are items that would be ordered from an external organized collection of items and associated information 25 612 614 vendor. published by a vendor which includes suppliers, manufacturers, 1 and distributors which preferably includes, and then there's a Q What information about the items is maintained in the item number of specified things, part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and A So that would be things like item number, the item description, the unit of measure, the cost, the vendor name, images of or relating to the item. Do you understand that and other attributes that the user can define. So there's a that's the Court's construction? 6 set of things that must be there like vendor name and cost and A Yes, I do. 8 unit of measure, and there's also, as we're going to see later, Is that consistent or inconsistent with the various item 9 there's some user defined fields so the user can put in data that can be included in the item master? 10 information that the user thinks is important about the 10 particular item. 11 The vendor cost information, is that contained in the 11 Q Did it also have commodity and classifications codes? vendor item table in a purchase order module? 12 12 A Oh, that's right, it can. There's special place for 13 Α 13 UNSPSC codes, and there's programs to load that information. 14 Are we going to see that at some point? 15 Q Refresh the jury, if you would again, on what a commodity 15 16 classification code is at a high level, if you would? 16 If we can, in the same exhibit, going back to barcode page A Yes. So using these UNSPSC codes, these are eight-digit 17 46, Bates label 294? 17 codes. When you use all eight digits, it is a classification THE COURT: Excuse me just a minute. Are you saying 18 18 19 for items that are generally equivalent or substitutable. So 19 that in your view, item master fits the defined term catalog? it's a way of finding similar items. 20 THE WITNESS: Yes, along with the vendor item table. 20 Q So this various data points, data information that you 21 THE COURT: You mean you have to have the vendor item 21 just identified, item number and item description and unit of 22 table and the item master for it to be a catalog?

23

24

measure and pricing, are all those -- that type of data and

construction of an associated -- or, excuse me, organized

information consistent or inconsistent with the Court's

23

24

THE WITNESS: Yes sir

Q Let me have PX-108 again. Let me just ask you a question,

Doctor, about this. Is a vendor associated with the item data

1 training

2 Q Can you turn to the page that is barcoded 18 which ends

with a Bates label 491, and there is a heading there called

prerequisite applications setup. Why is this significant to

5

A As it says, before you can use the Lawson requisitions 6

self service application, you must set up other Lawson 7

8 applications. The prerequisite applications affect the way

9 processing occurs in the Lawson requisitions self-service

application. So as I showed in my demonstrative, this sits on 10

11 top of our modules

Q I want to turn to the next page and that first bullet 12

13

14 A Before you can create requisitions, you must set up the

requisitions application including requester's requesting 15

locations and approval codes if used. 16

17 Q Why don't we turn to page 22 of the document, ends with a

18 Bates label 495. There's a heading called setting up the

purchase order application? 19

20

21 Q What did you consider on this page, if anything, when you

were doing your analysis? 22

A The very first sentence. Before you can use the 23

application, this is the purchase order application --24

25 THE COURT: That doesn't say that. It says "before 1 Α Yes

What, if any, significance does that have with respect to

the requisition self server module?

So these first four paragraphs explain the purpose, and

then down below are instructions on how to do this. The

categories task is designed to use UNSPSC, United Nations

Standards Products and Services Codes. Categories let you

search for items by category.

After you import UNSPSC codes, you can assign them to

items using item master. IC 11.1 is one of these programs.

The codes have four levels: Segment, family, class, and

12 commodity. These levels create an item hierarchy and let you

search each level for items in the item master file. These 13

codes are attached to items on IC 11. That's the item master.

15 After you define categories, you can click on a category

top level to open the segment tree to the product, family,

class, commodity, branches, and items. You select items at any

18 of the levels

16

Q Okay. Is this the same kind of UNSPSC classification 19

codes that can be used to do the converting as defined by the

21 Court that we saw before in, I believe it was the inventory

22 control module?

23 A Yes, they are

24 Q So then this is available functionality as part of the

requisitions self-service application as well?

628

you use," not "before you can use."

THE WITNESS: Thank you, Your Honor. Before you use

the application, you must define purchase order vendors and 3

1

What, if any, significance did that have to your opinions?

A That the purchase order and requisition self service have 6

to work together, that PO has to be present before RSS can

8

Q Let me also take you back to page 21 of the document which 9

10 ends 494. That is entitled setting up the inventory control

application? 11

A Right. 12

13 Q What, if any, significance on this page for your opinions,

Doctor, would you like to point out to the jury?

15 A The first sentence. Before you set up the requisitions

16 application, you must set up the inventory control application.

Q Thank you. Is that consistent with your understanding in 17

the diagram that you put together to illustrate? 18

19

Q Can we go to page 27 which ends with Bates label 500? 20

This page is entitled defining categories optional; do you see 21

22

23 A I do

Q They are describing or discussing the UNSPSC. Do you see 24

A Right. This is part of RSS.

Let me direct you, if I could, Dr. Weaver, to Plaintiff's

Exhibit Number 109 which is in volume two. Have you seen this

document before?

Yes, I have

Q What is it?

A This document is entitled S3 EDI for supply chain

management. This was reviewed during the depositions of the

Lawson personnel. 9

10 Q Let me go to page Bates labeled five of this document that

ends -- excuse me, barcode five that ends with the Bates label

618. It's entitled Lawson S3 EDI for supply chain management. 12

13 Do you know what the S3 product is?

14 Sure. It's the Lawson procurement suite.

15 Q Can you define that with respect to the modules that

you've identified in your diagram?

17 Yes; requisitions, purchase order, and inventory control.

What significance is in this particular page of 18

19 Plaintiff's Exhibit 109?

20 A The first paragraph explaining what this does. It links,

or rather it says links your enterprise to its trading partners 21

to electronically send transactions such as purchase orders,

23 price/catalogs, and invoices electronically.

Q So using this application, can you receive electronically 24

transmitted catalogs from suppliers?

A Yes Sure. Exactly. So I'm going to go down and click on 1 2 Q And I'm not going to go through it again because we read Lawson portal. Continue. Now, this is one of those waits. them at one point, but the jury has them in their glossary. Okay. We get to the Lawson log-in screen. So we put in the And, of course, all the other elements need to be there as user name and password and then click on log in. This will be well. Are we going to be seeing, as we walk through this one of those longer waits. You can see the time clicking away demonstration, the existence of these other elements that you in the bottom right-hand corner. 6 described? Stop. So now we are at the Lawson home page, and if you 8 A Yes are familiar with browsers, you see up here, there is the URL 9 Q Why don't you go ahead. that we're using. LSF server, that's Lawson server foundation. A All right. So Mike is going to play this movie, and 10 10 that's what we talked about before. Server corpnet lawson.com. 11 you'll see there are some waits involved in here, but that's So we're looking at the portal, just because it's recording exactly what was seen. 12 Q All right, you used the term URL. Can you explain to the 12 Q Stop here for a second and let me ask you a question here. jurors what you mean by that? 13 13 14 There's a box in the lower right-hand corner. Is that part of A Falling back into my vernacular. Universal resource the Lawson system or not part of the Lawson system? 15 locator, so commonly called a web address. Okay, so we can 15 A That was part of the system provided, and it's part of the 16 continue. Top. Stop. That was stop, not top. Here's another 16 17 realtime capturing software, so you can -- what's showing -one of those drop-down menus. So on the left-hand side, I have 18 can you see this? So what you are seeing right now is a clock 18 a menu. One of the top level choices was requisition self service. So I'm going into the RSS module, and I'm picking one that says we're 12.4 seconds into the movie, and then there's a 19 19 20 button that if you were on the real laptop, you could click it of the activities that is there. This is one of the 21 and it would toggle from pause to play to pause to play. We've 21 capabilities. All right, so I'm going to click on the shopping selection. Continue. chosen just to let it play. 22 22 Stop. So, now we come to the shopping screen. Again, if 23 Q If we wanted to --23 MR. McDONALD: Your Honor, could I get a 24 24 you look up here at the top, you will see there are some clarification on which exhibit, and is there a paper version of choices that can be made. These are, again, top levels of what 25 636 638 this one so we know what you are using? will be drop-down menus. I'm going to go click on this 1 MR. ROBERTSON: It's going to be Plaintiff's find/shop, and that's going to give me additional choices. Exhibit 376 is the video, and Plaintiff's Exhibit 374 would be Continue 3 3 the hard copy paper capture of the screen shots. Stop. So here are the choices. I can search the Q So we're clear, this is like the video playback? We can catalogs, I can do a Punchout. I'm going to do that later. do the stop, forward, reverse by using these tools if we need Down there at the bottom is categories. So I'm going to go 6 to go back at any time? down and click on categories, because I want to do a category 8 A Well, these tools are for the original capture. Mike and search. Continue. Stop. Now, remember with the UNSPSC codes, we said that 9 I are going to do it manually. I'm going to say stop and 9 10 continue and probably say go back. 10 there were four levels: Segment, family, class, and commodity. Q We may have to go back because it moves quickly sometimes? So what is showing here in the category tab, the category 11 A Sometimes it's too quick, and sometimes it's too slow. window, is the first three of a small set of these top level 12 12 13 Right now we're going to start with a go back, so go back to 13 categories, these segment categories. So, remember, there 14 the beginning. could have been a hundred of them, 00 to 99, but here, for 15 All right, so as the laptop screen exists, first I'm going 15 clarity, everyone exchanges those digits for names so that they 16 to bring up the browser. I'm going to use Internet Explorer, have -- they make sense to humans. so here we go. Stop. Now, again, I'm just going to tell you, 17 So my top choice there, live plant and animal material and 17 18 you're going to see some times when not much is happening, but 18 accessories and supplies, that's one of the segment codes. 19 this is just a true-to-life recording of exactly what was on 19 Now, I don't know what code it is, 23, 99, I don't know. It 20 20 doesn't matter. It is representative of what is in this very 21 broad segment. So I'm going to scroll down and show you the 21 Okay, so in your ordinary Internet Explorer browser, I've clicked on the favorites tab, and one of the favorites that others, and then I'm going to come back and pick one in the 23 I've saved is the Lawson portal. 23 middle. Continue. See, we only had about six there. Stop,

24

Q Is this an example of the drop-down menu you were talking

24

Q Let me ask you a question about that then. There are only

six here to illustrate the functionality of it. Does the

		2011.0)1 .	06 Trial Transcript Day 3 1/6/2011 3:03:0	0 PN	l
		639			641]
1	Lawson requisition self service you are using here have the		1	All right, so I'm going to look at these two computers.		
2	capability to have more?		2	You can see the first line item there is an IBM ThinkPad, and		
3	A Absolutely.		3	it has an item number of 6001. The one below it is a Dell		
4	Q How many could it have?		4	Inspiron 8000. It has an item number of 6020. So I'm going to		
5	A It could be a hundred different segments. Each of those		5	go click on the item number, and that's going to get us a		
6	segments could have a hundred families. They could each have a		6	description of this item.		
7	hundred classes. They could each have a hundred commodities.		7	Q Before you do that, Doctor, does it have unit measure		
8	Q I noticed you clicked on one of these segments?		8	category?		
9	A The one I clicked there in the middle is communications		9	A Right. Under UOM, you see each.		
10	and computer equipment and peripherals and components and		10	Q Does it have cost information?		
11	supplies. So you can see how broad a category that segment		11	A Under cost, the ThinkPad is 2,500. The Dell is 2,000.		
12	name represents. So what we're going to do now is drill down		12	Q Does it have description of the item?		
13	to become finer-grained.		13	A It has a description, IBM ThinkPad T20 or Dell Inspiron		
14	So having clicked on that top level segment continue		14	8000 with Intel Pentium processors.		
15	stop. So underneath the segment is the family. Now, here we		15	Q You indicated it had an item number?		
16	show that there's very little data in the system we were		16	A There is an item number.		
17	provided. Whereas there could be a hundred different family		17	Q And it even provides for the Intel Pentium or the Dell		
18	names, there's only one. So due to the paucity of data here,		18	Inspiron, the manufacturer?		
19	I'm going to click the only possibility I've got.		19	A I just covered up the description. Yeah. So not only do		
20	All right, so I've done the segment. This is the family.		20	we have in this case the name of the computer, Dell Inspiron		
21	I'm going to click on the family name, hardware and		21	8000, we also have a little more descriptive information, that		
22	accessories. Continue.		22	it's an Intel Pentium III processor.		
23	Stop. So now we're down to the class. There could have		23	Okay. We'll continue. Oh, and stop. I should also note		
24	been a hundred classes, but, again, because there's so little		24	while we're here that over here is the Dell shopping cart, and		
25	data here, there's only two. So as I look at the class, I have		25	it's obviously empty. It's supposed to be empty		
		640			642	1
1	a choice of computers or monitors and displays. So I'm going		1	Q I think you misspoke. I think you said the Dell shopping		
2	to go for computers. Continue.		2	cart.		
3	Stop. Now I'm down to the commodity level. The		3	A I misspoke. This is the Lawson shopping cart right here		
4	commodities, there should be a lot of them, but because of the		4	where it says my cart. And so as I select items, they will		
5	paucity of data here, we have only one commodity category,		5	show up in the shopping cart, but we'll see that. All right,		
6	notebook computers. So I'll click the only choice I've got,		6	so now I'm READY to drill down on the ThinkPad. Continue.		
7	and then that will list the actual item data that is underneath		7	So I click on that item number. Stop. And this retrieves		
8	the notebook computers commodity code. Continue.		8	the data in the item master and vendor item table database and		
9	Stop. So now we see all of the items in the database that		9	tells me about the item. So we have an item number, we have a		
10	have the UNSPSC code for notebook computers, and there's only		10	description, a unit of measure, a cost.		
11	two, okay? Small database.		11	We have a source vendor ID, 118, and a source vendor name,		
12	Q So I understand, for the segments, there could have been		12	Office Max. So from observing this information that is		
13	thousands, for families there have been		13	produced, I know that this IBM ThinkPad has a vendor source of		
14	A Hundreds.		14	Office Max.		
15	Q Hundreds. What is the next level?		15	Q Let me stop and ask a question, Doctor. There's a box		
16	A So you start with segment.		16	there that says image not available. Does this RSS application		
17	Q Class?		17	have the ability to load images of the items offered for sale?		
18	A Could be a hundred. Then family each of those segments		18	A It does, and the documentation encourages one to do so.		
19	could have a hundred, and then each of those families could		19	But, again, because of the paucity of data, we didn't have any		
20	have a hundred classes, and each of the classes could have a		20	item images in the data we were given.		
21	hundred commodities.		21	Q This is how it was provided to us; it could have been		
						- 1
22	Q Those commodities, you could have thousands of items?		22	provided with an image, because the software permits you to do		

25 two. Okay, it's going to do the job, though.

24 unlimited number of items that map to that code. Here we have

24 A Right. It could have been chock-full of images, but it

25 wasn't. Okay, so I'm going to scroll down and up so you see

all of the information that was presented to me as the user of 1

the RSS system, and then we'll go back and look at the other

Dell computer. So continue. So now I'm going to add that to

the cart.

5 Stop. So here in the Lawson shopping cart, I have my IBM

6 ThinkPad T20, item number 6001; quantity, one; unit of measure,

each; cost, \$2,500. So I'm going to park this item in the 7

8 shopping cart, but then I'm going to go back and look at the

9 equivalent items, equivalent in that they had the same UNSPSC

10

11 All right, so we'll continue, and I'll click on this back

button over here. So here -- stop. Here is that second line 12

item as we saw before, the Dell Inspiron. So I'm clicking on 13

its item number, and we'll drill down on that and see what

information is provided there. Continue. 15

16 Stop. So similarly to what we saw before, this is the

17 other machine. It's an item -- I wiped it out. Item 6020, a

18 Dell Inspiron 8000 with Pentium III processor, a unit of

measure each, and a cost of 2,000. But it has a source vendor, 19

20 ID code of 124, and a source vendor name of Diablo.

21 So the first computer, the ThinkPad was coming from the

Office Max catalog. This is coming from the Diablo catalog. 22

So I stare at that, and I think which of these machines is a

24 better choice for me. I'm cheap, so I'm going to go with this

one. So I will add this one to the shopping cart, Lawson 25

equipment. Stop. Oh, I might also note that the hierarchy

tree is being kept for me up here at the top. Here's my

segment level, here's my family level. As soon as I click here

on my class level, it will appear here and so on.

All right, so I'm about to click on laboratory,

environmental conditioning equipment for my third category.

Continue.

Stop. Okay, now, again, we're down to commodities. There

could be a hundred of these, but there's not. There's just

one. There's one commodity called glove boxes. So when I

click on this. I will see all the items in the item master

12 database and the vendor item table that have been encoded with

the UNSPSC code for glove boxes. Continue. 13

14 Stop. Once again, the database is small, so there's only

15 two entries under the commodity heading. Both of these are

boxes of sterile surgical gloves, so I'm going to pick one and 16

add that to my Lawson shopping cart. Continue. I'm going to

18 look at it first. Smart shopper.

19 Stop. All right. So I just did a drill-down as I did

with the computers. So you see we have an item number, 1036,

21 we have a description, gloves, sterile surgical, size seven. A

22 unit of measure. Here it's case, cost, 400 bucks, source

23 vendor. The ID number is 117, and the source vendor name is

24 Baxter Healthcare

25 Continue. So scroll down and back up, and add that to my

644

shopping cart. So here it is, gloves at the top, Dell computer

at the bottom. Now stop. I have finished shopping, so I have

the information from the database now in the shopping cart. My

next goal is to create a requisition. Then I'll need to get

that approved, and then I'll need to get that turned into

purchase orders.

So since the gloves and the Dell came from different

vendors, I will need two POs, one to each of those vendors, so

I'm going to click on checkout. Continue. All right, saved.

10 Stop. So it gives it a number, 911. So when I come into

11 this system next, I'm going to come in as a manager, and I'm

going to look for this order 911 that is existing in the 12

13 system. I'm going to find it among all other orders, and then

I'm going to get it approved. All right, continue. Status

15 needs approval

16 All right, back to the portal home page, and now I'm going

to come in as a manager. Here are some requisitions, but 911 17

18 is not among them. Stop. Here is the requisition 911, and

19 that's the one I need to have approved. Continue.

20 Stop. So here we pull up the requisition, you see right

21 there, and we have the two line items, the Dell Inspiron and

the case of gloves. So I've logged in now as the manager when

23 I clicked on manager, and so here are the actions I can take:

24 Approve, reject, or unrelease, so I'm going to approve these

shopping cart, and delete the other one. So continue. 1

Okay, now stop. So now I have both notebook computers in

3 the Lawson shopping cart, and I'm going to go up here to this X

and delete the ThinkPad. Continue.

And like all good software, it asks me, do you really want

to delete that, and I say, ves. Okay. Stop. So at this 6

point, I have done the UNSPSC code, found two generally

8 equivalent notebook computers, chose one, added it to the

9 shopping cart, added the other one to the shopping cart,

10 deleted the first one.

11 So I've been able to convert one item from one source, the

ThinkPad from Office Max, into an equivalent item from another 12

source, the Dell Inspiron here, and having done that, I'm now going to go back and pick another category and find another

15 item to add so that I'll have multiple items in my shopping

16

13

17 Okay, so I'm backed out -- because I did that drop-down

18 menu to categories. I'm back at the highest level, the segment

19 level. So continue. Scroll down. Stop. So this time my

segment level is laboratory and measuring and observing and 20

testing equipment. Continue. Stop. My family, again, there's 21

22 only two here, laboratory and scientific equipment, or

measuring or observing, or testing instruments and accessories. Continue. 24

23

So I pick at my family, laboratory and scientific

		703		7
1	as to whether that's a multiple catalog availability	1	A Yes. We saw that in the documentation with the PO	
2	or a single catalog?	2	536 program.	
3	A Well, as we just saw when we did our Punchout	3	Q Did you see representation that Lawson said they	
4	Staples and Dell, those were two completely separate	4	could import multiple catalogs?	
5	catalogs on separate websites run by different people.	5	A Yes, we did.	
6	So those are unquestionably separate catalogs.	6	Q So I did want to address this searching the	
7	Q Do you have an understanding about whether the	7	selected product catalogs using Lawson's keyword	
8	'683 patent, for example, requires catalogs to be	8	search. You're familiar with that?	
9	searched simultaneously?	9	A Yes.	
10	A It does not.	10	Q Are you familiar with Lawson's contention that it	
11	Q Did the Court in any of its claim constructions	11	searches the entire item master and therefore the	
12	have that requirement?	12	Lawson systems don't, and its search engine, does not	
13	A No, that's not in the claim construction.	13	search only selected portions of catalogs, but rather	
14	Q Does the Lawson system have the capability of	14	the entire item master?	
15	enabling you to select search first a product catalog	15	A I'm aware of that, but I disagree with that.	
16	and then subsequently select a search in another	16	Q Why do you disagree with that?	
17	product catalog?	17	A Because the way that the system is built it uses a	
18	A Yes.	18	search index. If you think about building a complex	
19 20	Q Do you see that in any of your demonstrations?	19	system, you would never build it such that you had to	
	A Yes, we did. The Bush or Basyx.		search through every single item in order to match a	
21	Q In the demonstration in Punchout, did we see that	21	search query. It would take forever if the database	
22	ability to select those product catalogs?	22	was of any size. So that's not the way relational	
23	A Yes, we did because we saw that in Dell and in	23	databases get built.	
24	Staples.	24	Instead there's a search index, and so like the	
25	Q Why don't we talk a little bit about searching for	25	index of a book, you have keywords, and they point to	
		704		7
1	selected product catalogs using the Lawson keyword	1	where in the database those items reside.	
2	index?	2	So if I do a keyword search for Dell, I look it up	
3	THE COURT: Excuse me. Before you do that,	3	in the index, and that tells me where the Dell items	
4	are you saying in your view item master is not a	4	are, and I only look at those.	
5	single catalog but is a multiple catalog because it	5	Q Do you have any demonstratives that you prepared	
6	has imported into it all number of parts of other	6	to help illustrate this point?	
7		7	A I do.	
	catalogs?			
8	THE COURT. Yes	8	Q Could we go to 09 at page 15. Okay. Here you	
9	THE COURT: Yes.	9	have a definition of an index from Webster's New World	
10	THE WITNESS: If the item master is built by	10	Computer Dictionary. What significance here should we	
			the former distriction of the first of the f	
11	importing multiple vendor catalogs, then in my opinion	11	be focused on as you talk about this computer search	
12	is that database contains multiple vendor catalogs.	12	index that's being utilized?	
12 13	is that database contains multiple vendor catalogs. THE COURT: But what if it is built by	12 13	index that's being utilized? A This part here. When searching or sorting the

THE WITNESS: Yes, sir.	12 13 14 15 16 17 18 19 20 21	index that's being utilized? A This part here. When searching or sorting the database, the program uses the index rather than the full database. Such operations are faster than sorts or searches performed on the actual database. Q As a computer scientist, is using an index in order to search a relational database something that is utilized in order to make those faster searches? A Absolutely. Q Do you know how the Lawson's system search index	
12 13 14 15 16 17 18 19 20 21 22	is that database contains multiple vendor catalogs. THE COURT: But what if it is built by importing part of multiple catalogs, parts of catalogs? THE WITNESS: In my opinion, it's still multiple catalogs. THE COURT: I just want to know and it's because in those instances you think it's a function of importation? THE WITNESS: Yes, sir. THE COURT: All right.	12 13 14 15 16 17 18 19 20 21	index that's being utilized? A This part here. When searching or sorting the database, the program uses the index rather than the full database. Such operations are faster than sorts or searches performed on the actual database. Q As a computer scientist, is using an index in order to search a relational database something that is utilized in order to make those faster searches? A Absolutely. Q Do you know how the Lawson's system search index is created?	

	that are resigned become example the Continues	707	4 A The first two paragraphs. You and course the
1	that are going to become searchable. So there's a		1 A The first two paragraphs. You can search the
2	keyword search setup program that you run, and then		2 catalog, which will search for items in your item
3	after you've defined what keywords are going to be		3 master or vendor items. It also allows you to search
4	searchable and you've got your database loaded, and		4 for keywords for up to 29 fields based on your set up.
5	the item master is now full of data, you run the		5 You can also search based on categories which can use
6	keyword search load program. That builds the index.		6 the UNSPSC code categories. And I think we've heard
7	And now until you have changed the database, you		7 the rest of that before.
8	have got an index into all the searchable keywords		8 Q We've gone over that. Let me direct you then to
9	that all of the keywords that were chosen to be		9 page 12 of the document. Is this a Lawson keyword
10	searchable.		10 search setup proposal?
11	Q Are some of those keywords like item description,	1	11 A Well, this is the training guide and
12	item number, classification code that you've been	1	12 Q This is teaching the customers how to set up the
13	addressing already?	1	13 keywords?
14	A Yes, they are.	1	14 A Yes, it is.
15	Q Which database tables is the search index built?	1	15 Q What's the next page?
16	A I'm sorry. Say that again.	1	16 A Keyword search load.
17	Q Sure. From which database tables is the search	1	17 Q What is that?
18	index built?	1	18 A So that was the second program that you have to
19	A The item master. Well, and the vendor item table,	1	19 run. The first one, the keyword search set up, this
20	too.	2	20 is where you choose which of the 29 different fields
21	Q Once the user has selected the field of the item	2	21 will become searchable. So after you have got them
22	data that are to be searchable, what is the next step	2	22 chosen, and you've got your item master database
23	in building this index?	2	23 loaded, then you run the keyword search load, and it
24	A So after you have chosen your keywords, you have	2	24 builds the index.
25	to load them all, and then you the computer system,	2	25 Q Then if you will turn to page 29. There's a slide
		708	
1	the keyword search load program, builds this index	1	1 there that says "creating a requisition by searching
2	that is search engine then uses thereafter.	1	there that says "creating a requisition by searchingthe catalog"?
2	that is search engine then uses thereafter. Q Can you take a look at Plaintiff's Exhibit	2	 there that says "creating a requisition by searching the catalog"? A Yes.

This particular one is a copy of what a human trainer would be using in terms of slides and notes. So if you're familiar with Microsoft PowerPoint, it has a notes feature. So here is the slide itself, and below it are the notes. So if I were a trainer training you as an RSS class, I would be showing you this picture up here, and then this would be my reminder text of what I wanted to tell you about the slide that I'm showing you. Instead of having an audio recording, you've got words. Q Is this a presentation that Lawson gives to train its customers? A Yes.	1 1 2 2 2 2 2	the catalog"? A Yes. What's being depicted there? A So this is something that we have seen. When I did the catagory search and picked items and built a requisition. So it says down here, When using the search catalog task, you enter the value you want to look for in the search field. As soon as you type in the third letter, the system begins searching for the matching keywords and displays the result as a drop down list. Keywords exist because you enable certain fields as searchable in this IC00.5 program and run IC800 to build keywords from these fields. So that's the setup and load. IC800 is the keyword load. Q So what if anything do the pages of this document have with respect to your understanding of how the Lawson system or whether the Lawson system uses a search index to conduct its searches?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	that is search engine then uses thereafter. Q Can you take a look at Plaintiff's Exhibit No. 136. It's in Volume III. It's entitled, "Requisition Self Service 8.1, 9.0." A Yes. Q What is this exhibit, if you know? A This is a training program for requisition self service. This particular one is a copy of what a human trainer would be using in terms of slides and notes. So if you're familiar with Microsoft PowerPoint, it has a notes feature. So here is the slide itself, and below it are the notes. So if I were a trainer training you as an RSS class, I would be showing you this picture up here, and then this would be my reminder text of what I wanted to tell you about the slide that I'm showing you. Instead of having an audio recording, you've got words. Q Is this a presentation that Lawson gives to train its customers? A Yes. Q Why don't we go to page 3 of the document, if we	1 1 2 2 2 2 2 2 3 3 4 4 4 4 4 4 4 4 4 4 4 4	the catalog"? A Yes. What's being depicted there? A So this is something that we have seen. When I did the catagory search and picked items and built a requisition. So it says down here, When using the search catalog task, you enter the value you want to look for in the search field. As soon as you type in the third letter, the system begins searching for the matching keywords and displays the result as a drop down list. Keywords exist because you enable certain fields as searchable in this IC00.5 program and run IC800 to build keywords from these fields. So that's the setup and load. IC800 is the keyword load. Q So what if anything do the pages of this document have with respect to your understanding of how the Lawson system or whether the Lawson system uses a search index to conduct its searches? A Well, it absolutely does such that it need not

Q So once you have enabled the keyword terms and you the user-defined field for manufacturer, like Dell or 1 built the search index, how does the Lawson search Hewlett-Packard or Gateway, for each of those I have engine conduct a search of the item data in the pointers into the database that tell me where I will database? find a record, a product, in which the Dell keyword 5 A So if I type in a word into a text box, say Dell, was located in the user-defined field for and engage the search engine, it goes to the search manufacturer 6 index. It looks up Dell. It finds records in the Likewise, for the item description fields, if I've 7 8 database that match the keyword Dell. And then it got a database that contains keywords like keyboard 9 extracts that data from the database and presents that and mouse and monitor, every time a descriptive term is found that is searchable for item description like 10 to me on the screen. 11 Q Do you have a demonstrative you prepared to try keyboard, in this database there are pointers from the and illustrate how this search index operates? 12 index into the database that say where that item is 12 13 found 13 14 Q What's being illustrated here, sir? 14 So the way this then works is when I put in Dell A Okay. So up here at the top we have the text box, 15 and monitor, the search engine goes to the search 15 which is the search query. I don't know where that index, finds the keyword Dell, finds all of the places 16 16 17 popping is coming from. that the keyword Dell would appear in the database 18 THE COURT: That's because you, like some 18 In this case its locations are 10, 20, 25, 26, 27 and witnesses, but not all, articulate your P's in a 19 19 20 particular way at a particular length from the 20 Then it would look for the next keyword in the 21 microphone, and there isn't anything that we've been 21 query box. That's monitor. It would look up all of able to do about it. And it's not your fault. It's a 22 the places in the database where monitor appears as 22 function of the way things are. keyword. And that's 15, 16, 17, 19, 20, 21, 22, 23, 23 23 THE WITNESS: Thank you. Your Honor. 24 25 and 27 24 25 THE COURT: It's annoying, but --25 Then having found where the records containing the 712 714 THE WITNESS: I would have worried about that keyword Dell are located and where the records 1 containing the keyword monitor are located, then we do all night THE COURT: Well don't 3 the intersection of those. That is, from those two MR. McDONALD: As long as he doesn't use the lists of numbers, we find where the numbers are T sound for the rest of the testimony, it's fine. 5 exactly the same. THE COURT: No. it's a P. generally. So in my example here, 25 and 27 are the database 6 Does this have an exhibit number? records that contain both the keywords Dell and 8 MR. ROBERTSON: No, Your Honor. It's simply 8 demonstrative. 9 9 So I go fetch records 25 and 27. And that's what 10 THE COURT: All right. 10 I display to the user. So I don't search the whole 11 A So we have our keywords at the top, our query 11 database. I just the index to search selected parts. text, and for this example I want to look for the 12 THE COURT: Mr. Robertson, what is this 12 13 keywords Dell and monitor. We'll assume that we have 13 testimony related to? We had that at the beginning. enabled at least two fields, two keyword fields to be Now we've had a lot of testimony, and I'm confused a 15 searchable. One of them would be a user-defined field 15 little bit, and the jury may be, about what exactly 16 for the manufacturer. We haven't actually talked this line relates to. Does it have to do with whether about user defined fields yet, but this is part of the 17 there's a search of a single catalog or not? Is that 17 18 Lawson product. So a user defined field or 18 what we're still on? 19 manufacturer has been determined to be searchable. It 19 MR. ROBERTSON: No, Your Honor. There are 20 has been declared to be searchable. And a second 20 some claims that say you have to search portions of field, the item description, which is one of the 21 21 the database or search among the selected catalogs. fields, one of the 29 fields supported by Lawson, that And so in order to search portions of the database, 23 one has also been declared to be searchable 23 you need a search index. Lawson contends that the Now, after I do the search load and I build my 24 index is -- that the search searches the entire 24

index, then what I have is for each of the entries in

database all the time. So, therefore, they can't

1 IN THE UNITED STATES DISTRICT COURT	743
2 FOR THE EASTERN DISTRICT OF VIRGINIA 3 RICHMOND DIVISION	1 PROCEEDINGS
4	2
5	3 THE CLERK: Civil action number 3:09CV620, ePlus,
6 ePLUS, INC. : Civil Action No.	4 Incorporated, versus Lawson Software, Incorporated. Mr. Scott
: 3:09CV620	5 L. Robertson, Mr. Craig T. Merritt, Ms. Jennifer A. Albert, Mr.
7 vs. :	6 Michael G. Strapp, and Mr. David Young represent the plaintiff.
8 LAWSON SOFTWARE, INC. : January 7, 2011	7 Mr. Daniel W. McDonald, Mr. Dabney J. Carr, IV, Ms.
:	8 Kirstin L. Stoll-DeBell, and Mr. William D. Schultz represent
10	9 the defendant. Are counsel ready to proceed?
11 COMPLETE TRANSCRIPT OF THE JURY TRIAL	10 MR. ROBERTSON: Yes, Your Honor.
12 BEFORE THE HONORABLE ROBERT E. PAYNE 13 UNITED STATES DISTRICT JUDGE, AND A JURY	11 MR. McDONALD: Yes, sir.
14	12 THE COURT: Good morning. Good morning, ladies and
APPEARANCES: 15	13 gentlemen. I was informed by the clerk that you all needed to
Scott L. Robertson, Esquire	14 know the procedure for asking questions, and if you have
16 Michael G. Strapp, Esquire	
Jennifer A. Albert, Esquire 17 David M. Young, Esquire	15 questions, it's all right.
Goodwin Procter, LLP	16 I think the best way to do this is for you to write
18 901 New York Avenue NW Suite 900	17 your question out and then send it up to Mr. Neal, and he'll
19 Washington, D.C. 20001	give it to me, because there's some kind of questions that,
20 Craig T. Merritt, Esquire	19 perhaps, are better I will tell you immediately, I can't
Christian & Barton, LLP 21 909 East Main Street	20 answer that or we can't get into that.
Suite 1200	21 Others and I found this to be the case most of the
22 Richmond, Virginia 23219-3095 Counsel for the plaintiff	22 time. Other questions are very helpful to the lawyers to have,
23	23 because if you have you are the ones who have to decide the
24 Peppy Peterson, RPR	24 case, and if you have a question, they need to know it and need
Official Court Reporter 25 United States District Court	25 to work out a way to get the information to you through their
	742
742	744
1 APPEARANCES: (cont'g)	
	1 questions.
2 Dabney J. Carr, IV, Esquire	questions. So if you feel like you have a question, you can

I feel the same way, so let's get a fresh start. Let's go ahead, Mr. Robertson. MR. ROBERTSON: Thank you, Your Honor. Good morning. ALFRED C. WEAVER, a witness, called by the plaintiff, having been previously duly sworn, testified as follows: DIRECT EXAMINATION BY MR. ROBERTSON: (resuming) G. Good morning, Dr. Weaver. A Good morning, Mr. Robertson. Q I'd like to start out looking at Plaintiff's Exhibit Number 219, if I could, sir, in binder number five. Before we get there, I have a few preliminary questions. Do you know whether or not Lawson provides services to its customers to assist them in importing vendor catalog data into its item master?

1	Α	I do
2	0	Lot

Q Let's turn to the next page. These are, again, activities

and responsibilities for particular tasks that need to be

accomplished in order to perform this statement of work for the

5 Deaconess Health System; is that right?

A That's right. 6

Q What, of significance, would you like to point out here?

A So at the top, data migration workshops are a Lawson

9 responsibility, and the description over on the right says that

the workshops will define the data migration process and the 10

11 mapping required.

And then two down from that, the task or the activity is 12

transform data. That's a Lawson responsibility, and a 13

description is that the legacy data is transformed into the new

database structure. And there at the bottom of the page is 15

live migration. That's a Lawson task, and the description is 16

17 live data migration.

18 So that's taking the real production data in the

non-Lawson system and legacy system and moving that into the 19

20 Lawson system to make a production system, one that's up and

21 running

Q So when you say production system, you've now taken the 22

old data, including catalog data, migrated over to the new item

24 master in the Lawson system, and then assisted the customer in

getting that up and functional? 25

1 Α Lam

Q I want to direct you to binder one. So my first question

is, who typically performs that installation and implementation

of a system that utilizes the procurement Punchout?

That would be Lawson.

6 Did you review any Lawson testimony with respect to that?

Yes, I did. The Lawson witnesses said that it was very

common for the Lawson personnel to implement the procurement

Punchout system

10 Q Have you reviewed any documents that would confirm that?

12 Why don't you take a look at Plaintiff's Exhibit

Number 103. Have you seen this document before? 13

Yes, I have

15 And what is it?

16 So this is a list of frequently asked questions -- that's

the FAQ -- with regard to procurement Punchout, and this was

18 written by a Lawson employee.

19 Q And can you turn to page -- let me -- prefatory question.

So a Lawson employee is putting together a document that

21 proposes frequently asked questions during this procurement

22 Punchout functionality you described?

23 A The idea here is Lawson knows what questions are

frequently asked, so they prepare a list of questions and

answers so that they can easily disseminate answers to

758

A Yes, to make it fully operational. 1

Can we go to page ten of the document. Again, there's a

number of what are called interface activities: do you see that

on the chart blow there?

Q What, if anything, does this have for significance for 6

your opinions?

8 A So these are the activities that are going to be necessary

9 to integrate the system. By integrate, we mean integrate the

10 procurement suite with the financial and accounting information

or with the financial and accounting software that's part of 11

12 the Lawson system.

13 So focusing on the activities that are of relevance to us,

in the fourth line we have, technical design doc,

15 documentation. That's the responsibility of Lawson. Two below

16 that, the activity is develop, and the description or -- excuse

me -- yeah, it is the description over on the right-hand

column. Lawson will develop the interfaces defined in the 18

19 scope. Blow that unit test, and below that deliver. Both the

unit test and deliver are Lawson responsibilities. 20

21 Q Doctor, that's all I have with respect to that document.

So I'd like to talk to you briefly about this procurement

23 Punchout application and who performs the installation and

implementation of that module. Are you familiar with that, 24

25

frequently asked questions.

Q Why don't you turn to page six of this document. So the

questions that are being formed here are by Lawson that they

feel are typical or that are frequently asked by their

A That's right.

Q What is the question Lawson identifies is frequently asked

at the top of page six?

A The top question is, who typically performs the

installation, and the answer is Lawson Professional Services.

11 Q Thank you, sir. That's all I have with respect to that

12 document

13 Doctor, you had another demonstration that you wanted to

show, and in this demonstration, is this the demonstration in

15 which we were able to, with the assistance of a Lawson

employee, load additional item data to be able to show fuller,

more robust functionality? 17

18 A Yes, it is,

19 Q This is Plaintiff's Exhibit Number 380, and the hard copy

20 screen shots would be Plaintiff's Exhibit Number 379. So would

21 you please explain to the jury what's going on in this capture

of a process operating on the Lawson demonstration system?

A Sure. We'll just play this, and I'll narrate it as we go. Q If you need to stop at any appropriate point, fine. If 24

you want to skip over some of the things that are not at issue

23

1 in the case, like the approval process or work process flow

2

A Okay. All right, Mike, let's begin. We launch the

browser and go to the portal. We've seen the login before.

We're at the home page, and we'll go to requisition

6 self-service and choose shopping. Find/shop tab, and from that

drop-down menu we choose the categories. You saw these

8 high-level segment categories before.

9 Stop. This time, you will notice there are more of them,

and that's because additional data was loaded in this version 10

of the demonstration

Okay, in the middle of that list is lighting and 12

electrical accessories and supplies, so I'll scroll down the 13

list and go back and choose that high level segment category.

15

16 So here's our second level, lamps and light bulbs; our

third level, lamps; and our fourth level, which is the

commodity, that is halogen lamps. So stop. So now we have a 18

list of all the items in the database that are halogen lamps. 19

20

21 We scroll through the list, choose one, and this is a

lamp -- stop. This is a lamp. So that we can remember what it 22

is, it's a 120-watt halogen lamp, and it's available from the

vendor ^ Granger. Continue. Add that to my shopping cart. Go

back. Scroll through the list, choose another lamp, drill down 25

That's what we're illustrating here. Okav, so continue

So we punch out to Dell, go full screen and shop by brand. So

at the Dell site, we'll see a list of brands, of products that

they carry, and it's a long list.

We'll just quickly scroll through some of it, and we'll

shop by Kensington brand. So here are some Kensington

products. I'll look for carrying cases. So I want a case for

my laptop. I'll scroll through these, look at a second page,

choose this one, a counterbalance laptop roller. Stop,

Q Let me ask you this. Dr. Weaver, while you stopped: Are

we actually at the Dell commercially available website?

12 A No. This is the special Dell site that's been created for

this customer. 13

15

THE COURT: Dell or Kensington? 14

THE WITNESS: Dell is the site, and Kensington is the

brand of carrying case that Dell is selling. 16

17 THE COURT: Dell sells Dell and others including

18 Kensington, and they are on this site.

THE WITNESS: Dell sells, of course, many items and 19

20 many brands, but they are all on the Dell site, yes

21 Q. How do we know that this is the Dell site? I see it also

22 has the Lawson logo at the top. What are we seeing here that

tells us we're not at the Dell commercially available site but

rather some site that Lawson is making available to the 24

customer?

762

A When we look at that URL, universal resource locator web

address at the top, we start at the

Isfserver.corpnet.lawson.com.

Q LSF, does that stand for Lawson System Foundation server?

That's the foundational software that's necessary to have

this S3 procurement software run on top of?

Right. That was the bottom yellow block in my

demonstrative. Then as we look to the right of that, we see

we're being redirected to this special website which is

signin.dell.com/dellogin/port. I'm sorry, that was portal,

12 /login.ASPX. So this is running software that loads this Dell

13

14 So we have now gone to the Kensington counterbalance

15 laptop roller, but in looking at the catalog description, it

says, temporarily out of stock, please check back soon. So I

17 need my cases sooner than that, so I'm going to get a different

18 laptop case. So. continue.

19 So I'll go up to rollers. So in the special Dell site,

20 I'm looking at roller cases. Here is one from Case Logic, so I

21 drill down on that. Stop. So now I have the description. I

have the manufacturer part number, I have the Dell part number,

I have the UNSPSC code that I used, and now that I look at the

information on availability, it says usually ships within 24

24 hours. So this case is available in inventory as opposed to

on that, stop 1

And so that we can tell the difference, this one is a

150-watt lamp. So I've done some comparison shopping here. I

have searched by categories. I found a number of lamps which

are generally equivalent. I chose one, a 120-watt one, and now I change my mind, and I'm going to choose the 150-watt lamp. 6

Notice that this is available from a different vendor.

8 This one is from ^ Gexpro. Continue. So I add it to my

9 shopping cart. There it is at the top, and I delete the

10 120-watt lamp at the bottom of the shopping cart.

11 So I'll go back to the drop-down menu, and now I'll do

Punchout. I'll punch out to Dell. 12

13 Q Let me just stop you there. You went to an internal

catalog database?

15 A The first halogen lamps that we saw were all in the

Q And now you're going to an external catalog database? 17

18 A This is the external catalog at the special Dell site.

19 Q So the Lawson system has the ability to both search the

internal catalog database and add items to a requisition, and 21 then it can also, in the same process, punch out and go to an

22 external catalog database in order to search a catalog and

23 retrieve items?

20

A That's right. 24

Q Is that what you are illustrating?

1	the previous one that was not.	So this case is satisfactory,

- 2 so I'll choose this one. So continue.
- 3 I'll add it to my Dell shopping cart. So here's that
- 4 description. I'll change the quantity to three. I'll create
- 5 the order, and I'll do the trade compliance. Continue. So
- 6 here we have the verify and submit. So there is my case,
- 7 quantity three. That's all right, so I'll submit the order.
- Stop. So now that I've submitted that order, I have
- 9 checked out of the Dell site, and here in my Lawson shopping
- 10 cart I have three roller cases and one incandescent halogen
- 11 lamp. Continue. So I'm going to check out. I guess I'm going
- 12 to look at the lamp again. Okay.
- 13 So here is the detail on the lamp, and -- stop. If you
- 14 will recall, this one came from Gexpro. Continue, and I'll
- 15 look at the detail on the laptop cases. So there's my rolling
- 16 laptop case, and this comes from the Punchout site, from Dell
- 17 computer.
- 18 All right. So I'm satisfied with this, so I check out,
- 19 and now this is saving the Lawson shopping cart into temporary
- 20 storage where I can turn it into a requisition and then into a
- 21 purchase order. So back to the portal. You've seen the
- 22 approval before. I find my requisition number 940. There's my
- 23 halogen lamp and my three roller cases, so I approve that.
- 24 Then I'll run that PO 100 program.
- 25 I give it a job description, I fill in this required

1 you may have touched on this vesterday, but is there a module

- 2 that Lawson provides that permits you to -- a program that
- 3 permits you to automatically upload that UNSPSC classification
- 4 schema?
- 5 A Yes, there is
- 6 Q What inventory module -- excuse me. What module does that
- 7 come with?
- 8 A Inventory control
- 9 Q Is that one of the core modules that you have to have in
- 10 order to do this procurement process?
- 11 A Right. It's one of the three in my blue box.
- 12 Q Does Lawson tell the customers where it can obtain these
- 13 codes?
- 14 A Yes. It tells you the website to go to.
- 15 Q And does Lawson have a program in that inventory control
- 16 where you can automatically download those?
- 17 A Yes, it does
- 18 Q I'd like you -- well, let me as you this: Have you
- 19 reviewed documents explaining how these UNSPSC codes work in
- 20 the procurement process?
- 21 A I certainly have
- 22 Q Could I ask you to go to Plaintiff's Exhibit Number 11
- 23 which is in volume one? Now, at the top of this, there's an
- 24 organization called Grenada Research; do you see that?
- 25 A I do.

.

766

- information. Don't need the filters. Now we'll submit this
- 2 job. The job name RQ 940 is running. I go to the print
- 3 manager, I get the requisition -- the purchase order and --
- 4 stop

1

- 5 Here at the top of the purchase order we have the
- 6 information on the buyer, Metropolis Medical Center. Continue.
- 7 Stop. So here is our roller laptop case, quantity three
- 8 coming from Dell Computer, purchase order released. Continue.
- 9 Stop. And so here then is our second item, the incandescent
- 10 halogen lamp. It's coming from Gexpro, quantity one, PO
- 11 released, and the report is complete, two purchase orders
- 12 created. That's the end.
- 13 Q Doctor, in this process in which you searched among
- 14 product catalogs and an internal catalog database, and you went
- 15 to an external catalog database at the Lawson Punchout partner
- 16 Dell, at any time, have you left the Lawson system while doing
- 17 that?
- 18 A Never.
- 19 Q Now, Doctor, you talked a little bit about the UNSPSC
- 20 classification coding yesterday for finding items of general
- 21 equivalents that could be substituted for each other; you are
- 22 familiar with that?
- 23 A Yes
- 24 Q I don't want to go through the whole segment and family
- 25 and class and commodity code again, but I do want to ask you --

- 1 Q Is that associated with Lawson in any way?
- 2 A No
- 3 Q So this is some independent third party who is going to
- 4 tells us about using UNSPSC coding?
- 5 A That's right.
- 6 Q It's called a white paper. What's a white paper, if you
- 7 know?
- 8 A A white paper is a statement of position, so it's what you
- 9 know or what you think about a subject. It's intended to
- 10 educate.
- 11 Q Underneath there, there's a -- what does it say as to
- 12 these UNSPSC codes?
- 13 A So the white -- the topic of the white paper is why coding
- 14 and classifying products is critical to success in electronic
- 15 commerce
- 6 Q Can you go to page five of this exhibit. There's a
- 17 heading right in the middle called, for finding and purchasing;
- 18 do you see that?
- 19 A I do.
- $\,$ 20 $\,$ $\,$ Q $\,$ There's a table that says, classifying products and
- 21 services supports procurement activities: do vou see that?
- 22 A I do.
- 23 Q Do you agree with that statement?
- 24 A Yes
- 25 Q And there is a pros and cons. Do you see that?

1 A I do.

2 Q What is one of the pros that Grenada Research identifies

3 here?

4 A So the first one, enables buyers and employee

5 requisitioners to find all suppliers of a given category.

6 Q Is there a con?

A Yes. Requires up-front effort to apply codes, can be done

8 by third party.

9 Q And have you seen -- is this the Lawson that says its

10 customers will provides that service?

11 A Yes

12 Q Underneath that table, there is a heading called product

13 discovery?

14 A Yes.

15 Q What, if any, significance does this have to your opinions

16 with respect to how the UNSPSC assists buyers and

17 requisitioners to find suppliers in a given category?

18 A The first two sentences are relevant. A common naming

19 conventional allows computer systems to automatically list

20 similar products under a single category. When a person is

21 searching for the category, he or she finds precisely the

22 things being discovered and nothing else.

23 Q Can you turn to page ten of the document which ends with a

24 Bates label 041. And there's a heading called unique item

25 codes for schema modifications and multi-language uses.

1 the family, the class, and the commodity for office equipment

2 going down to pen refills. Is this the same kind of example

3 you gave yesterday with how, in effect, this eight-digit coding

4 can drill down to get you to a specific product that you want?

A Yes, it is. The example we used yesterday went down to

6 black pens. This was a different class, so it ends up with a

7 different commodity, but it's the same schema.

8 Q Why don't you go, then, to page 12 on this exhibit, and if

9 we could, just the chart. So, again, this is describing the

10 levels of the UNSPSC -- actually, this even has one additional

11 level down there. Do you see this business function?

12 A Yes

13 Q What does it say by the time you get down to the commodity

14 level, that last level? What does it say with regard to what

15 you can now do with this tool in order to identify product or

16 service? How does it characterize it?

17 A What it says, by the time you've gotten down to the

18 commodity level, you have found a group of substitutable

19 products or services, and we just saw that with the halogen

20 lamps.

21 Q Doctor, your opinion, if the parts are substitutable,

22 would they be similar or generally equivalent?

23 A Yes, they would.

24 Q Thank you, Doctor. That is all I have with respect to

25 that document.

770

Q And at the end, I don't want to have to go through this

3 entire paragraph -- the jury is going to have this in the jury

4 room -- but what, of significance, in that paragraph would you

5 like to point out?

1

6 A In the fourth paragraph, it's the last sentence which

7 says, in effect, unique numbers allow cross-referencing to

8 assure consistency.

9 Q Is cross-referencing relevant in this case?

10 A Yes. That's a term in the patent.

11 Q Is it a term that the Court's described in its glossary of

12 terms?

13 A Yes, it is.

14 Q Why don't you go to that if you could for a second. Cross

15 reference table, do you see the Court defined that?

6 A It's the third one down.

17 Q It says, the Court's construction is a table that links

18 vendor items determined to be equivalent between two or more

19 different vendors. Do you see that?

20 A I do

21 Q Does this UNSPSC hierarchical schema permit the

22 cross-referencing capability the Judge has defined there?

23 A Yes, it does.

24 Q Turn to page 13 of the document for now, and just I want

25 to focus on that hierarchy. Is this -- this has the segment,

1 THE COURT: Is that 111 or 11?

2 MR. ROBERTSON: 11, sir. I may have misspoken.

3 THE COURT: No, I didn't write it down.

4 Q Doctor, I'd like to talk to you a little bit now about

5 what's known as indirect infringement. You are familiar with

6 that concept?

7 A Yes

8 Q You understand that ePlus is also accusing Lawson of

9 inducing infringement of the patent claims in this case by

10 encouraging, aiding, abetting, or assisting its customers to

11 directly infringe the method claims at issue in this case?

12 A Yes, Lunderstand that,

13 Q What evidence have you reviewed with respect to whether or

4 not Lawson does, in fact, encourage, assist, urge, aid, or abet

15 its customers to use the Lawson systems in a manner that are

16 covered by ePlus's claims?

17 A Well, we saw yesterday that there were training courses

18 that were being offered. We looked at one which was the notes

19 for a training session, but there are live training sessions,

20 there are archived on-line training sessions that you can play

21 back. There are live training sessions that are using an

21 back. There are live training sessions that are using an

interactive tool so that you can watch a training session and

23 participate in it.

24 We know from testimony of both the Lawson witnesses and

25 their customers that Lawson provides consulting services to

1	another one.	Wei	iust saw	that in	the I	Punchout.	You can also

- 2 do that with the internal catalogs, and you can search by
- 3 keywords like Dell, or you can search by categories like we did
- 4 as we marched through the UNSPSC codes.
- 5 Q So does Lawson also indirectly infringe that by
- 6 encouraging its customers to do the same?
- 7 A Yes.
- 8 Q Do you have an opinion as to whether or not Lawson systems
- 9 include a means for searching for matching items among the
- 10 selected product catalogs?
- 11 A Yes, they do, and we saw that when I used the search
- 12 engine.
- 13 Q And did they indirectly infringe that claim element by
- 14 assisting their customers to do the same?
- 15 A Yes
- 16 Q The search engine you talked about, you also gave some
- 17 evidence with respect to the search index; is that right?
- 18 A That's right.
- 19 Q We'll come back to that later in the context of some of
- 20 the other claims. The search engine, though, just to refresh
- 21 the jury was for what purpose?
- 22 A This is to find the matching items.
- 23 Q Do you have an opinion as to whether or not Lawson accused
- 24 systems include means for building a requisition using data
- 25 relating to selected matching items and their associated

- 1 Q Do you have an opinion. Doctor, as to whether or not the
- 2 accused Lawson systems satisfied the claim element means for
- 3 converting data relating to a selected matching item and an
- 4 associated source to data relating to an item in a different
- 5 source?
- 6 A Yes, and we saw that when we did the category search using
- 7 the UNSPSC codes. And we also know this is made possible by
- 8 that IC 516 program that loads UNSPSC codes into the item
- 9 master.
- 10 Q And this capability, is that provided to their customers?
- 11 A Yes
- 12 Q And that is in the core IC module you mentioned?
- 13 A Yes
- 14 Q And were there any demonstrations you put on for the jury
- 15 to show how you could use that UNSPSC classification code to
- 16 find generally equivalent items?
- 17 A Yes. We just did that with the halogen lamps.
- 18 Q So what is your opinion now -- I'm sorry. Did we see any
- 19 evidence with respect to whether or not Lawson encourages or
- 20 urges its customers to use the Lawson system to perform that
- 21 cross-referencing capability or conversion capability?
- 22 A Yes. We saw that in the training documents.
- 23 Q The Judge has defined converting data related to a
- 24 selected matching item and an associated source to an item in a
- 25 different source. Do you see that?

782

- ces?
- 2 A They do. We saw that in my, three of my demos and in
- 3 their documentation
- 4 Q The Court defined matching items as search results. Is
- 5 that consistent with your opinion?
- 6 A Yes, it is.

1

- 7 Q Does Lawson encourage its customers to directly infringe
- 8 that claim by using the systems?
- 9 A They do, and we had that list of evidence like training
- 10 courses and help sites and Lawson employees going to the
- 11 customer site to help them build or maintain their system.
- 12 Q Do you have an opinion as to whether or not the accused
- 13 Lawson systems have a capability of processing the requisition
- 14 to generate one or more purchase orders for the selected
- 15 matching items?
- 16 A Yes. We saw that in my demo and in the system
- 17 documentation.
- 18 Q The Judge has defined selected matching items as
- 19 requisition items. Is that -- is your opinion consistent with
- 20 that?
- 21 A Yes, it is.
- 22 Q Does Lawson indirectly infringe -- meet this claim element
- $23\,$ $\,$ by encouraging its customers to do the same by providing them
- 24 with these systems?
- 25 A Yes.

1 A Yes. That's the second one on the glossary.

- Q Can you read for me what the Judge's definition is?
- 3 A Substituting data related to a selected matching item and
- 4 an associated source to data relating to an item and a
- 5 different source
- 6 Q And in your opinion, does the Lawson system satisfy the
- 7 Judge's definition of that claim element?
- 8 A It does, and we just saw that with the halogen lamp from
- 9 Granger and substituting the halogen lamp from Gexpro.
- 10 Q So, Doctor, what is your opinion with respect to whether
- 11 Lawson infringes claim three both directly and indirectly?
- 12 A I believe they do.
- 13 Q Next claim at issue here, which is the claim 26, this is
- 4 the method comprising those steps. Again, the direct
- 15 infringement here, or the accused direct infringement here for
- 16 performing this method step is the customers performing these
- 17 steps by using the Lawson system. Do you understand that?
- 18 A I do.
- 19 Q And you also mentioned this instance where Lawson may host
- 20 a system for customers to use at the Lawson site. Do you see
- 21 that?
- 22 A Yes.
- 23 Q So I want to go through this relatively quickly in the
- 24 sense that these claim elements match up to the system claims
- 25 that we just went through with the exception that we have this

1	new element, the last element, determining whether a selected
---	---

- 2 matching item is available in inventory. So just very quickly,
- 3 Doctor, does Lawson --
- 4 MR. McDONALD: Your Honor, I object to the
- 5 characterization since these terms were not construed as means
- 6 plus function because they are system claims, so they aren't
- 7 similar.
- 8 MR. ROBERTSON: I'll go through it in a little bit
- 9 more deliberate fashion.
- 10 Q Does the Lawson system permit a customer to perform the
- 11 following steps: Maintain at least two product catalogs on the
- 12 database containing data relating to items associated with the
- 13 respective sources?
- 14 A Yes
- 15 Q Select the product catalogs to search?
- 16 A Yes.
- 17 Q Search for matching items among the selected product
- 18 catalogs?
- 19 A Yes.
- 20 Q For matching items, did you apply the Judge's
- 21 construction?
- 22 A I did.
- 23 Q For product catalogs, did you apply the Judge's
- 24 construction?
- 25 A I did.

- 1 A Lwas
- 2 Q How can you satisfy -- can you also satisfy this inventory
- 3 determination by using the EDI module?
- 4 A We mentioned yesterday there was this EDI 855 message, the
- 5 purchase order acknowledgment, so after the purchase order 850
- 6 message goes out, the PO 855, purchase order acknowledgment
- 7 comes backs, and it tells whether or not the vendor can fulfill
- 8 the order, and it can also contain information like whether the
- 9 product that you are trying to order is backordered or out of
- 10 stock.
- 11 Q Do you have an opinion with respect to the activities of
- 12 Lawson to encourage assist, aid, abet, and urge its customers
- 13 to use the Lawson systems in the manners claimed in claim 26?
- 14 A Yes.
- 15 Q So would that constitute indirect infringement of all
- 16 these elements?
- 17 A It would.
- 18 Q Dr. Weaver, let's take a look at claim 28, if we could
- 19 Now, again, this is a method claim, so we're talking about the
- 20 customers and Lawson when it hosts an infringing system, so --
- 21 and with respect to this claim, these elements are
- 22 substantially identical with respect to claim 26 except the
- 23 last step has to do with converting data relating to selected
- 24 matching items and associated source to data relating to an
- 25 item in a different source. Do you see that?

- 1 Q Does the Lawson system permit or provide the ability to
- 2 build a requisition using data related to selected matching
- 3 items and their associated sources?
- 4 A Yes.
- 5 Q Did we see that?
- 6 A Yes.
- 7 Q Did you perform the steps of this method claim when you
- 8 did the demonstration?
- 9 A I did.
- 10 Q Does the Lawson accused system provide the ability,
- 11 capability of processing the requisition to generate one or
- 12 more purchase orders for the selected matching items?
- 13 A Yes, we saw that.
- 14 Q Does the Lawson system in operation permit, or is it
- 15 capable of determining whether a selected matching item is
- 16 available in inventory?
- 17 A Yes. We saw that with the case, with the laptop cases
- 18 today, and yesterday we saw it with the desk. I wanted a first
- 19 desk but it was back ordered, so I got a second desk that was
- 20 available in inventory. And the same with the printer
- 21 yesterday. I chose a first printer. It was not available. It
- 22 was out of stock, so I got a second printer.
- $\,$ 23 $\,$ $\,$ Q $\,$ So, in your demonstrations that you provided for the jury,
- 24 you were able to show that the system was capable of doing all
- 25 these steps?

1 A Yes.

786

- 2 Q Whereas claim 26 had to do with this inventory
- 3 availability capability; correct?
- 4 A Correct.
- 5 Q So with respect to the first five elements, would your
- 6 opinion be the same with respect to whether those elements are
- 7 being practiced by the customers when they perform these steps
- 8 or by Lawson when it hosts the system?
- 9 A Yes
- 10 Q We can check those boxes off. Again, did we see you
- 11 actually performing those steps when you did your
- 12 demonstrations?
- 13 A Yes. That was the UNSPSC codes.
- 14 Q Well, that's the last element --
- 15 A You are talking about these first five.
- 16 Q Yes.
- 17 A I demonstrated all of these.
- 18 Q So this last element about converting data which we've
- 19 already given the jury the Judge's definition of substituting
- 20 data related to a selected matching item and the associated
- 21 source to data relating to an item in a different source.
- 22 applying that definition, does Lawson directly infringe this
- 23 claim?
- 24 A Yes
- 25 Q And do the customers perform the steps of this claim when

	2011.0	01.0	-	
	789			79
1 they use the system with that capability?		1	Q Does the Lawson system, as is the Lawson system capable	
2 A Yes.		2	of providing a database containing data relating to items	
3 Q Go to claim 29. This is a dependent claim; correct,		3	associated with at least two vendors maintained so that	
4 Doctor?		4	selected portions of the database may be searched separately?	
5 A Yes, it is.		5	MR. McDONALD: I object to the form of the question,	
6 Q So this dependent claim has to have all the steps that you		6	Your Honor. The element doesn't say capable of. It says a	
7 just indicated were present in claim 28 plus the additional		7	database.	
8 step of determining whether selective matching items available		8	THE COURT: He's objected to the form of the	
9 in inventory; do you see that?		9	question.	
10 A I do.		10	MR. ROBERTSON: The law is, Your Honor, all they have	
11 Q What is your opinion with respect to direct infringement		11	to do is provide a system that's capable of doing that. So I	
12 and indirect infringement as to this dependent claim 29?		12	think the objection is not well-taken.	
13 A I believe that Lawson is a direct infringer and an		13	THE COURT: Anything else?	
14 indirect infringer. We just saw with claim 28 that we went all		14	MR. McDONALD: There's a distinction I'm making	
the way through the converting process, and in the demo that I		15	between the database versus function. Capable of performing a	
		16		
			function is one thing. Having a database is another.	
17 codes, and then we did the determination of whether or not it		17	THE COURT: I think they're two different questions.	
was available in inventory when we did the laptop roller cases.		18	I think the first question is, does it have a database. If it	
19 Q And by providing this capability to its customers, is		19	doesn't, then you have to say something else. Your objection	
20 Lawson encouraging aiding, abetting, or assisting them in		20	is sustained to the form of the question.	
21 performing this step?		21	Q Does the Lawson system have a database containing data	
22 A Yes.		22	relating to items associated with at least two vendors	
23 Q Let's go to claim one of the '172, if we can, please.		23	maintained so that selected portions of the database maybe	
24 That's also an electronic sourcing system.		24	searched separately?	
25 THE COURT: That's tab four in your books, ladies and		25	A Yes. We saw the database in the item master and the	
	790			7
1 gentlemen.		1	vendor item table, and selecting portions of the database to be	
2 Q Now, this also starts out with a preamble, an electronic		2	searched separately was done by the search index.	
3 sourcing system comprising; do you see that?		3	Q Have we seen examples where Lawson has implemented	
4 A Yes.		4	scenarios in which they have provided vendor data for their	
5 Q Did you apply the same definition that the Court gave for		5	customers?	
6 that?		6	A Yes.	
7 A I did.		7	Q Have we seen examples where they do what you identified as	
8 Q Both for direct and indirect infringement?		8	data migration of the customer's catalog data to the new Lawson	
9 A Yes.		9	system?	
10 Q This is a system claim, so this involves the system or the		10	A We saw that in the statement of work.	
11 product we're talking about here; is that right?		11	Q Is the Lawson system capable of containing data relating	
12 A That's right.		12	to items associated with at least two vendors maintained so	
13 Q By providing a system capable of performing all of the		13	that selected portions of the database may be searched	
14 structures disclosed here, do you have an opinion, first, as to				
· · · · · · · · · · · · · · · · · · ·		14	separately?	
15 whether or not Lawson provides a database containing data		14	separately?	
whether or not Lawson provides a database containing data relating to items associated with at least two vendors			separately? A Yes.	
16 relating to items associated with at least two vendors		14 15 16	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers	
16 relating to items associated with at least two vendors 17 maintained so that selected portions of the database may be		14 15 16 17	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim	
relating to items associated with at least two vendors maintained so that selected portions of the database may be searched separately?		14 15 16 17 18	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element?	
relating to items associated with at least two vendors maintained so that selected portions of the database may be searched separately? MR. McDONALD: Object to the form of the question,		14 15 16 17 18	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes.	
relating to items associated with at least two vendors maintained so that selected portions of the database may be searched separately? MR. McDONALD: Object to the form of the question, Your Honor. He said something about capable of performing some		14 15 16 17 18 19	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes. Q These next five elements are means-plus-function claim	
relating to items associated with at least two vendors maintained so that selected portions of the database may be searched separately? MR. McDONALD: Object to the form of the question, Your Honor. He said something about capable of performing some structures or something. I think it's ambiguous as to what		14 15 16 17 18 19 20 21	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes. Q These next five elements are means-plus-function claim elements. You are familiar with that?	
16 relating to items associated with at least two vendors 17 maintained so that selected portions of the database may be 18 searched separately? 19 MR. McDONALD: Object to the form of the question, 20 Your Honor. He said something about capable of performing some 21 structures or something. I think it's ambiguous as to what 22 that means.		14 15 16 17 18 19 20 21 22	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes. Q These next five elements are means-plus-function claim elements. You are familiar with that? A I am.	
relating to items associated with at least two vendors maintained so that selected portions of the database may be searched separately? MR. McDONALD: Object to the form of the question, Your Honor. He said something about capable of performing some structures or something. I think it's ambiguous as to what that means. THE COURT: I don't see structures in there.		14 15 16 17 18 19 20 21 22 23	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes. Q These next five elements are means-plus-function claim elements. You are familiar with that? A I am. Q The Court's construed these claim elements. You've	
16 relating to items associated with at least two vendors 17 maintained so that selected portions of the database may be 18 searched separately? 19 MR. McDONALD: Object to the form of the question, 20 Your Honor. He said something about capable of performing some 21 structures or something. I think it's ambiguous as to what 22 that means.		14 15 16 17 18 19 20 21 22	separately? A Yes. Q Did Lawson assist, aid, abet, or encourage its customers to maintain a database that would satisfy the first claim element? A Yes. Q These next five elements are means-plus-function claim elements. You are familiar with that? A I am.	

1	let's go through direct infringement first and identify which
2	system infringes which claim.

3 A Okay.

Q And in each of these system configurations, do you have an

opinion as to whether or not all five satisfy the preamble that

they are electronic sourcing systems as defined by the Judge?

A Yes, all five.

Q In each of these configurations, does Lawson provide an

accused system, all five system that's capable of having at

least two product catalogs containing data related to items and 10

11 items associated with respect to sources?

12

Q In each of these scenarios, does all five systems, do they 13

provide the means for selecting a product catalog to search?

15

Q In each of these systems, do they provide means for 16

17 searching for matching items among the selected product

18 catalogs?

19 A Yes

20 Q In each of these systems, have we seen evidence that shows

that they have the means for building a requisition using data

relating to selected matching item and their associated 22

sources? 23

24 A Yes

Q In each of these five system that we've identified, does 25

that both of these are method claims?

A That's correct.

Q And both of these have -- the first five elements are

identical?

6 Q Now, earlier you said the direct infringement, I

understood your opinion to be, would be by the customers

performing the steps of this method claim as well as Lawson

when it hosts a system that can perform the steps of these

claims: is that right? 10

A That's correct.

12 Q So do you have an opinion as to whether or not customers

can perform the step of maintaining at least two product 13

catalogs on a database containing data relating to items

15 associated with the respective sources?

Yes, all of the systems do that, 16

Okay, all five?

18 All five.

19 Q Now, the same for claim 28, do you have an opinion as to

whether or not customers, using all five of the systems as they

21 are configured and defined, can select or -- can perform the

22 steps of selecting product catalogs to search?

23 A Yes, they can.

Q. Now that would be the same for both claim 26 and 283 24

Yes, it's the same.

it have the means for processing the requisition to generate

798

one or more purchase orders for the selected matching items?

1

Q Which of the five systems have we seen have the ability

for converting data relating to a selected matching item and

associated source to data relating to an item and a different 6

source?

A The ones that contain the requisition self-service module.

Q So if it had the requisition self-service module, that

10 would be able to satisfy this last claim element?

11

Q So that would be system, two, three, four, and five as we 12

defined them; is that right? 13

That's what my diagram says, yes.

15 Q For each of these elements, does Lawson encourage, aid.

16 abet, or assist their customers to satisfy them?

17

18 Q These two product catalogs, have we seen instances where

19 Lawson will make catalogs available, multiple catalogs

available to their customers either through external, Punchout 20

catalogs, or internal catalog databases? 21

22

23 Q Let's go to claim 26 if we can. Let's do that. If we can

put claim 26 next to claim 28, put those side by side. They're 24

a little difficult to read, but can you confirm for me, Doctor,

Q All right. The next step in these method claims is

searching for matching items among the selected product

catalogs. Do you see that?

A I do

That's for both claim 26 and claim 28?

Correct.

We see the ability to search for matching items among the

selected product catalogs in evidence you offered?

Yes. We saw it in the demonstrations.

10 Q Did we see it in documentation?

11 A Certainly.

Q That would be for both claims? 12

13 A For both claims.

Q Does all five of the accused Lawson systems have the

ability to, capability of building a requisition using data 15

relating to selected matching items and their associated

17 sources?

18 A Yes.

Q Can the customers perform that step with all five

20 configurations that we've defined?

Yes. 21 Α

Q The next step is processing requisition to generate one or

23 more purchase orders for the selected matching items. Did we

see that that step could be performed in the demonstrations? 24

A We saw it in the demonstrations.

	2011.01.07 Trial Transcript Day 4 1/7/2011 3:42:00 P
	801 80:
1 Q Can that be performed for all five of their configurations	1 of the elements of the method claim of claim 28 in order to
2 as we've defined them?	2 infringe claim 29; is that right?
3 A Yes, it can.	3 A Right.
4 Q Is there indirect infringement of that as well?	4 Q So you have to be able to perform that converting-data
5 A Yes.	5 step to find items associated with one source and items
6 Q That would be for both claim 26 and claim 28?	6 associated with another source; correct?
7 A Correct.	7 A Right.
8 Q Is that because the step there	8 Q Then to infringe this claim, you'd also be able to have to
9 A Because it's identical.	9 take that system and have a step of determining whether a
10 Q Now, the next and last step in claim 26 is determining	10 selected matching item is available in inventory; is that
11 whether a selected matching item is available in inventory.	11 correct?
12 Which of the five configurations of these accused Lawson	12 A Correct.
13 systems has the capability of performing that step?	13 Q Which of the systems, as we've identified them, would
14 A It's, it would be the system that we called system three	14 infringe or directly infringe claim 29?
15 which was Punchout, requisition self-service, the procurement	15 A Three and five.
16 modules, and the platform; system four, which was the EDI	16 Q Why is that?
17 module on top of the procurement system on top of the platform	
and system five, which had Punchout, requisition self-service,	18 check inventory externally, the requisition self-service that
19 electronic data interchange, the procurement modules, and the	
20 platform.	20 system five also had the EDI module which was the purchase
21 Q Do you have an opinion as to whether or not Lawson	21 order and purchase order acknowledgment exchange.
indirectly infringes that claim as well?	22 Q And does Lawson indirectly infringe claim 29 by assisting,
23 A Yes, I believe they do.	, , , , ,
	23 aiding, abetting, encouraging its customers to perform this24 method step?
24 Q How do they do that? 25 A By providing those training courses, that assistance,	25 A Yes.
1 those manuals colling training professional continue	802 80
1 those manuals, online training, professional services.	1 Q And do they also indirectly actually, strike that. I
2 Q The last element of claim 28, is this converting-data	2 think we're done with claim 29. Why don't we go to claim one
3 element that had to do with the ability to find a selected	3 of the '172 patent. Again, this is an electronic sourcing
4 matching item and an associated source and relating it to data	
5 relating to an item in a different source; do you see that?	5 A Yes.
6 A Ido.	6 Q Now, it also uses the term comprising as all these claims
7 Q What systems, in your opinion, satisfy that claim element?	
8 A The ones containing the requisition self-service module	8 understanding is of the term comprising?
9 which would be two, three, and five.	9 A Comprising means including but not limited to.
10 Q Does four have a requisition self-service module?	10 Q So we're going to have to have all of these elements, but
11 A No.	11 we could have additional elements, and that would make it
THE COURT: Four is core plus EDI.	12 non-infringing; is that right? All the elements here are
13 MR. ROBERTSON: I apologize.	13 satisfied?
14 Q All right. Do you have an opinion as to whether or not	14 A Correct.
15 they indirectly infringe claim 28 in the same manner they	15 Q So, for example, in your demonstrations, there was some
16 infringe claim 26?	16 steps in which you had to seek certain approvals from managers
17 A Yes.	or technical people in order to be able to complete the
THE COURT: And is the answer that they do or they	18 requisition and purchase order process?
19 don't?	19 A Right, but that's irrelevant to this claim.
THE WITNESS: The answer is that they do.	20 THE COURT: Your opinion, they infringe all five
MR. ROBERTSON: Thank you, Your Honor.	21 systems or infringement if there's infringement, the mere
Q Claim 29, this was that dependent claim that depends from	fact that there is the process of going to the managers, et
23 claim 28; correct?	23 cetera, doesn't change the fact that they infringe if you
24 A Correct.	24 conclude there's infringement, and that is the way
OF O On the analysis infines alsies on section of the section of	OF THE MITNESON Von His

25 Q So in order to infringe claim 29, you have to satisfy all

THE WITNESS: Yes, it is.

WEAVER - DIRECT WEAVER - DIRECT 819 containing data relating to items associated with at these remaining elements are indirectly infringed by 2 least two vendors maintained so that selected portions Lawson by providing those services? of the database may be searched separately? A My opinion is that they do. A Yes, they do. Q Why don't we go to the claims of the '516 patent. Q And in your opinion by the acts that we have And that's behind tab 3 in the jurors' notebook. The 5 described does Lawson satisfy that element for first claim we're going to talk about there is Claim 6 indirect infringement? One. And, again, the preamble says it's an electronic sourcing system. Do you see that? 8 9 Q Do configurations 2, 3 and 5 have means for A Yes entering product information that at least partially Q And the Court has defined that. It's the same for 10 10 11 describes at least one desired item? 11 Claim One, for example, of the '172 patent. Is it A Yes, 2, 3 and 5, they do. your opinion that all five configurations that are 12 13 Q Do 2, 3 and 5 satisfy the element of means for 13 accused here are electronic sourcing systems as the searching for matching items that matched the entered Court has defined them? 14 15 product information in the selected portions of the 15 16 16 Q This electronic sourcing system also comprises a 17 A They do. 17 collection of catalogs of items stored in electronic 18 Q How did we see that? format. Do all five configurations, as we have A Because of the user interface that we saw in the defined them, satisfy that claim element? 19 19 requisition self service 20 A Right, all five contain multiple internal Q And we saw that in your demonstrations? 21 catalogs, and when you add Punchout, you can add 21 22 A Sure, we did 22 external catalogs as well. Q Do configurations 2, 3 and 5 have means for Q Do all five configurations of these accused Lawson 23 23 24 generating an order list that includes at least one 24 systems as we've defined them satisfy the claim matching item selected by said means for searching? element of having a first set of predetermined 25 818 820 WEAVER - DIRECT WEAVER - DIRECT A They do. criteria associated with said collection of catalogs? Q Is it that RSS module that provides that order A Yes, they do. list or shopping cart as you referred to it? Q What evidence do we see for that? A Yes, the RSS is where the shopping cart A We saw in my demonstration that you could enter an 5 functionality resides. item number, or vendor item, manufacturer number. You 6 Q Do configurations 2, 3 and 5 of the accused Lawson have a text box in the user interface that allowed systems have a means for building a requisition that uses data obtained from said database related to Q Do all five configurations of the accused Lawson selected matching items on said order list? systems as we've defined them have a second set of 10 predetermined criteria associated with items from each Q Do configurations 2, 3 and 5 have a means for of said catalogs? 11 11 12 processing said requisition to generate purchase A Yes, they do. orders for said selected matching items? 13 Q How do they do that? 13 A They do. We saw that in the demo. A Again, that's the text box. Q The searching that's the subject of the means for Q Do all five configurations have a catalog 15 15 searching which permits you to search a database, selection protocol, said catalog selection protocol 16 17 selected portions of a database, what evidence did we 17 relying on said first set of predetermined criteria to select less than said entire collection of catalogs, 18 19 A That was the search index that selected only --19 including a matching vendor identification code with a that searched only selected portions of the database. 20 subset of said collection of catalogs wherein said 20 21 Q Now, if Lawson provides such an electronic 21 subset of catalogs includes both a vendor catalog from 22 sourcing system to its customers and assists them in 22 a predetermined vendor and a second catalog from a implementation, maintenance, servicing and all the predetermined third party that's one of a manufacturer 23 23 training materials, guides, manuals, online services, 24 and a competing vendor, said predetermined third party 24 etc., do you have an opinion as to whether or not all selling items corresponding to items in said vendor

WEAVER - DIRECT WEAVER - DIRECT 821 catalog? Q So we have to satisfy all the elements of Claim A That's a mouthful, isn't it? The answer is ves. One, which you just indicated for all five 2 And we saw that yesterday when I did the demonstration configurations is infringing. where I first searched for Dell and got back items Claim Two talks about having catalogs stored in that included Dell as one of these keywords. So that separate databases. Do you see that? 5 6 was my first predetermined criteria. And then I added a second predetermined criteria. Q How would the configurations as we've defined them the Dimension 8100, and that narrowed the search down satisfy this separate database requirement? 8 8 9 to just two items, but they were from different A These would be external databases that are vendors, Dell and Diablo. So one of them was a accessible through the Punchout module. 10 11 competing vendor. Dell is a manufacturer. Dell is a 11 Q Could they be a Punchout external plus Lawson competing vendor. internal catalogs? 12 13 So, yes, we've seen evidence that these systems 13 A Of course. that we're talking about directly infringe the fourth Q So if it requires Punchout, only configurations 3 14 15 element of Claim One 15 and 5, as we've defined them, have Punchout; is that Q The last element of Claim One of the '516 patent 16 16 17 is a search program. Said search program relying on 17 A That's my diagram, yes. 18 said second set of criteria to select specific items Q So your opinions with respect to Claim Two, I'd from said catalogs determined from said catalog like you to confine them to just configurations 3 and 19 selection protocol. Did I read that correctly? 5 that have the Punchout application. Okav? A Right. A I think so. Again, we saw that yesterday in the 21 21 demonstration where Dimension 8100 was the second set Q Does Lawson configurations 3 and 5 satisfy the 22 22 of predetermined criteria. claim cited in Claim Two of an electronic sourcing 23 23 24 Q Did you use that second set of predetermined 24 system as recited in Claim One wherein catalogs 25 criteria to conduct the search? comprised of said collection of catalogs are stored in 822 824 WEAVER - DIRECT WEAVER - DIRECT A Yes, I did. separate databases? Q So do all five configurations of the accused A Yes, we saw that in the Punchout to Dell and systems as we've defined them satisfy all of the 3 Staples. elements of Claim One of the '516 patent? Q Do they indirectly infringe in the same manner A Yes, they do. 5 that you have been describing? 6 Q If Lawson offers all five of those configurations, manufacturers, sells or imports, do they directly Q Let's go to Claim Six if we can. Again, Claim Six 8 infringe this claim? is a dependent claim that depends on Claim One. So A Yes, they would. all the elements of Claim One need to be satisfied 10 Q And in the same manner, if they provide such a and you have already rendered an opinion that that is system to their customers and then induce them to use present. 11 11 12 that system by the evidence that you've offered of Claim Six recites an electronic sourcing system as assisting, aiding, abetting, encouraging, etc., 13 recited in Claim One where it said second set of a 13 predetermined criteria includes at least one of a through all the various services and implementation and educational services they provide, what is your catalog number and an item textual information. Do 15 15 opinion with respect to whether or not Lawson you see that? A I do. indirectly infringes Claim One? 17 17 Q Do configurations 3 and 5 including -- excuse me. 18 19 Q So they would satisfy all of the elements if they 19 Let me step back. What configurations satisfy Claim provided a system that had this capability and then Six that has at least one of the catalogs -- excuse 20 20 21 performed those acts that would constitute inducement? 21 me -- wherein said set of predetermined criteria 22 22 includes at least one of the catalog number and item Q Let's look at Claim Two of the '516 patent, which textual information? 23 23 is a dependent claim. Do you understand that? 24 A All five A Sure. It depends from Claim One. Q Does Lawson indirectly infringe in your opinion in

WEAVER - DIRECT WEAVER - DIRECT 827 MR. ROBERTSON: Let me do it this way, if I the same manner you have been describing? A Yes 2 could. Q Let's look at Claim Nine if we could. Claim Nine BY MR. ROBERTSON: is an independent claim, is that right, Doctor? Q Doctor, this last element of Claim Nine, let's A It is focus on that. A second identification code 5 6 Q Again, it has the an electronic sourcing system associated with a second item in a second catalog said comprising. Is that in your view the same electronic first item and said second item being generally sourcing system that the Court has defined? 8 equivalent and wherein a selection of one 9 A It is identification code from one of said first and second catalogs provides the other identification code from 10 Q Which of the configurations has a collection of 10 11 catalog items stored in electronic format? 11 the other of said catalogs, what configurations have A All five have this first element. 12 we seen that can satisfy this claim element of Claim 12 13 Q Which of the configurations have a first 13 identification code associated with a first term in a 14 A That one needs the catagory searched, which I 14 15 first catalog? 15 demonstrated with the UNSPSC codes, and that's 16 A First item in a first catalog. That's all five. implemented by the requisition self service module. 17 Q Okay. This last element has a second 17 And as we have defined them, that's configurations 2, 18 identification code associated with a second item in a Q Just configurations 2, 3 and 5 have the ability to second catalog. Said first item and said second item 19 19 20 being generally equivalent and wherein a selection of do that UNSPSC capability in order to satisfy this claim element? one identification code from one of said first and 21 21 second catalogs provides the other identification code 22 22 A That's correct Q Let's just focus on configurations 2, 3 and 5 for 23 from the other of said catalogs. 23 24 MR. McDONALD: Your Honor, I object. I think 24 purposes of this claim. for this claim we're just talking about all the 25 THE COURT: The objection to the question. 25 826 828 WEAVER - DIRECT WEAVER - DIRECT systems except one. So I did rather the questions though, I think, has been cured. When he said all were phrased in that context. five satisfy element one and satisfy element two, then 3 MR. ROBERTSON: I think when he answers the per force that includes 2, 3 and 5. So he's answered question, we can find out which configurations satisfy the questions, but the bottom line is that only the 5 this element and therefore that will identify the 5 configurations 2, 3 and 5 are charged to infringe 6 configurations that are infringed directly or indirectly Claim Nine; is that right? MR. McDONALD: The prior ones he's already THE WITNESS: That's right, sir. 8 used all the systems. I was a little slow in reacting THE COURT: Was that your opinion, sir? THE WITNESS: Yes sir it is 9 10 THE COURT: Which ones do you say are charged 10 THE COURT: All right. Now, what about with infringement in the complaint of Claim Nine. 11 11 indirect? 12 MR. McDONALD: All except No. 1. Systems 2 BY MR. ROBERTSON: Q By Lawson making, using, selling, offering for through 5 are accused of infringing Claim Nine, as I 13 13 sale or importing electronic sourcing system that's THE COURT: Is that right or is it wrong? capable of performing all of these elements and by 15 15 MR. ROBERTSON: I don't have it committed 16 encouraging, aiding, assisting and abetting their right to my memory right this second. 17 customers to use that same system through all of the 17 18 Your Honor, let me rephrase it. 18 various evidence you have offered as to providing 19 THE COURT: But you have to go back and 19 manuals and guides and online services and training rephrase all of them if he's right. and implementation and servicing, do you have an 20 20 21 You-all know which ones allegedly are 21 opinion as to whether all of the elements of Claim 22 infringed. He says that all five infringe it, but 22 Nine are satisfied and Lawson indirectly infringes whether he accused them of that in the complaint, I 23 23 24 don't know. I don't have it in front of me 24 THE COURT: As to which systems? Do you have it over there, somebody? 25 MR. ROBERTSON: Two, 3 and 5.

WEAVER - DIRECT 829 WEAVER - DIRECT 831 A Yes, I do. So in the item description, there were things like Q What is the opinion? that cost, and the unit of measure, and the vendor A I believe that they indirectly infringe for name, and I could have used those items like vendor configurations 2, 3 and 5, name as the additional search criteria Q Okay. Let's focus on Claim 21 if we can for a Q Do configurations 2, 3 and five have a multiple minute, of the '516. Let me focus on the last element 6 purchase order generation module, said purchase order first if Loculd generation module creating multiple purchase orders The last element says, Wherein said determination from a single requisition created with said user 8 9 system includes a cross-reference table matching an generated criteria and said search module criteria? identification code from a first located item with a A Yes, they do, and we saw that in three of my 10 10 11 second identification code from a second located item. 11 Do you see that? Q Do configurations 2, 3 and 5 of the accused Lawson 12 13 13 systems satisfy the element wherein each of at least Q So this element requires a cross-reference table. two catalogs include a generally equivalent item from 15 Do you see that? 15 a different source of said requisition module working 16 in combination with said catalog searching module to 17 Q What software application or module of Lawson is 17 determine multiple sources for said item? 18 required in order to do this cross-reference table A They do, and we saw that in my first demo where I looked for -- I used the UNSPSC codes to look for 19 matching? 19 20 A That's requisition self service. 20 notebook computers and found two different computers Q So, therefore, that would include configurations 21 from two different vendors 21 22 2, 3 and 5; is that right? 22 Q Do configurations 2, 3 and 5 satisfy the element 23 A That's right. 23 wherein said multiple sources is limited by said 24 Q So focusing only on configurations 2, 3 and 5 for 24 catalog searching module providing a match according the purposes of Claim 21, is it your opinion that to said user generated criteria, said search module 830 832 WEAVER - DIRECT WEAVER - DIRECT those configurations comprise an electronic sourcing criteria in a determination system that located items are generally equivalent? 3 A Yes, it is. A They do. And, again, we saw that in my first demo Q Do those configurations have a requisition module using the UNSPSC codes to drill down to notebook computers, and we found the IBM ThinkPad and the Dell including data fields, user generated criteria entered 6 into at least one of said data fields to generate at least partial criteria corresponding to a desired Q Do configurations 2, 3 and 5 satisfy the claim 7 8 element wherein said determination system includes a A They do. The requisition module has data fields cross-reference table matching identification codes 10 like the name of the requester. And the user from a first located item with a second identification generated criteria could be things like the vendor code from a second located item? 11 11 12 number, vendor name, item number, manufacturer number. 12 THE COURT: He's already answered that. He Q Do the configurations 2, 3 and 5 have a catalog 13 answered that. That's what you started with. You 13 started with six, and you did 1, 2, 3, 4 and 5 collection searching module, said searching module 14 including a collection of catalogs of items stored in elements. 15 15 16 an electronic format, a catalog collection criteria Is your answer yes or no? 17 used to select less than the entire collection, said THE WITNESS: The answer is ves. 17 Q Do you have an opinion as to whether or not Lawson searching module being used to generate additional 18 19 search module criteria for said data fields of said 19 indirectly infringes Claim 21 by inducing infringement requisition module? 20 by all of the activities that we've previously 20 21 A They do. And we saw that when I did a search for 21 described by offering a system that's capable of 22 Dell, and that returned items, and I drilled down on 22 performing these claim elements? the items. And the item page produced the -- what's A My opinion is that they do. 23 23 the proper name for it? Yeah, to generate additional Q Would that be for all the elements? 24 search module criteria

WEAVER - DIRECT WEAVER - DIRECT 835 Q Can we go to Claim 22? Claim 22, again, is one of said subset of catalogs includes both a vendor catalog these dependent claims which depends on Claim 21. from a predetermined vendor and a second catalog from which adds the additional limitation wherein said a predetermined third party? determination system includes an identical A Yes, they do. We saw that in my demo for the identification code for each of said located items. notebook computers. 5 Q The Court has defined "subset" in its glossary. 6 Do you have an opinion as to whether or not the configurations of the accused Lawson systems 2, 3 and What has the Court defined "subset" to be? 5 satisfy that claim element? A Less than all of a set. 8 9 A My opinion is that they do. We saw that twice. Q Did you apply that construction in rendering your Once in the demonstration where we drilled down to opinions? 10 10 11 notebook computers and this morning where we drilled 11 A I did. down to halogen lamps. The UNSPSC codes were Q Next element of Claim 29 of the '516 recites a 12 13 identical for the two notebook computers and identical 13 search program, said search program relying on said for the two halogen lamps. second set of criteria to select specific items from 14 THE COURT: Which of the configurations are 15 15 said catalogs determined from said catalog selection 16 we talking about: 2, 3 and 5? protocol. Do you see that? THE WITNESS: Two, 3 and 5. 17 17 A I do 18 BY MR. ROBERTSON: Q Do you have an opinion as to whether or not Q Why don't we go to Claim 29 of the '516. 19 19 configurations 2, 3 and 5 satisfy that claim element? Actually, I'm reminded I may have overlooked indirect A They do. We saw that in my demonstration infringement on this one. Does Lawson indirectly 21 searching for Dell as the first predetermined criteria 21 infringe Claim 22 in the same manner that you have and the Dimension 8100 as the second. 22 Q The last element of Claim 29 recites the 23 been describing, for example, as they indirectly 23 24 infringe Claim 21? cross-reference table linking a vendor item catalog A Yes. number from said vendor catalog with an item catalog 25 834 836 WEAVER - DIRECT WEAVER - DIRECT Q Okay. Thank you. number from said predetermined third party. Claim 29 recites an electronic sourcing system. 2 Do configurations 2, 3 and 5 satisfy that claim 3 I'd like you to focus only on configurations 2, 3 and 3 element? 5 for purposes of this claim. A They do using the UNSPSC codes. Q Do you have an opinion as to whether or not Lawson Are configurations 2, 3 and 5 an electronic 6 sourcing system in your opinion as the Court has induces infringement of its customers by providing an defined it? electronic sourcing system that's capable of doing all of these elements of Claim 29? Q Do configurations 2, 3 and 5 have a collection of A My opinion is that they do. 10 catalogs of items stored in electronic format? Q Earlier I asked you whether or not these five A They do. configurations in the manner that they are configured 11 12 Q Do configurations 2, 3 and 5 have a first set of as we've defined them had any kind of substantial predetermined criteria associated with said collection 13 non-infringing use if they had at least two product 13 catalogs available to them. Do you recall that? of catalogs? A They do. A I recall the question. 15 15 Q Do configurations 2, 3 and 5 have a second set of Q With respect to indirect infringement as to all 16 predetermined criteria associated with items from each 17 the claims you have just identified for any of the 17 of said catalogs? 18 configurations that are the subject of indirect A They do. 19 19 infringement, do you have an opinion as to whether or Q Do configurations 2, 3 and 5 have a catalog 20 not Lawson would contribute to infringement if those 20 21 selection protocol, said catalog selection protocol 21 systems as configured had no substantial 22 relying on said first set of predetermined criteria to 22 non-infringing use? select less than said entire collection of catalogs A I didn't understand the question. 23 23 and including matching a vendor identification code 24 Q Sure. Let me go back. Earlier you went through with a subset of said collection of catalogs wherein this issue of whether or not there was a substantial

RAI FIGH - DIRECT 937 RAI FIGH - DIRECT 939 A That's correct. customers with -- and I'm reading from the first line Q And Lawson's Professional Services Organization there. Instructions on the key setup components and also provides services that are referred to as upgrade processing functionality of the inventory control consulting services: is that correct? application: is that correct? A That's correct A That's correct. 5 Q And among the training included in that course 6 Q And those upgrade services would involve assisting the clients with upgrading from one version of a would be, in following along with the second sentence, Lawson system to the next released version of that instructions on the key setup components and 8 9 system; is that correct? processing functionality -- excuse me, instructions A That's correct. concerning how to set up the item master associated 10 10 11 Q Lawson's Professional Services Organization also 11 with the inventory control application; is that provides technical development services to customers 12 12 13 such as interface development and customization 13 A Yes, that's right. development services; is that correct? Q Turn to page 6 of that exhibit, please. Do you 14 15 A We do at times, yes. 15 see on that page there's a course entitled, Q Lawson's Professional Services Organization also 16 Requisition Self Service 8.1-9.0? 17 offers services to Lawson's customers that are 17 18 referred to as learning services; is that correct? Q Lawson also offers a course entitled, Requisition 19 A That's true. 19 Self Service 8.1/9.0, which introduces major features 20 Q Among the learning services that Lawson's of requisition self service such as requisition Professional Services Organization provides to 21 approvals, receiving, and the shopping experience 21 Lawson's customers would be public instructor led which includes searching the catalog for items, using training in one of Lawson's offices or on site shopping lists, ordering specials or services, and 23 24 instructor led training for a specific customer at 24 ordering by categories; is that correct? their site: is that correct? A Yes. 25 938 940 **RALEIGH - DIRECT RALEIGH - DIRECT** A Sure. Q In this course, Lawson enables its customers to MS. ALBERT: Mike, if you would, could we have an experience using an actual Lawson training 3 have Plaintiff's Exhibit 202 system that would have the requisition self service Q And, Ms. Raleigh, that is in Volume I of your application installed: is that correct? 5 5 THE COURT: Before you go anywhere, what was Q I believe I'm done with that document. 6 the exhibit number for that Frank deposition? You're 7 going to have to put it in the record because the Q Lawson's Professional Services Organization also court reporter wasn't taking it down. Just look it up provides services to Lawson's customers that consist 10 and tell me later of installing the Lawson software on the customers' Go ahead, Ms. Albert, hardware: is that correct? 11 11 Q Do you have Plaintiff's Exhibit 202? 12 12 13 13 Q And you previously mentioned that Lawson provides Q Is Plaintiff's Exhibit 202 a catalog of online 14 implementation services to its customers. Do you courses that Lawson offers to its customers? 15 recall that? 15 A Yeah. It's a catalog that was published at a 16 certain point in time, but ves. 17 Q Among the implementation services that Lawson 17 Q Can you turn, please, to page 5 of that exhibit, 18 provides to its customers, those services would and the Bates number on that page ends with 4027? 19 19 include assistance with designing the configuration of 20 the Lawson software to meet the customer's business 20 21 Q Do you see at the top of the page there's a course 21 requirements; is that correct? 22 entitled inventory control 8.1/9.0 X? 22 23 Q Also included among the implementation services 23 Q And Lawson offers this two-day course entitled 24 that Lawson would provide to its customers would be Inventory Control 8.1/9.0 X that provides its assisting the customer with developing test scripts

1	it.		1	Q I'd like to turn you now to table 3.5, which is on	
2	You can call the lady back. Just disregard		2	page 17 of the document. If you'd look down on the	
3	the answer for now. You can call her back and put her	:	3	table, it's Bates number ending in 5376.	
4	on in your case if you want to, but right now we're		4	A I'm there.	
5	talking about what she asked. So the objection is		5	THE COURT: Is that master file and	
6	sustained.		6	configuration table value building and scope.	
7	BY MR. SCHULTZ:		7	MR. SCHULTZ: That is exactly it, Your Honor.	
8	Q During your direct examination with Ms. Albert,		8	BY MR. SCHULTZ:	
9	she talked about converting data?		9	Q Do you recall testifying to this table earlier?	
10	A Yes.	1	10	A I do.	
11	Q What is your understanding with respect to	1	11	Q And you had some discussion regarding Eclipsys.	
12	conversion of data into the item master in terms of	1	12	Who is Eclipsys?	
13	who does it?	1	13	A Eclipsys is the vendor of the legacy software. So	
14	MS. ALBERT: Objection, ambiguous. I asked	1	14	it's the software that Jackson was using that we	
15	specifically about one implementation for Jackson.		15	replaced.	
16	THE COURT: I think you asked who did the		16	Q What was your involvement with this RFP and	
17	conversion, and that's fair game for him to ask		17	statement of work process with Jackson?	
18	further about that.		18	A Ultimately, I was the person who oversaw the	
19	MS. ALBERT: I think his question was		19	execution of the work, but I participated at various	
20	broader.		20	points along the way throughout the RFP and the	
21	THE COURT: It is.		21	creation of the SOW.	
22			22		
23	MS. ALBERT: Than just this Jackson.		23	Q In this table, there are some terms that are used	
24	THE COURT: It is, but have you heard about that camel that will sticks his nose under the tent?		23	under file. One of the them is vendor master, one is	
25	Okay.		2 4 25	item master, one is vendor catalog. Whose terms are those?	
	,				
		966			9
1	BY MR. SCHULTZ:		1	A Those would be Jackson's terms.	
2	Q Ms. Raleigh, do you remember the question? Maybe		2	Q Have they any relation to the Lawson system?	
3	I'll just ask it again.		3	A No, not in this context here, no.	
4	A If you could.		4	Q You also, if you'll look under the vendor catalog,	
5	Q In a conversion of legacy information into the		5	which is item 3, you mentioned earlier that there's a	
6	item master information, who's in charge of doing the		6	Lawson response in bold letters?	
7	data conversion?		7	A Correct.	
8	A Those responsibilities are typically shared				
			8	Q Could you explain why there's a Lawson response in	
9	between Lawson and the customer. There are a variety			Q Could you explain why there's a Lawson response in bold letters in paragraph 3?	
	,		8	bold letters in paragraph 3?	
10	of steps in the overall process, and some of those	1	8 9	bold letters in paragraph 3? A So you have to understand that the Public Health

So under the scope of that, certain portions of the information provided here came	
10 11 12 13 14 15	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance.	1 1 1 1 1 1	8 9 110 111 112 113 114 115 116	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson.	
10 11 12 13 14 15 16	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question	1 1 1 1 1 1 1 1	8 9 110 111 112 113 114 115 116 117	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would	
10 11 12 13 14 15 16 17	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's	1 1 1 1 1 1 1 1 1	8 9 110 111 12 13 14 15 16 17	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would	
10 11 12 13 14 15 16 17 18	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's and what was the customer's responsibility?	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	8 9 110 111 112 113 114 115 116 117	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would have known what systems they used, what data there	
10 11 12 13 14 15 16 17 18 19 20	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's and what was the customer's responsibility? THE WITNESS: For the scope of this	1 1 1 1 1 1 1 1 2	8 9 110 111 112 113 114 115 116 117 118	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would have known what systems they used, what data there was, what they needed to get into our system.	
10 11 12 13 14 15 16 17 18 19 20 21	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's and what was the customer's responsibility? THE WITNESS: For the scope of this implementation, I did.	1 1 1 1 1 1 1 1 2 2 2	8 9 110 111 112 113 114 115 116 117 118 119 120 121	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would have known what systems they used, what data there was, what they needed to get into our system. Lawson's responsibility would be to respond to	
10 11 12 13 14 15 16 17 18 19 20 21	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's and what was the customer's responsibility? THE WITNESS: For the scope of this implementation, I did. THE COURT: That's what he's talking about	1 1 1 1 1 1 2 2 2 2	8 9 10 11 12 13 14 15 16 17 18 19 20 21	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would have known what systems they used, what data there was, what they needed to get into our system. Lawson's responsibility would be to respond to those, right, in terms of how are we going to	
9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	of steps in the overall process, and some of those steps, certainly the education on how to get the data formatted into the right file format, and how to use the tools that will load it, those are almost always responsibilities that Lawson will take because the customer wouldn't know how to do it if it weren't for our assistance. THE COURT: Didn't you answer this question in answering about the tables on 16, what was Lawson's and what was the customer's responsibility? THE WITNESS: For the scope of this implementation, I did.	1 1 1 1 1 1 2 2 2 2 2 2 2	8 9 110 111 112 113 114 115 116 117 118 119 120 121	bold letters in paragraph 3? A So you have to understand that the Public Health Trust of Miami is a government institution. So they have very strict laws about the way that they request for proposals and the way that they write contracts with their vendors. So under the scope of that, certain portions of the information provided here came from Jackson. So the first several columns of this table would have only come from Jackson because only Jackson would have known what systems they used, what data there was, what they needed to get into our system. Lawson's responsibility would be to respond to	

989 the afternoon on Tuesday, it looks like. If not, you may be kicking off on Wednesday morning, it depends. My wife criticizes me substantially for checking out the NOAA weather and other weather items like the Weather Channel, and she accuses me of being an old man with nothing to do because I do that, but there are times when it comes into play. And I saw 8 that there is a very significant snowstorm supposed to hit the Midwest, and I don't want you-all to go home over the weekend and get trapped there. 10 11 So be advised that being trapped in the snow 12 is not a sufficient excuse not to start the trial. 13 Mr. Carr will be ready to go. 14 And I am not, I want you to know, being paid by any merchant in town to keep you-all here. 15 16 All right. Thank you very much. Have a nice 17 weekend. Get some rest. 18 (The proceedings were adjourned at 5:17 p.m.) 19 20 21 22 23 24 25

A Yes for certain vendors 1 1 that up to one user --2 Q I'd like to talk to you a little bit about the 2 THE COURT: Okay. Excuse me. Go ahead. requisitions module if we could Q All right. So I'm clear on this, this requisition A Okav. self-service application differs from the requisition module in Q That's part of the core three modules we talked about for it's more of a widespread application that can be used by the S3 procurement product; right? multiple users as opposed to the requisitions module in which typically the requisitions department is authorized to make A Yes 8 Q Isn't it true that more often than not Lawson's customers purchases and not all these other employees? in the public sector have some sort of requisition module or Requisition self-service is designed to be available through a web browser and available to more people. 10 application they've acquired from Lawson? 10 11 A I believe that's correct. Q Now, you call some of these things modules and some of Q Let's talk a little bit about requisition self-service for these things applications, but really that's terminology you 12 12 a moment if we could, sir. Would it be fair to say that the just use in the way you market it; isn't that right? 13 13 requisition self-service application is intended to be A It's terminology from the marketing, how we market and user-friendly? 15 15 A That is the intent. 16 Q It's still software: right? 16 17 Q That's one of its goals; right? 17 Still software, yes 18 18 One of the things you can do with this requisition Q This requisition self-service application that Lawson 19 self-service application is you can click on a drop-down menu 19 20 offers, that provides the ability of hundreds, perhaps even for find/shop to specify to search a catalog; isn't that right? 21 thousands of individuals at a customer to have access to this 21 It's a find/shop search catalog procurement capability at their desktop or laptop PC; correct? 22 Requisition self-service has that capability: right? 22 23 A Yes, for the requisitioning capability 23 Yes, it has that drop-down menu. 24 Q Isn't it, in fact, how Lawson markets this requisition 24 And a user can also input keywords into a search box in self-service application, by saying, in effect, you can now this requisition self-service application and the user 25 1011 1013 distribute that capability to many of your employees to have interface to locate products; isn't that right? 1 the ability to search for matching items, build requisitions, Yes, they can. 3 and generate multiple purchase orders; correct? You have some familiarity with a standard known as the A We market it as a way for them to search those items and universal standard products and services classification code, also known as the UNSPSC code: correct? Q And then you need the other modules in order to do the --6 generate the requisition and purchase orders and complete the Q And the UNSPSC code can be assigned to items in the Lawson procurement suite and used in a way to navigate in this requisition self-service application we've been talking about; 9 A Right. You need the purchase order to generate the 10 10 isn't that right? 11 THE COURT: Excuse me just a minute. If a vendor 11 A Yes with whom the customer has a need to interact has a large list And so this -- actually where is the UNSPSC load for 12 12 13 of items, and each one of these people over here of these 13 inputting that data? How do you do that? tables, the lawyers, they are different customers or different 14 For importing the UNSPSC code? 15 employees of the customer, could Mr. Carr, one of those people 15 Classification codes 16 over here, have one segment of the vendor items available to A Okay. So all the commodity structure, so all the codes him because he's in department A, and Mr. McDonald have another and the hierarchy are loaded into inventory control. 17 17 Inventory control module has the capability to load that 18 segment of the same vendor's items but not the same ones 18 19 because he's in department B, et cetera? Could that be done in 19 as offered; right? 20 20 21 THE WITNESS: In that example, we would load all the 21 Q So out of the box, inventory control module, one of these items into the item master, and then certain departments, you core modules that make up this S3 product we've talking about

may restrict who has access to certain items in the item master

so that an individual in a particular department may not be

able to buy, say, computers, for example. So you could set

23

24

24

has that capability to get those UNSPSC classification codes

right into it: right?

Lohkamp - Redirect 1154 nine plus you have to do that; isn't that right? Dale Christopherson. 1 2 A In nine plus? THE COURT: How long is this going to take? 2 Any version nine and above? MR. ROBERTSON: Your Honor, I'm trying to cut it back 3 Oh, any version nine and above, that's correct. 4 considerably. I think I'd be less than 45 minutes. There are several versions of this software we've been THE COURT: Mr. Niemeyer, how long is his examination 5 talking about; correct? 6 going to be? A Yes, there are, 7 MR. ROBERTSON: Less than an hour. Q And there's a separate license fee associated with Lawson THE COURT: Let's go. There was a lot of stuff that 8 system foundation: is that correct? 9 that could have been excised from that. 10 A That's correct. MR. ROBERTSON: I tried to limit it, Your Honor, but 10 Q Now, there's been a lot of discussion about these vendor 11 both parties get to cross-designate, so... 12 catalogs. A customer can import a vendor catalog into the item 12 THE COURT: 611 is in effect in full force. master of the Lawson system; isn't that right? 13 13 A They can go basically through a three-step process, yes. 14 DALE CHRISTOPHERSON. Q And you are aware also of this UNSPSC we've been talking 15 a witness, called by the plaintiff, having been first duly 15 about? 16 16 sworn, testified as follows: 17 A I certainly am. 17 18 Q So isn't it true that you can use the UNSPSC to find items MR. ROBERTSON: May I proceed, Your Honor? 18 from different vendors that were all cross-referenced using the 19 THE COURT: Please. 19 same product category? 20 21 A Let me think about what you are really saying there. DIRECT EXAMINATION 21 22 Could you restate that? BY MR. ROBERTSON: 22 Q Sure. Isn't it true that a user of the Lawson system that 23 Q Will you state your full name for the record, sir? 23 has this UNSPSC capability can find items from different Dale Arnold Christopherson. Q And you are currently the director of development at vendors that were all cross-referenced to the same product 25 1155 1157 Lawson Software; correct? category? 1 A That's correct That's correct, yes Q Then in your role as the director of development, you have Q The shopping cart in Lawson requisition self-service can responsibilities for these software modules that we've been be dynamically built from results of conducting searches in the talking about, Lawson requisition self-service, Lawson item master; isn't that right? procurement punchout, Lawson purchase order, Lawson A That is correct 6 requisitions, Lawson inventory control, and Lawson EDI; Q And it's also true that the shopping cart can also be dynamically built using the results of searches in the vendor punchout catalogs; right? 9 A Those are some of the many that I do have under my 10 A That is also correct. Q You are familiar also with the Lawson system foundation; 11 Q And when the user clicks a checkout in the items in your 11 is that right? shopping cart, they are moved into the requisition system, and 12 12 A Depends on how deep you want to go into it, but, yes, I am 13 an actual requisition is created; isn't that right? 13 familiar with it at some length A I would actually define that slightly different. 15 Q You were asked in your deposition whether Lawson system 15 Q All right. Do you recall giving a deposition in this 16 foundation is a technology layer that sits below these current 16 applications we've been talking about. Do you recall that? A I certainly do. 17 A I certainly do. Q And you were under oath? 18 18 19 Q You said it was? 19 A Yes, it was and still is, 20 I believe you have your deposition transcript. It should 20 Q And so isn't it true now that all customers of Lawson are 21 be in the first volume. 21 required to license the Lawson system foundation in order to 22 use the current version of the Lawson applications? 23 Could you go to page 77? Excuse me. I misspoke. 177. A That's correct. 24 Α 177? 24 Q And in this procurement version nine plus, any version Yes, sir

A Okav. I'm not there vet. multi-vendor catalog capability is a punchout trading partner 1 2 Q Okay, take your time. of Lawson; correct? A Okay, 177. A That's correct. They are on the list, yes. Q Starting at about line 18? Q It's an accurate statement to say that if Lawson could not A Starting with question, and then on the right-hand screen? market a requisition module, it could not effectively compete Q Let me read the question for you. in the supply chain management product market? 6 Question: And then on the right-hand screen in the card, I would say that that would be an accurate statement, yes. 8 here you have four items that have been included in your It's also accurate to say if Lawson could not offer a 9 shopping cart. What happens to that when you click checkout? purchase order module, Lawson could not effectively compete in 10 Your answer: When you click checkout, then it would move 10 the supply chain management product market? 11 that information into the requisition system and actually That would also be correct. create a requisition. 12 You've heard a lot of talk about the implementation and 12 Did you give that answer to that question at that time? installation services that Lawson offers. I just want to be 13 13 clear that Lawson will provide implementation services to Q Okay. Thank you. Once a requisition is approved, the 15 assist its customers with importing vendor catalog data into 15 requisition is released and then transferred to the purchase 16 the item master. 16 17 order system; correct? A I didn't hear a question in that, sir. 18 A That's correct, after it's been approved. 18 Q Let me restate it then. Perhaps I misspoke. Is it true that Lawson provides implementation services to assist its Q Talking just now about procurement punchout, when users 19 19 20 have filled their shopping carts, virtually speaking, and customers with importing vendor catalog data into the item 21 checked out from the vendor website using the Lawson 21 procurement punchout, the chosen items and their prices are 22 If the customer so chooses and wants that service, ves. we 22 23 23 returned to the Lawson server and a requisition is created using the Lawson requisition self-service application; correct? 24 Q So for most situations where a customer licenses the A Can you state that again? The second half of it basically supply chain management suite or the procurement modules we've 25

1159

is where I lost you. A you check out at the customer, not the 1

customer but the vendor site and then it was at that point

3 where I got lost

Q Let me start over. Let's hear the whole question. When

users have filled their shopping carts, virtually speaking, and

checked out from the vendor website using Lawson procurement 6

punchout, the chosen items and their price are then returned to

8 the Lawson server, and a requisition is created using the

Lawson requisition self-service application; correct? 9

10

Q Isn't it true that the current version of the Lawson 11

procurement punchout includes the capability to punch out to 12

multi-vendor catalogs? 13

A That's correct.

15 Q One of those examples of a site that you can go that is a

16 multi-catalog vendor -- excuse me, multi-vendor catalog, is

SciQuest; correct? 17

18 A That's correct.

19 Q Another example of a multi-vendor catalog site that's

available for the punchout procurement is an organization known 20

as GHX: correct? 21

22 A That is correct

23 Q That stands for Global Healthcare Exchange?

A That's correct. 24

Q And Global Healthcare Exchange that provides this

been talking about in supply chain management, Lawson

professional services is going to provide the actual

installation and implementation services for that system; 3

correct?

That's correct, yes.

All existing Lawson customers today are under maintenance

contracts with Lawson; correct?

Q So all of the supply chain -- excuse me. All of the

10 supply -- let me restate that. All of the S3 procurement

products that are under contract today with Lawson customers,

they have maintenance contracts; is that right? 12

13 A Could you restate that?

Yeah. I'm sorry. It was a bad question. With respect to

15 the Lawson S3 procurement product that's at issue here, any

customer that has that product is under an existing maintenance

17 contract?

18 A That's correct.

19 Q There's been a lot of talk about this RFP process, and I

don't want to go through it again in detail, certainly, but

there is a standard set of answers for those common questions 21

that customers have about the S3 procurement product; correct?

23 A That is correct, ves.

I think if you'll look in your book to Exhibit 117. 24

A Okay.

1186

- 1 truly apologize, and maybe you'll get another judge to handle
- 2 the rest of the case.
- 3 MR. McDONALD: I'm not sure I picked up all that --
- 4 THE COURT: I'm asking if you said something and I
- 5 forgot what it was, because I actually don't remember you
- 6 saying anything.
- 7 MR. McDONALD: You didn't miss a thing. We haven't
- 8 formulated our position, Your Honor. I have a couple concerns,
- 9 though, I can flag and maybe give --
- 10 THE COURT: That would be helpful to talk about it.
- 11 MR. McDONALD: Well, this language about "by a
- 12 vendor" means at some point in time. I think the "by a vendor"
- 13 for one thing was pretty much agreed to at the Markman hearing,
- 14 what it did mean, and do inject the concept in time, of time
- 15 into a phrase like "by a vendor" could create some confusion, I
- 16 think, do more harm than good, actually. We would probably
- 17 object to that, but I haven't finalized my position.
- 18 THE COURT: But I think it's quite clear from the
- 19 specification that it's an antecedent event to the use of the
- 20 invention no matter how you cut it.
- 21 MR. McDONALD: I just think --
- 22 THE COURT: I understand what you are saying. Think
- 23 about it and see what you --
- 24 MR. McDONALD: The other concern I have is anything
- 25 we do with that, because our experts who have given opinions

1187

- relating to claim construction, I'm concerned that if we now
- 2 move the ball on what the claims mean, what is the implication

- 3 of that for the testimony that's already been given, the
- 4 testimony that's yet to come that the Court repeatedly says has
- to be limited to what's in the expert reports, there were prior
- 6 decisions by the Court relating to prior art exclusions and
- 7 things like that. I think there's many implications of making
- 8 any changes here, so I'm concerned about that.
- 9 THE COURT: I think -- I'm not sure there are a
- 10 lot -- that is not a claim construction answer. That's an
- 11 instruction, and the fact of the matter is that it is not at
- 12 all unusual for Courts to give revised claim constructions
- 13 during the trial.
- 14 In fact, for a good while, it was common to give the
- 15 claim construction only as part of the instructions. Now, I've
- 16 never done that just because I didn't want to put myself
- 17 through that agony, but that's what happens sometimes, and in
- 18 that event, experts have to take their positions -- take out
- 19 their position and see what happens. So we'll see.
- 20 MR. McDONALD: In this case, the experts were allowed
- 21 to give their reports after the Court's Markman ruling, so I
- 22 think that really changes the dynamic.
- 23 THE COURT: Okay. Anything else? Thank you. We'll
- 24 see you all tomorrow at nine o'clock.
- 25 (Court adjourned.)

1 A In general, sure. It's a remote computer

- 2 Q Using this demonstrative, would you explain the source
- code architecture of Lawson's system and the components you've
- illustrated in your demonstrative?
- A Yes. The portion on the left labeled client is, contains
- components that run in the user's web browser. Some items 6
- labeled there are JavaScript which I mentioned earlier is a
- 8 programming language that executes within the browser. HTML
- 9 are the actual pages that display the information.
- 10 The right portion on the right labeled service side are
- 11 the components that run on the server. There is a Java -- box
- labeled Java web application. That's essentially a web server 12
- that feeds the data to the web browser. 13
- Below that, the area labeled Lawson transaction manager
- and Lawson 4GL COBOL comprise what I would call the business 15
- logic of the application and contains the Lawson 4GL COBOL 16
- 17 code. The transaction manager and supporting features are also
- 18 -- my understanding is they are termed by Lawson as Lawson
- system foundation. So it's sort of the back end portion of 19
- 20

1

- 21 There's the database indicated there which contains the
- data for the application, and the final box up on the right 22
- labeled MCI is just an alternate mechanism for the Java
- 24 components to talk to the database.
- Q Now, you discussed in your demonstrative that there are 25

- a container of sorts that holds that code, determines what's
- running at what time, and moves the data into and out of it.
- It's required to run those applications.
- Q Could you describe at a high level what the functionality
- is with respect to the Lawson transaction manager?
- A Yes. The Lawson transaction manager would be the key
- component there that actually runs the COBOL programs for the
- requisition, inventory control, and purchase order
- applications
- 10 Q And how does the Lawson transaction manager execute the
- 4GL applications, or what does it do?
- Well, so as I tried to describe, it determines which 12
- programs are running at what time. It moves data into and out 13
- of the associated working storage structures, and it collects
- the results. It may also intermediate access to the database,
- 16 provide access to the database.
- Q And you talked about this DB thin API. First of all, what
- 18 is an API?
- A The term API, the acronym API stands for application 19
- programmer interface, and it is just a collection of functions
- 21 or utilities, features which can be used by the programmer.
- 22 Q And what do you mean by the term DB thin?
- In this case, it is a database API which just means it's a 23
- 24 collection of features that allow the Java code to talk to the
- database. The term thin to me implies that is it a streamlined

1233

- both Lawson web-based applications and Lawson 4GL applications
- within the Lawson system. Could you describe at a high level
- the kinds of functionality that are implemented in the system 3
- using the 4GL application?
- Yes, the Lawson 4GL COBOL code implements the feature of
- the S3 system including requisition, inventory control, and 6
- purchase order.
- 8 Q Could you describe at a high level the functionality
- implemented in the system using the web-based applications? 9
- 10 A The web-based components including the Java web, or Java
- application server and the components that run the browser 11
- together comprise a web-based interface to that Lawson 4GL 12
- functionality. They are sort of an overlay or an add-on that 13
- provides that browser-based access to those components.
- 15 Q What are some examples of the Lawson web-based
- 16 applications that you studied?
- A I believe Lawson calls the system the requisition 17
- self-service component, and I believe they also called it --18
- 19 refer to their punchout component as a web-based component.
- Q Now, you also mentioned this Lawson system foundation. 20
- Could you briefly explain why the Lawson system foundation is 21
- 22 important to the functioning of the Lawson system?
- 23 A Yes. So the Lawson system foundation, inasmuch as it
- contains the transaction manager, is responsible for running 24
- the Lawson 4GL COBOL programs. It is a runtime environment or

or otherwise not complex mechanism. It's a delegating

- mechanism that delegates to another layer
- What do you mean by delegate?
- So it's sort of a thin wrapper around some more
- complicated functionality. It passes off requests to another
- laver for additional processing.
- Q Now, you've shown in your demonstrative that the system
- has a database associated with it. Have you prepared another
- demonstrative to help you explain the database that's used by
- 10 the system?
- 11 A Yes, I have
- MS. ALBERT: Mike, if we could, could we have slide 12
- 13 number 85, please.
- Q Is this a demonstrative that you prepared to illustrate
- 15 the database?
- 17 Q Could you describe at a high level the nature of the
- 18 database?
- 19 A Yes. So it is what's known as a relational database.
- Lawson refers to this database as the item master database. 20
- 21 The database contains numerous tables. Tables within a
- database, you can roughly analogize to files in a filing
- cabinet. They may contain different types of information. There are a number of actual tables from the Lawson item 24
- master database illustrated here. The one that I'll mention, a

1235

1	key table is the	ITEMMAST	table on the	left of this diagram

- 2 which contains information about items that can be
- 3 requisitioned within the system, and from -- another table that
- 4 I'll point out is the POITEMVEN which contains vendor
- 5 information pertaining to specific items within the ITEMMAST
- 6 table.
- 7 Q You mentioned this term relational database. What is a
- 8 relational database?
- 9 A The term relational just means that a piece of data within
- 10 the database can refer to or point to another piece of data in
- 11 various ways.
- 12 Q Would you explain the difference between when you say the
- 13 item master database and when you are referring to this item
- 14 master or ITEMMAST table?
- 15 A Yes. So the ITEMMAST table is a specific table within the
- 16 database. More generally, Lawson documentation refers to the
- 17 database as a whole or collectively as the item master
- 18 database, presumably drawing its name from that key table.
- 19 THE COURT: The ITEMMAST table has what in it?
- 20 THE WITNESS: It consequence /TAEUPBS information
- 21 about items which can be requisitioned.
- 22 Q What are some of the types of information about the items
- 23 that are contained in that table?
- 24 A It contains an item number for the item, a textual
- 25 description of the item, and other information about the item.

- 1 inventory control systems.
- 2 Q And is that a more -- can you say whether or not that's a
- 3 more user-friendly interface?
- 4 A Certainly, yes. It's the main reason for adding a
- 5 web-based interface to an application, is to provide increased
- 6 or ease of use and flexibility.
- 7 Q Could you explain from a source code perspective what
- 8 Lawson's procurement punchout application is?
- 9 A Yes. So procurement punchout is a feature of the -- which
- 10 runs in the context of the requisition self-service application
- 11 that allows a user to connect to a remote Lawson partner vendor
- 12 site, perform -- well, it communicates with the site.
- 13 The Lawson system communicates with the site over a secure
- 14 communications channel, performs a handshake using a protocol
- 15 known at cXML is which is a business standard for this type of
- 16 communication. It allows the user to perform certain shopping
- 17 operations on the partner site, the vendor site, and ultimately
- 18 to have those shopping results returned to the Lawson system
- 19 for incorporation into their shopping cart.
- Q I'd like to turn now to the category search functionality
- 21 that you studied. Does the source code of Lawson system
- 22 implement functionality that allows a user to search for items
- 23 by category?
- 24 A Yes, it does. There is an option from the find/shop menu,
- 25 the requisition self-service that brings up a category search

- 1 Q Now, you have a few other tables illustrated on your
- demonstrative. Could you provide us with a high level
- 3 description of the purpose of the table that's listed R-E-Q
- 4 header or REQHEADER?
- 5 A Yes. The abbreviation R-E-Q is short for requisition, so
- 6 this is the requisition header table, and it is involved in
- 7 both shopping cart and requisition functionality.
- 8 Q And then you have another table that is referred to as P-O
- 9 inter F-A-C, POINTERFAC. What is the purpose behind that
- 10 table?
- 11 A The POINTERFAC table is involved in making requisitions
- 12 available to the purchase order system. It's kind of an
- 13 intermediator.
- 14 Q And I believe you talked about the POITEMVEN table. You
- 15 have another table shown that's labeled KWDDETAIL. Can you
- 16 explain at a high level the purpose of that table?
- 17 A Yes. Here the acronym, the abbreviation KWD stands for
- 18 keyword, so it would be keyword detail table, and it is an
- 19 index used in keyword searches.
- 20 Q Now, we referenced this requisition self-service
- 21 application earlier. Can you explain to the jury from a source
- 22 code perspective what the requisition self-service application
- 23 is?
- 24 A Yes. So, it is a -- as I described, it is a web-based
- 25 interface to the Lawson purchase order, requisition, and

1 screen.

1237

- 2 Q What, if any, database tables does the source code use to
- 3 conduct this category search functionality?
- 4 A There are two. One is called IC item code, ICITEMCODE,
- 5 and the other is the previously mentioned ITEMMAST table.
- 6 Q Do both of those tables belong to that same item master
- 7 database that you described earlier?
- 8 A Yes, they do.
- 9 Q What information is contained within that ICITEMCODE table
- 10 that would be relevant to searching by category?
- 11 A The ICITEMCODE table contains the textual description of
- 12 the levels of the UNSPSC hierarchy and the corresponding codes
- 13 that are assigned to those levels.
- 14 Q And what information does the item master table store that
- 15 is relevant to searching by category?
- 16 A The item master table contains -- in addition to the item
- 17 descriptions, contains the corresponding UNSPSC codes
- 18 indicating where they belonged in that hierarchy.
- 19 Q When the category selection is chosen by a user from that
- 20 find/shop menu, what is the first thing that happens in the
- 21 source code?
- 2 A When a user chooses to bring up a category search screen,
- 23 a request is made from the user's web browser to the back end
- 24 of the Lawson system. Specifically Lawson calls this kind of
- 25 request a data request, and it is -- it is handled by the --

passed from the Java code to the -- using the DB thin API that 1

2 I mentioned previously and results in a search of the

ICITEMCODE table for the top levels of the UNSPSC hierarchy.

Those top level initial part of the drill-down are

returned to the -- formatted as XML and returned to the

client's web browser where it's presented to the user to make

their initial choice.

Q After the system retrieves these top level categories from

the database, would you explain what happens in the source code

10 as the user navigates the available hierarchy of categories?

11 A Yes. So the process is very similar to that of retrieving

those initial top level categories with the exception that as 12

the user chooses levels in the browser, the corresponding 13

UNSPSC codes are conveved with the request to the back end

system, and the ICITEMCODE table is searched to find the

corresponding levels, the children or the child levels 16

17 underneath the selected level. That information is returned

and then formatted for the user. In this fashion they can 18

drill down, expanding from the parent to the child. 19

20 Q When the user finds his desired category --

21 THE COURT: Excuse me. The parent is the larger and

the child just means the more specific; is that right? 22

THE WITNESS: Yes. If you imagine like a family

24 tree, there is a parent, and the children kind of branch out

and grandchildren branch out from there. That's what I meant 25

which allows the user to limit the search, the scope of the

search to Lawson certain origin fields and optionally provide

what it's called an exclusion term

Q What do you mean by an origin field?

A It determines where in the information associated with an

item the term was located. So there are multiple tables which

can relate to a given item within the ITEMMAST table, and

different textual and numeric information may be found in those

tables. They named those different locations as origin fields.

and the user can limit the search if they wish. 10

Can you give us an example of an origin field?

12 Well, so the primary description within the ITEMMAST

table, there's a field for the description, is the particular 13

origin field. There is also a vendor description in the

15 POITEMVEN table. That is another example of an origin field.

Q Have you prepared a demonstrative to help explain how the 16

keyword search functionality is implemented in the source code?

18 A Yes, I have

MS. ALBERT: Mike, could we have slide 24, please. 19

20 Q Is this the demonstrative that you prepared?

21 A Yes it is

22 What, if any, database tables are involved in this keyword

23 search functionality?

24 A Well, there are seven depicted here, but the four that I

would describe as first are the keyword tables at the bottom.

1241

These are prefixed with the KWD abbreviation, and they are

keyword synonym, keyword master, keyword detail, and keyword

setup. These tables comprise an index of the available search

terms, and then there are three tables above, ITEMMAST which I

previously mentioned, POITEMVEN, and a table called ITEMLOC,

I-T-E-M-L-O-C, are used after the search is performed to

retrieve the item information.

Q And do all of these tables belong to that item master

database that you illustrated earlier?

10 A Yes, they do.

11 Q What data is contained or what is the keyword detail

12 table?

13 A Keyword detail table is the key index of search terms, and

it relates a specific search term which has been found to the

15 origin field in which it was located and the item number of the

item in which it was found.

Q And what types of data is contained in that table? 17

A Well, as I said, there's an item number, a keyword, and an 18

19 origin field

20 Q Would you please explain briefly how the functionality to

build the keyword detail table is implemented in the source 21

22

23 A So my understanding is when the system is set up

initially, users determine which origin fields are to be 24

enabled for search, and the terms are gathered from the data

in terms of that hierarchy 1

23

Q Once the user finds his desired category and chooses to

view the items that belong to that category, will you explain

what happens in the source code to cause the items that belong

to that category to be displayed?

A Yes. So when the user selects the items link, the UNSPSC 6

codes for that particular level of the hierarchy are packaged

8 up as part of a request. In this case, it is what's known as a

9 transaction request. It's passed from the user's browser to

10 the back end, the server component of the Lawson system.

This results in a Lawson 4GL COBOL program called RQIB being executed which searches the ITEMMAST table for items 12

which have the corresponding UNSPSC codes. The resulting item 13

information is then formatted as XML and returned to the

15 client's web browser where it is formatted as a search result

16

24

11

Q Now, Mr. Niemeyer, I'd like to turn to the keyword search 17

functionality in the Lawson system that you studied. Does the 18

19 source code of Lawson system implement functionality that

allows a user to search by a keyword? 20

A Yes. The user may choose search catalog option from the 21

22 find/shop menu of the requisition self-service application

23 which brings up a keyword search screen with a field in which

the user can enter one or more search terms. That screen has

some additional functionality, advanced search functionality

and placed into the keyword detail table. For each item, there 1

- is a corresponding keyword and an origin field.
- Q And what database tables are indexed by the keyword detail
- A My understanding is that at minimum, the ITEMMAST.
- POITEMVEN, and ITEMLOC tables. 6
- Q In the context of this source code, what is the purpose of
- having an index like the keyword detail table?
- A It's common practice to create an index to -- an
- 10 optimization to increase the speed of the search and to
- eliminate to need to search the whole collection of data when
- you can condense it to an index that you can search more 12
- 13
- Q Can you explain how the item vendor table or the POITEMVEN
- table is used in the implementation of a keyword search in the 15
- source code? 16
- A After the search is performed against the keyword tables
- and item information is being retrieved, corresponding vendor 18
- information for the items is retrieved from the POITEMVEN 19
- 20
- 21 O Do the records in the item vendor or POITEMVEN table link
- in any way to the records in the item master or ITEMMAST table? 22
- A Yes, they do. They contain a field which holds the item
- number for a given item in the ITEMMAST table.
- Q Have you prepared a demonstrative to help you explain how 25

- browser and hits the search button, the search term is conveyed
- as part of a request to the server side components which causes
- the Lawson 4GL COBOL program called RQIC to be executed. The
- RQIC program ultimately performs a search of the keyword detail
- table for occurrences of that term that have been previously
- 6
- Any matching records from the keyword detail table are
- then used to find the corresponding items in the ITEMMAST table
- and data gets gathered from the PO and ITEMLOC tables. All of
- those results are formatted as XML and ultimately returned to
- the item web browser and formatted as a search word
- 12 Q When the search code searches the keyword tables to locate
- 13 the keywords that the user typed in, does the source code
- search the item master table at all?
- 15 A No, it does not. It only searches the keyword detail
- 16 table and the associated keyword tables.
- Q Now, I'd like to turn to the functionality for the adding
- 18 items to a shopping cart and building a requisition. Does the
- 19 source code of the Lawson system implement functionality that
- allows a user to select desired items for requisition from a
- 21 list of results returned from either this category or keyword
- 22 search that you discussed?
- 23 A Yes, it implements a shopping cart functionality whereby
- 24 the user can indicate that an item from a search result should
- be added to the shopping cart. Items can be added and removed

1245 1247

- the information in these two tables can be related? 1
- MS_ALBERT: Mike can we have slide 68_please.
- Q Is this the demonstrative that you prepared?

- Q Now, using your demonstrative, would vou please explain 6
- how records in the item vendor or POITEMVEN table can be
- related to records in the item master table or ITEMMAST table? A Yes. So within the ITEMMAST table, or the item master
- 10
- table, there is a field called ITITEM which holds the item
- number for that item. That item number uniquely identifies the item within the ITEMMAST table 12
- 13 The PO item vendor table then can -- given record within
- that table can refer to an item within the ITEMMAST table using
- 15 that unique number. It's what's known as a key field in the
- ITEMMAST table. Within the POITEMVEN table, there's a field
- called PIV item which holds that number, and, therefore, if you 17
- want to, for a given item in the POITEMVEN table, you can point 18
- 19 back to a specific unique item within the ITEMMAST.
- 20 MS. ALBERT: Mike, could we go back to slide 24,
- 21 please.
- Q Now, going back to your demonstrative on keyword search
- query execution, can you explain how the keyword search
- functionality is implemented in the Lawson system source code? 24
- A Yes. So after the user enters a search term in the

- until checkout operation is performed. Similar to the way you
- shop on Amazon or another web business
- Q Now, what, if any, database tables are involved in this
- shopping cart functionality?
- There are three. Two of them are prefixed with the term
- REQ. One is called REQHEADER and the other is called REQLINE.
- The third is called PO interface which we mentioned before
- Q And what information is stored in that REQLINE table
- that's relevant to the shopping cart functionality?
- A The REQLINE table holds the individual line items
- representing items that were selected to be added to the 12
- 13
- Q Does this REQLINE table also contain a status field?
- 15 A Yes it does In addition to the item information it
- contains a status which can indicate that the item is either --
- while in the shopping cart, it's in a state called unreleased.
- 18 Q What does that mean?
- 19 A It means that it is part of a shopping cart and not yet
- Q And is there another status that can be indicated in this 21
- status field in addition to the unreleased status that you
- 23 mentioned?
- A Yes. So I'd just say both the REQLINE and REQHEADER table 24
- that I mentioned which are involved in this contain a status

that's related to direct infringement. Under direct 1 vendor catalog, not Lawson. 2 Likewise, Dr. Weaver never asserted Lawson practiced infringement, one party has to actively engage in every single 3 the step of determining whether a selected matching item is step or method claim. If, however, a party has an agency available in inventory; instead, merely opining in a conclusory relationship with another, in certain limited circumstances. 5 fashion that punchout allows the step to happen while admitting the Court has allowed that to be a direct infringement. that Lawson did not have any idea what was available in the 6 For indirect infringement to occur, there must be at 6 inventory of the third-party vendors, and with respect to least one direct infringer. That is to say that someone must 8 searching for matching items, ePlus argues a user searches on a be practicing the steps. 9 vendor's website using a vendor search engine, which, again, is THE COURT: Are you saying joint infringement doesn't apply to indirect infringement? 10 a step that Lawson does not practice. 10 11 The systems claims are likewise deficient. Claim MS. HUGHEY: In theory you could have two parties three of the '683 patent and claims one, two, six, nine, 21, 12 engaging in joint infringement and a third party guilty of --12 THE COURT: But on this record, is there any theory 22, and 29 of the '516 patent all require multiple catalogs. 13 13 14 Dr. Weaver opined that these claims were infringed by the 14 of joint infringement that exists as to indirect infringement? punchout product because punchout allows users to have access 15 Any basis any jury could find that? 15 16 MS. HUGHEY: I don't believe so. Your Honor, no. to external vender catalogs, not Lawson catalogs 16 17 Claim one of '172 patent is also a system claim which 17 THE COURT: Why? 18 requires a database containing data relating to items 18 MS. HUGHEY: On this record, there's no -- on this record, ePlus could not prove joint infringement because it associated with at least two vendors maintained so that 19 19 20 selected portions of the database may be searched separately 20 hasn't demonstrated that there is an agency relationship 21 Dr. Weaver opined that this limitation was met by the separate 21 between Lawson and any third party. databases of the external punchout site, but there is no 22 THE COURT: I thought you said, though, that that 22 made it direct infringement. 23 dispute that Lawson has not maintained separate databases of 23 the external punchout sites. Those external vendor catalogs 24 MS. HUGHEY: That's right. Joint infringement is 24 are maintained by the vendor. 25 direct infringement. 25

1365 1367

1 THE COURT: I understand, but I also asked you,

because some of the instructions you all tendered suggested

ePlus cannot rely on the doctrine of joint 1 infringement to resolve the issue of direct infringement as it 3 has failed to show that Lawson has the required control over the third parties or that Lawson performs the remaining steps. In a situation in which more than one party is 5 required to perform the steps of a claimed method, there is no 6 infringement unless one party exercises control or direction 8 over the entire process such that every step is attributable to 9 the controlling party 10 The same requirement for direction and control applies to the system claims as well. Lawson does not exercise 11 control or direction over any third party, suppliers, vendors, 12 13 distributors, manufacturers, or others who sell items to Lawson's customers. Likewise, Lawson exercises no control over 15 its customers. Lawson does not have an agency relationship 16 with any party that performs any of the remaining steps from 17 the system or method claims. 18 While Lawson may reach an agreement with certain 19 vendors to allow them to provide services to its clients --20 THE COURT: What's the difference, Ms. Hughey, between joint infringement and induced infringement in this 21 22 case on this record? I know conceptually what the difference 23 is, but is there really any difference in this case between

MS. HUGHEY: With respect to joint infringement,

3 that joint infringement an application in the indirect infringement context. Are you contending that or not? 5 MS. HUGHEY: I don't believe that we're contending that the joint infringement is the same thing as indirect infringement or that it has applicability to indirect infringement. It's possible that --THE COURT: So the joint infringement doesn't -- do 9 10 you understand it doesn't even apply to indirect infringement? 11 MS. HUGHEY: I think it could apply to indirect --12 THE COURT: On the facts of this case. 13 MS. HUGHEY: Correct, Your Honor. Correct. As I was saying, Lawson does not control that vendor or contractually 15 obligate them to do anything. Likewise, Lawson does not have control over what its customers do, as they act for their own benefit and under their own control. Because there is no 17 18 single direct infringer, there can be no indirect infringement 19 20 THE COURT: All right. 21 MS. HUGHEY: I have two more points. Your Honor. Unless you have a question? With respect to the unaccused 23 systems, Lawson has provided no basis for a reasonable jury to

find for ePlus with respect to certain unaccused systems.

THE COURT: If it's not accused, what do I care? I

24

25

those two?

24

theoretically can that be the case, absolutely. Do you want me 1 don't need to rule on an unaccused system. 2 MS. HUGHEY: They were potentially accused in the give you a scenario in the facts of this case in which it could 3 pretrial order, but then during trial, it became clear they be occurring, I'm happy to do so. THE COURT: What is your theory? Are you pressing were no longer accused. I am not sure ePlus would actually 4 5 oppose this part of the motion. joint infringement in the indirect infringement context? If 6 THE COURT: What are you talking about, unaccused? you aren't, I don't need to hear anything further about it, and Looking for the approvals on the purchasing agent? since it's such a rare animal, even if it's not in the extant 7 MS. HUGHEY: I'm sorry, Your Honor. Certain systems one or ever was, just fish or cut bait. 9 -- I think you remember that Dr. Weaver accused five systems of MR. ROBERTSON: Your Honor, this joint infringement infringing, and then he went through claim by claim, but he did position is a defense that Lawson is taking because they are 10 10 11 not accuse every system of accusing every claim. arguing that they don't have control or direction over their 12 THE COURT: You don't need judgment on any system 12 punchout partners. Now, I think we marshalled the substantial that they don't have any evidence on. Is there anything else? evidence that showed that is not the case, but how could an 13 13 14 MS. HUGHEY: One final thing. I don't believe that indirect or induced infringement scenario -ePlus is asserting the doctrine of equivalents infringement, 15 THE COURT: They don't direct claims like that. Do 15 but I'd like to make a record here that we move for judgment as 16 you claim there is a joint infringement under the indirect 16 17 a matter of law to the extent that they would suggest infringement case you are presenting? I think that you don't. 18 otherwise 18 I think they, in fact, then -- they may say, well, even if its MR. ROBERTSON: We will stipulate we haven't made the 19 19 joint infringement, you are saving we don't have control, but 20 doctrine of equivalents argument with respect to the in the first instance it's you who presses the point, so do you 21 infringement 21 or do you not have a joint infringement claim under your theory MS. HUGHEY: That's all I have. Your Honor. We'd be 22 of indirect infringement, or are you going to give it a mercy 22 23 killing? 23 willing to brief any of these issues further. THE COURT: Thank you. 24 MR. ROBERTSON: Your Honor, I don't want to give it a 24 25 MR. ROBERTSON: Thank you, Your Honor. I'm sure you 25 mercy killing because it shouldn't be killed, and let me 1369 1371 can appreciate that just like Your Honor, I've heard those explain why that's the case. Let me give you a scenario with 1 arguments for the first time right now, so let me see if I can where there can be an induced infringement in a joint try and track them for you and answer any questions you might 3 infringement -- direct infringement case. You have -specifically have. THE COURT: Huh-uh. I didn't ask about direct. We think we brought forth ample evidence of both MR. ROBERTSON: Yes, we are pressing an indirect 5 infringement that could involve joint infringement, direct 6 direct infringement and induced infringement --6 THE COURT: Do you take the view that joint infringement 8 infringement applies in the indirect infringement claim? 8 THE COURT: What is that? MR. ROBERTSON: I think there can be a joint MR. ROBERTSON: What is it? 9 10 infringement scenario in which Lawson aids, assists, abets, 10 THE COURT: Yes. encourages their customers to indirectly -- to induce 11 MR. ROBERTSON: It is inducing someone, perhaps more 11 than one party, to actually commit the direct infringement. infringement, and that would be a situation, Your Honor, for 12 12 13 example, if Your Honor concludes --13 THE COURT: Why isn't that induced infringement? 14 THE COURT: What is the difference between that and 14 MR. ROBERTSON: It is --THE COURT: -- under indirect infringement, and why 15 contributory infringement then? I think it's very confusing to 15 16 the jury to have this joint infringement issue in the case in 16 isn't it then joint infringement under direct infringement? the indirect infringement issue, and I don't even understand 17 MR. ROBERTSON: I agree with Ms. Hughey that joint 17 infringement is a direct infringement theory. 18 how it would apply on the facts of the case anyway. 18 19 But forget about the facts of the case. Is there any 19 THE COURT: That's all I'm asking you. 20 case that holds joint infringement applies in indirect 20 MR. ROBERTSON: Okay. Then I'm sorry. I infringement charges? 21 misapprehended Your Honor's question, but Ms. Hughev and I 21 22 MR. ROBERTSON: I haven't seen one specifically, Your 22 agree joint infringement is direct infringement. 23 Honor 23 THE COURT: The instructions that both of you THE COURT: I haven't either. Never heard of it tendered did not distinguish, and some of the arguments that 24 24 25 MR. ROBERTSON: But, you know, if you want to ask me were being made suggested to me that you were pressing a theory

2011.01.12 Trial Transcript Day 6 1/12/2011 3:47:00 PM demonstration that Dr. Weaver did a punchout, to go out and get 1 of which I was unaware, and now that we've gotten that 2 straight, what's the joint infringement theory under the direct the data and retrieve it, it still was branded with Lawson. infringement claims? In this case on this record. You were framed within a Lawson website, and as Dr. Weaver 4 MR. ROBERTSON: Well, joint infringement sometimes is said, you never left. 5 called divided infringement when a defendant wants to say that 5 So you can't even do the punchout process without the 6 they are not directly controlling the actions of another, and 6 Lawson software. That's the first step. And then once you do the way I understood Ms. Hughey's argument to be is they say, do it, you are there, and you are retrieving the data, and you 7 8 we really don't know what these punchout trading partners are are putting it in your requisition, and you are building your 9 doing that we have. Once you go to their website, it's all up purchase order just as the claims described. 10 to them. So the evidence turns on whether or not there's 10 So that, Your Honor, I think is the only scenario in 11 direction and control with respect to what's been proffered so which I would think the joint infringement could arise at all 12 far before the Court. 12 if you even needed to go there, and I think in our papers we THE COURT: Direction and control of whom? would argue first that this is not a situation of joint 13 13 14 MR. ROBERTSON: The third party punchout partners. infringement, but even if it were, that it's been satisfied by 15 Your Honor, their trading partners that they either have 15 the evidence that's been presented here. 16 informal agreements with or formal agreements with in which And so how do you induce that direct infringement 16 17 they -- I think one of the intentions of the formal agreements which I think we're in agreement is joint infringement? Lawson 18 is we're going to do this jointly. We're going to make a joint 18 induces it by first providing the functionality in its punchout 19 software to do that. Second, it induces it by providing their 19 effort, combine our products. 20 I asked Mr. Lohkamp, do you do that for the mutual 20 customers with the guides, the implementation, the 21 benefit of both companies. He said absolutely. We heard 21 installation, the services. They provide all of that kind of evidence that the Lawson system controls the punchout process. 22 evidence is evidence that they are abetting and assisting 22 that they provide the protocols. Mr. Lohkamp even called it 23 23 So we think that the facts of this case, particularly 24 the handshake that lets you get there. Dr. Weaver testified 24 Dr. Weaver who went through, you will recall, that eight-step you can't -- you don't even leave the Lawson system, and when protocol you need to do in order to set up this communication 25 1373 1375 you go to the website, there was that special URL that showed links, and no one has ever denied or challenged the fact that 1 you had never left the Lawson system, that you are not at a it's Lawson that sets up this communication protocol and 3 commercial website. You are at a website that has been permits this process to happen, and Mr. Lohkamp even conceded, you can't do it without the punchout procurement software. especially prepared for Lawson's customers using the 5 5 procurement punchout So when you do that, you are inducing the direct infringement by the customers performing those steps of the 6

- The customer has to say to Lawson, we want you to set
- this up. We'll tell you who our punchout partners are. Lawson
- 8 then goes out, they either contract with them, or they make an
- 9 arrangement if the protocols work, and we actually demonstrated
- 10 the punchout process. 11
 - So the argument becomes, boils down to this: Well,
- when you finally punched out, but you never left the Lawson 12
- 13 system, you then can search content provided by the supplier,
- for example. But, of course, that's exactly why the whole
- 15 arrangement was set up, for their joint effort and mutual
- 16
- 17 So we think, quite frankly, Your Honor -- there's a
- 18 recent decision called Akamai that came down from the Federal
- 19 Circuit perhaps two weeks ago, and it was a situation of joint
- 20 infringement, and we think if there were ever a situation that
- joint infringement applied through a factual scenario, it is 21
- 22 this case. This case is the poster child for joint
- 23 infringement because of the relationship that Lawson has with
- 24 its punchout trading partners.
- 25 You will remember, even when we were looking at the

- method claims when they go through and they select catalogs
- which Dr. Weaver showed in his demonstration. They search
- those catalogs, they match items, they build a requisition, and
- 10 they build and generate the purchase order.
 - THE COURT: Thank you.
- MR. ROBERTSON: He showed how to do it both from an 12
- 13 internal catalog database and -- which Lawson can set up in the
 - customer's software, and an external catalog database which is
- 15 the nunchout

11

16

18

21

- THE COURT: Thank you. Is there -- is this record
- 17 now complete on the issue of willful infringement?
 - MR. ROBERTSON: Of what, sir?
- 19 THE COURT: Is the record complete on willful
- 20 infringement?
 - MR. ROBERTSON: I do not believe so. I thought we
- 22 were going to reserve some of those things.
 - THE COURT: What are you going to do and when are you
- 24 aging to do it?
- 25 MR. ROBERTSON: Well, I thought we had bifurcated

willful infringement. I contemplated that Your Honor might THE COURT: Do you have any case that says that? 1 1 2 want to have a short hearing, perhaps a half a day, as to 2 MR. ROBERTSON: Your Honor, I'll have to go and evidence on that 3 check. One of my colleagues reminded me of a case that I have THE COURT: Could we use Monday or Saturday? not actually read and I don't want to represent to the Court. 5 MR. McDONALD: Let me go back and --5 THE COURT: It's a good thing not to argue a case you 6 THE COURT: Do you really have a case of willful 6 haven't read. MR. ROBERTSON: I didn't want to do that. 7 infringement here? 8 MR. ROBERTSON: I think one of the things, Your THE COURT: Unless you want me to decide on the bases 9 Honor -- certainly didn't contemplate that I was going to have 9 of the cases I have read MR. ROBERTSON: No. Your Honor. In fairness, I came 10 to put on evidence in this portion of the case because I agreed 10 11 to bifurcate that, but let me address that specifically. 11 here today to try and prepare to argue this. I was not 12 Number one, Lawson --12 thinking in terms of the representation of the Court what the THE COURT: The point is, if you haven't -- when are willfulness case should be. 13 13 14 you going to put on the evidence of willful infringement, and 14 I think you've heard some evidence that under the basically what is it going to be if it's not already in? The 15 totality of the circumstances, you could consider as being 15 question is, what did you do? Did you decide to put in what 16 evidence that would warrant a conclusion of willful 16 17 you had and let me decide it? We never did decide whether we infringement. I think there would be some additional evidence. 18 were going to have a hearing. I was going to have to decide 18 Right now what comes to mind--19 THE COURT: We'll deal with that later. Thank you. the issue, but we never did decide how we were going to do it 19 MR. ROBERTSON: Do you need to hear any --20 unless my memory fails 20 21 MR. ROBERTSON: Your Honor --21 THE COURT: No, thank you. The motion did not relate 22 THE COURT: Do you have additional evidence on 22 to willfulness, so I'm not going to deal with it. I was just willfulness that isn't in the record at this time? That's all asking you a question while you were standing up there. 23 23 24 MR. ROBERTSON: Thank you. 24 I want to know MR. ROBERTSON: Let me think. I think there's 25 MS. HUGHEY: Your Honor, if I may, with respect to 25 1377 1379 evidence that Lawson had an opinion of counsel that it obtained the issue of joint infringement, ePlus's counsel suggested that 1 early on and refused to turn over that opinion and stood on the it was a defense, and that's not the case. ePlus always has 3 privilege. While there is not an adverse inference the jury the burden of proof on the issue of infringement, and it can pursue that burden of proof either through the direct 4 can draw --5 THE COURT: The jury doesn't draw that. I'm drawing 5 THE COURT: Ms. Hughey, what he said was, he's not 6 it. MR. ROBERTSON: Well, I think if the Court wasn't contending it's joint infringement, you are, saying that if it 8 aware, there was an opinion early on that was given -was any kind of infringement it's joint infringement and you THE COURT: Didn't you all agree I did willfulness? 9 win -- and he wins -- because you haven't any evidence of the 10 Isn't that what you agreed? 10 elements of it, I believe; is that right, Mr. Robertson, or did 11 MR. ROBERTSON: Yes. sir. 11 THE COURT: All right. I wanted to make sure --12 MR. ROBERTSON: My argument, Your Honor, was whether 12 13 MR. ROBERTSON: In addition to the evidence that 13 it's direct infringement just by Lawson committing all the there's been nothing done by Lawson since they've been put on steps or having the system, or whether it's joint infringement, 15 notice of this lawsuit in May 2009, no redesign, no good 15 we win either way 16 faith effort --16 THE COURT: I understand that, but what you said was 17 THE COURT: Mr. Robertson, I'm not asking you to we don't think it's joint infringement, but even if it is, we 17 18 argue. I'm asking do you have any other evidence that you 18 win. The predicate of that sentence is, we don't think it's 19 haven't put on. You tell me about willfulness. You tell me 19 joint infringement, and that's what I am trying to ascertain. that there's an opinion of counsel that they declined to 20 You said it was they who injected that question, the 20 21 21 produce and stood on the privilege. Can the finder of fact defendants injected that issue in, and you don't think it's 22 draw from that an inference of willfulness? 22 joint infringement, but even if it is, you win. Is that your 23 MR. ROBERTSON: I think the finder of fact can 23 position or not? consider that in the totality of the circumstances which is the MR. ROBERTSON: That's our position. Your Honor. 24 24

test for willfulness.

25

THE COURT: Okay, thank you very much. Now you know

		1468			147
1	back to me with "published" first meaning, to issue		1	think generally known was in several of the	
2	(printed or otherwise reproduced textual or graphic		2	dictionaries that you indicated. I think that's more	
3	material) for sale, and (2) to make publicly or		3	appropriate.	
4	generally known. Those are the first two. And then		4	Remember, "published" still has to be read in	
5	there's a third one, to issue newspapers, books, etc		5	context of the patent, and we're talking about	
6	and then fourth is to have one's work published.		6	electronic data here. So when you take electronic	
7	And that's very typical of these other		7	data, and you put it in a vendor catalog database,	
8	definitions.		8	you're not making something publicly known, you're	
9	THE COURT: American Heritage, 4th edition,		9	just taking that data that has been made generally	
10	says, No. 1, To prepare an issue (printed material).		10	known or disclosed by the vendor, and then you're	
11	For public distribution or sale. (2) To bring to the		11	loading it into the database.	
12	public attention, announce.		12	Now, who does that loading or how it's	
13	The Merriam Webster New Edition says, "To		13	modified in any way is not relevant to "generally	
14	make generally known, announce publicly." Second one,		14	known" or "disclose."	
15	"To produce or release literature, information,		15	Publicly now would suddenly become another

So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the	
6 7 8 9 10	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got		5 6 7 8 9	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to	
6 7 8 9 10	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be		5 6 7 8 9 10	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of	
6 7 8 9 10 11 12	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr.		5 6 7 8 9 10 11	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even	
6 7 8 9 10 11 12 13	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word		5 6 7 8 9 10 11 12	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in.	
6 7 8 9 10 11 12 13 14	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that		5 6 7 8 9 10 11 12 13	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we	
6 7 8 9 10 11 12 13 14 15	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort		5 6 7 8 9 10 11 12 13 14	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions	
6 7 8 9 10 11 12 13 14 15 16	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it.		5 6 7 8 9 10 11 12 13 14 15 16	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions	
6 7 8 9 10 11 12 13 14 15 16 17	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated		5 6 7 8 9 10 11 12 13 14 15 16	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog	
6 7 8 9 10 11 12 13 14 15 16 17	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated entirely from it. I think it's very accurate to say		5 6 7 8 9 10 11 12 13 14 15 16 17	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog because the customer of Lawson in the instance where	
6 7 8 9 10 11 12 13 14 15 16 17 18	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated entirely from it. I think it's very accurate to say "published" simply means to make publicly known.		5 6 7 8 9 10 11 12 13 14 15 16 17 18	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog because the customer of Lawson in the instance where it's using a legacy system, for example, has pulled	
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated entirely from it. I think it's very accurate to say "published" simply means to make publicly known. THE COURT: I'll take those dictionaries, and		5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog because the customer of Lawson in the instance where it's using a legacy system, for example, has pulled from a bunch of catalogs things that it put together,	
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated entirely from it. I think it's very accurate to say "published" simply means to make publicly known. THE COURT: I'll take those dictionaries, and I'll give you back yours, but I'll just take all of		5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog because the customer of Lawson in the instance where it's using a legacy system, for example, has pulled from a bunch of catalogs things that it put together, and you flipped it into the system when you into the	
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	THE COURT: I don't think that works, but basically I think the way I've defined "published" catches these, doesn't it? MR. McDONALD: The problem I have, Your Honor, that I don't think it does is when you've got to make generally known, I think that should be publicly to be consistent with these as well as Dr. Weaver and the experts. So I would change the word "generally" to "publicly." And then we've got that phrase "or to disclose," which doesn't have any sort of a public or sale related aspect to it. So I would say that should be eliminated entirely from it. I think it's very accurate to say "published" simply means to make publicly known. THE COURT: I'll take those dictionaries, and I'll give you back yours, but I'll just take all of them and look at them and frame something. I think		5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	here. What if the vendor was the one who had selected the desired items and added the information and deleted the items and modified? Obviously, that would be relevant. So the fact that somebody else does it is also relevant to the converse. And so he's the one that's trying to do the gotcha here and preclude us from even being able to present our case to the jury here by saying none of this evidence that Lawson wants to present is even relevant here. That's where the gotcha is coming in. So Mr. Robertson is the one who keeps saying we shouldn't use these claim constructions THE COURT: Why should this come in into evidence? You want to argue that it's not a catalog because the customer of Lawson in the instance where it's using a legacy system, for example, has pulled from a bunch of catalogs things that it put together, and you flipped it into the system when you into the Lawson system. And somehow that information doesn't	

says. And that's not a fair reading of the patent. 1 1 inconsistent --2 So maybe he's right that none of this comes in, that 2 THE COURT: Everything that your customers to the extent it is relevant, it's only marginally 3 look for is something that a vendor sells because what happens is when they use your system, your customer relevant, and it's too confusing to the jury to have 5 to sort through all of this who put the material into goes to buy it from the vendor who is selling it to 6 the system, the structure that you all have them, and a requisition is made, a purchase order is constructed, that is the Lawson system. made, and it goes to the vendor, and that's a typical 7 MR. McDONALD: But we're talking about the sale, isn't it? It's a sale purchase. That's what it 9 item master as being the thing that's being accused as 9 is. being multiple catalogs. Your Honor, and I think as a 10 10 MR. McDONALD: The point is what's a catalog 11 fact matter, we should be able to show that doesn't and what's not. That's what I'm talking about, and satisfy this definition. The definition starts off by 12 the shopping list is not a catalog. If I come up with 12 talking about an organized collection. That's the a list of requisition items that I want to buy, that's 13 13 noun here. And then it goes on to say that's why it not a catalog. That's not how these patents use that. has to be published by a vendor. And that's very 15 They call them requisitions. They call them purchase 15 consistent with the patent. Any other way is orders. They call them something different from a 16 16 17 catalog. And that's my concern that if we go too fail 18 THE COURT: I'm going to tell you now that 18 on reconstruing the construction, that it's going to 19 vou're not free to argue simply that -- you just 19 lead the jury to --20 argued that the only thing that's covered by the claim 20 THE COURT: You reconstruing the 21 construction is a Sears catalog that is put into the 21 construction, I think. So anyway I think what I'm system. And if that's what your theory is, you lose 22 going to do is instruct the jury. And the guestion 22 And I'm going to find that you lose as a matter of law then is: On what the ordinary meaning is, do you know 23 23 of any case that says the Court can't instruct them on 24 because that isn't what it's all about 24 25 And I think if that's what you're trying to 25 what the ordinary meaning is? 1473 1475 do, then I think the answer is that Rule 403 keeps MR. McDONALD: I'm not sure. We'll have to 1 that whole line of evidence out. If that's what look for that, Your Honor. I'm not an aware of any case at this point. 3 you're thinking, forget it, because it ain't going to 3 happen. If you argue that in front of the jury, I'm THE COURT: I don't know why it wouldn't be going to tell the jury that that isn't permissible and appropriate if there's a dispute about it. And you're I'll sustain a motion to strike it because it never offering Defendant's 371. I assume you did it in good 6 was intended to do that. faith believing that it was appropriate to do that. 8 We may not have done the best job of claim So I think I'm going to give it. I'm going to look at these definitions, if you don't mind loaning me your 9 construction here. I don't know. But in any event, 10 whatever is going to happen is that we're not going to 10 books for the evening. convert this into something that it wasn't and is not 11 Now, the real issue is: Can you ask these 11 reasonably intended. questions? Why is it that this approach as shown in 12 12 13 MR. McDONALD: You have that Markman 13 item information changes, which I think Mr. Robertson transcript, and if you take a look at that, you'll see just read into the record in its entirety in the first 15 that I was definitely talking about the issue that we 15 three blocks. I don't know that you read the last 16 have to have a definition that's consistent with the three -- the last block. It says, "Customer loads new patent and consistent with the ordinary meaning of 17 info into Lawson database." And then it goes to item 17 catalog that will exclude something like a shopping 18 18 location, item master, and vendor item. I think 19 list or a list of products somebody buys instead of 19 that's now the whole thing is in the record. 20 something somebody sells. That was all on the table 20 But what difference does it make about 21 at the Markman. 21 whether the vendor changes the information to the new 22 And if we go too far the other way with the 22 23 definition. Your Honor, I think we start grabbing 23 MR. McDONALD: Because we're showing the things within the catalog definition that would not be distance between when this thing actually was anything 24 24 considered within the ordinary meaning. It would be that even resembles a catalog at the vendor end and

And there's also a case called SEB from the Federal 1 Circuit which has to do with the standard of intent for the inducement infringement, which I understand also includes a reckless disregard for the patent. THE COURT: I want you to give Ms. Haggard 5 6 the citations for those two cases, plus --7 MR. ROBERTSON: Let me be candid with the 8 9 THE COURT: What is it? MR. McDONALD: Akamai. 10 11 THE COURT: Alkamai? 12 MR. ROBERTSON: Alkamai is how it's 13 pronounced. THE COURT: I can't pronounce it. All right. 15 I want you to give her the cites, so I make sure I've read those while I'm working on the instructions. 16 MR. ROBERTSON: The Supreme Court has granted 17 18 a writ of certiorari with respect to this SAB case I just referenced. But the Federal Circuit just came 19 down with a case I think in the last week that said 20 21 that the pendency of a writ of certiorari has no 22 impact whatsoever on what the state of the law is. 23 THE COURT: Why did the Federal Circuit feel compelled to decide that? I think that's been the law 25 forever. 1489 MR. ROBERTSON: I think it was because one of 1 the litigants made the argument. THE COURT: I understood that to be the case 3 for as long as I've been practicing law. 5 MR. ROBERTSON: All right. Thank you, Your 6 THE COURT: All right. Thank you all very 8 much. Give the citations to her tonight so she can print those out for me. Give her the books and we'll 9 10 be ready to go. 11 Thank you very much. 12 13 (The proceedings were adjourned at 5:34 p.m.) 14 15 16 17 18 19 20 21 23 24 25

should I try this, should I not try this, I'm having some THE COURT: Okay, done. Now we don't need to talk 1 2 issues here, can you help us out, and we'll take a look at about anything else. Stay with the accused products. that. Those are always phone calls or site visits, sometimes I'm going to ask you, or I'm going to turn now to the item master database -they come up and see us. Q I'm going to ask you a couple of questions about Lawson generally 6 -- and ask you some questions about that. 6 A Sure. Uh-huh. Q What kinds of products does Lawson sell? When Lawson sells its software to its customers, is there A Software and then services to help service that software any item data in the item master database? No. there's not. 10 and then clearly the maintenance. 10 11 Q Does Lawson sell computer systems? Why does Lawson sell it that way, with no item data in it? A No, it does not. 12 Essentially we don't know what the customers are going to 12 Q Does Lawson sell any kind of computer hardware? want to have in the database. It's configurable in a variety 13 13 14 Q I'm going to ask you a few questions about Lawson system 15 THE COURT: Essentially, you don't know; that's the 15 foundation 16 answer. Keep the question and the answer -- and the best way 16 17 to keep an examination moving is for you to take control of the 18 Q At a high level, what is LSF? 18 questions and not be -- we don't need a general dissertation of things. We need to have the questions asked and answered. A Lawson system foundation, it is a basis for the 4GL. 19 19 Lawson 4GL applications such as purchase order, requisitions or Q Would item master work if it included only items from a 20 21 RQ, and inventory control. They need that in order to operate, 21 single vendor? A Yes. but not only do they need it to operate it, they need it in 22 22 order to actually be compiled. Q Would item master work if it included only items that were 23 23 24 The programming language by itself my developers actually 24 already owned by the customer? work in is an extension of COBOL but doesn't always necessarily 25 A Yes. 25 1507 1509 look like COBOL. The program files, when you look at it, is Q Can item master be stored in a local database at the 1 completely dispersed through a variety of things, and LSF pulls customer's location? it all together into an actual COBOL program. We don't A Yes, it may. 3 actually see that. That's a machine that does that. Q Can item master include item records for items owned by Q Other than -- are Lawson software modules other than the the customer? accused products in this case also hosted on top of LSE? Α Yes. 6 A That is correct. Can item master records include a customer's part number? Q Can you give me a few examples of modules that are hosted on LSF other than the accused products in this case? Can item master records include the manufacturer or 10 A When I talked about the financial suite and the HR suite 10 supplier's catalog or part number? 11 11 THE COURT: Why are we getting into this? It's hard Do item master records include a default unit of measure? 12 12 13 enough to follow this technical material without getting into 13 something that isn't an issue. Let's just stay with what's at 14 Do item master records include an item description? 15 issue and get right to the point, okay? That doesn't make any 15 A Yes it does 16 difference what else is hosted. Q Do item master records include the quantity of items 17 MS. STOLL-DeBELL: Well, I think it goes to the fact available in the customer-owned inventory? 17 that LSF -- what are the accused products and that LSF works 18 18 A For stock items, ves. 19 with things other that 19 Q Do item master records include price? 20 MR. ROBERTSON: I'll stipulate that LSF works with 20 21 the other products as long as you stipulate it works with the MS. STOLL-DeBELL: If we can go to PX-361. 21 MR. ROBERTSON: Your Honor, I'm going to object. 22 22 23 MS. STOLL-DeBELL: I think we do. 23 This is a demonstrative that Dr. Weaver did that was never THE COURT: Do you or not? introduced. This witness -- so it's not in evidence. 24 24

MS. STOLL-DeBELL: We do.

25

THE COURT: Could I see it?

		1526			15
1	There's many other fields that are in the item master.		1	Q Do Lawson's customers maintain the item master database in	
2	We've talked about some of them. You know, catalog number, the		2	private?	
3	vendor's part number or its number, the manufacturer number,		3	A Yes.	
4	clearly those came from the the manufacturer came from the		4	MR. ROBERTSON: Objection, relevancy, Your Honor.	
5	manufacturer, and the vendor number came from the vendor, and		5	MS. STOLL-DeBELL: Your Honor, it goes to	
6	those were in their catalogs at some point in time. The		6	THE COURT: What does that have to do with anything?

Why is it a 21 22 22 THE COURT: I know. Your asking him to MR. ROBERTSON: Excuse me. I misspoke. It 23 23 24 comment on Dr. Weaver's testimony, right? 24 calls for an expert opinion, Your Honor, and it seeks MS. STOLL-DeBELL: What he saw the software a legal conclusion. 25 1555 1557 CHRISTOPHERSON - DIRECT CHRISTOPHERSON - DIRECT do. What he saw Dr. Weaver do with the software in THE COURT: All right. And the question was? MS. STOLL-DeBELL: The question was, Do 3 THE COURT: Objection sustained. Please UNSPSC codes identify generally equivalent items. I disregard the answer. One witness can't comment upon don't think it calls for an expert opinion. I'm just what another witness has testified to in that fashion. asking him a fact about whether these codes categorize BY MS. STOLL-DeBELL: generally equivalent items. It's not an expert Q I'm going to ask you some questions about UNSPSC 8 codes. Okay? 8 THE COURT: It's a lay opinion. So you're A Okav 9 asking him whether in his opinion that's what they do? 10 Q Are UNSPSC codes used to categorize similar 10 MS. STOLL-DeBELL: Yes. products for use with different kinds of analysis? THE COURT: Why is his opinion relevant? 11 11 MR. ROBERTSON: Objection. Lack of MS. STOLL-DeBELL: Because he works with the 12 12 foundation software. The software uses these codes. And so he 13 13 MS. STOLL-DeBELL: I can lay a foundation. can talk about what the codes do. 14 THE COURT: All right. THE COURT: You can ask him his opinion as a 15 15 BY MS. STOLL-DeBELL: lay person what it does. It's up to the jury to 16 16 Q Do you know what UNSPSC codes are? 17 17 decide what weight to give to the opinion. MS. STOLL-DeBELL: Okay. 18 BY MS. STOLL-DeBELL: 19 Q Do you work with them as part of your work for 19 Lawson software? 20 Q Do you understand or do you want me to ask it 20 21 21 Q Does Lawson Software have the capability of using 22 A Will you ask the question again? I think it's a UNSPSC codes? 23 23 24 A Yes. 24 Q Okay. It might be. In your lay opinion, do Q Are UNSPSC codes used in Lawson Software to UNSPSC codes identify generally equivalent items?

CHRISTOPHERSON - DIRECT 1558 CHRISTOPHERSON - DIRECT 1560 A No. lay opinion, otherwise he's getting into expert 1 Q Why not? 2 opinion. So let's just go ahead and do something A They are structured in a way that it's much like a else. He wasn't identified as an expert. He hasn't grocery store, if you would. It kind of identifies done a report on those codes. So let's go. the aisle that you first are headed down. You're BY MS. STOLL-DeBELL: 5 6 heading down perhaps the produce aisle. And that's at Q Okay. I'm going to ask you some questions about the top level, maybe even the first two digits or the Punchout first four digits, and as your get further down, let's A Okay. 8 8 9 take produce, for example. Maybe you're over in the Q And I'm going to ask that you put up PX 101. vegetable area and eventually you end up with the 10 Actually, can you go to page ending in 1265. What is 11 11 this? What does this show? A This shows RSS running and they have selected the 12 When you get down to the fourth level, the 13 tomatoes, maybe they are the same. Maybe they are not 13 Punchout options. equivalent, the same. But there's other examples of 14 THE COURT: I think the more basic question 14 15 15 is: What's the whole exhibit? Is this something that THE COURT: You mean it identifies Roma 16 16 Lawson produced? 17 tomatoes and Hanover tomatoes and Fairfield tomatoes. 17 MS_STOLL-DeBELL: Yes 18 and they are not generally equivalent; is that what 18 THE COURT: Mr. Christopherson, is this a 19 you're saying? 19 document Lawson generated? 20 THE WITNESS: They may not be, Your Honor. 20 THE WITNESS: It's actually a joint one 21 THE COURT: Okav 21 between Mr. Lohkamp and then also one of our BY MS. STOLL-DeBELL: 22 customers. A power point. THE COURT: A presentation? Q Mr. Christopherson, do you have an example of a 23 UNSPSC code that we can show the jury to put this in 24 THE WITNESS: Yes. 25 25 THE COURT: In that presentation on that page some context? 1559 1561 CHRISTOPHERSON - DIRECT CHRISTOPHERSON - DIRECT A Yes, I do. what's going on? MS. STOLL-DeBELL: Bill, can you pull up 2 THE WITNESS: On that particular one, they 3 Plaintiff's Exhibit 32. And can you go to page ending are showing a Punchout running or they are starting the Punchout application inside of the RSS. THE COURT: Now you are getting him to give BY MS_STOLL-DeBELL: 5 expert testimony on UNSPSC codes. You're asking him a 6 Q So in this screen shot here, we're looking at lot of other questions about it other than what was Lawson Software actually running this page; is that 7 8 the basis for his opinion This is what I think. I don't think it does A Can we highlight the top because it's a bit fuzzy? 10 generally equivalent because he thinks tomatoes aren't I would actually like to see the URL the same. That's his business. That's his opinion. Based on that, that's actually the -- the key is 11 11 12 But now you're moving into another area, and I think you get the Trinity Health Organization. So that this is what Mr. Robertson's objection may have been 13 would be actually the customer's website that the 13 to. And if that's what it is -screen shot is taken from. MS. STOLL-DeBELL: We don't know if there's a 15 Q. Okay. Is the screen shot of Lawson's RSS 15 UNSPSC for tomatoes. I have no idea if there is, if software? 16 16 that's what the level is. 17 A Yes 17 THE COURT: He knows that. Q Is it showing the Punchout icons that you can 18 18 19 MS. STOLL-DeBELL: So I'm asking him, this is 19 select as part of Lawson's Punchout product? just a list of codes, actual codes, and what they are. 20 A At that particular customer site, yes. 20 I'm just going to pull it up and ask him to answer the 21 THE COURT: At what did you say? 21 22 question in the context of a real code with a real 22 THE WITNESS: At that customer site, yes. 23 description as opposed to tomatoes. 23 THE COURT: Okay. 24 THE COURT: I think we've gone as far as we 24 BY MS. STOLL-DeBELL: need to go. He's given the basis for his opinion, his Q And then there's that red box that says select the

2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a	1595	2 3 4 5 6 7 8 9 10 11 12 13 14	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q. If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe.	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428.	15
2 3 4 5 6 7 8 9 10 11 12 13	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay.	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being characterized there?	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay. Q So we've agreed that this item catalog information	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being characterized there? A Some sort of a data repository, yes.	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay. Q So we've agreed that this item catalog information is disclosed or made known by a vendor. That's the	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being characterized there? A Some sort of a data repository, yes. Q In there, it says, Create item master vendor item	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay. Q So we've agreed that this item catalog information is disclosed or made known by a vendor. That's the first box. And I understood you to agree with me that	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being characterized there? A Some sort of a data repository, yes. Q In there, it says, Create item master vendor item records, do you see that?	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay. Q So we've agreed that this item catalog information is disclosed or made known by a vendor. That's the first box. And I understood you to agree with me that this sort of barrel-shaped thing at the bottom, that's	15
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A Yes. Q Can you tell the jury again what a CSV file is? A CSV is basically a comma separated values. THE COURT: C-o-m-m-a? THE WITNESS: Yes. Q And those values that are being separated is data with respect to the catalog item; isn't that right? A It starts out that way, yes. Q And that was disclosed or made known to the customer by the vendor, right? A Correct. Q And in this page that we're looking at here now, 428, you'll see that there is a series of arrows pointing to other boxes, and at the very end there's a database, I believe. Would you agree with me that that's what's being characterized there? A Some sort of a data repository, yes. Q In there, it says, Create item master vendor item records, do you see that? A Correct.	1595	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	THE COURT: Any objection? MS. STOLL-DeBELL: No. THE COURT: All right. It's admitted as what? MR. ROBERTSON: I think it's Plaintiff's Exhibit No. 521. THE CLERK: 521? MR. ROBERTSON: Yes, sir. (Plaintiff's Exhibit No. 521 is admitted into evidence.) BY MR. ROBERTSON: Q If you will turn to the page actually, why don't we, now that it's admitted, let's go back and take a look at that page I was talking about, which ends with the Bates label 428. A Okay. Q So we've agreed that this item catalog information is disclosed or made known by a vendor. That's the first box. And I understood you to agree with me that this sort of barrel-shaped thing at the bottom, that's a database, correct?	15

		1598			160
1	a vendor agreement, correct?		1	information when it provided this catalog data,	
2	A That's correct.		2	correct?	
3	Q And we go through this phase 2, mark or unmark a		3	A That's correct.	
4	subset of vendor items for inclusion in the vendor		4	Q The next one is UOM, do you see that, sir?	
5	agreement, right?		5	A Correct. Yes, I do.	
6	A That's correct.		6	Q That's the unit of measure, right?	
7	Q If it's a new item, it goes over and it's		7	A That is, yes.	
8	indicated as yes to phase 3, import marked vendor		8	Q That's one of the required things the vendor had	
9	items for inclusion on vendor agreement, correct?		9	to do, right?	
10	A That's correct.		10	A Yes.	
11	Q And then it ends up in the item master there where		11	Q The next one is the item cost. Do you see that?	
12	it says, Create item master vendor item records,		12	A Yes, I do.	
13	right?		13	Q That's also one of those required things that the	
14	A That's correct.		14	vendor had to make known or generally available to the	
15	Q Let's go to the page we talked about that has		15	customer in order for this to be loaded into the item	
16	required fields which ends at 430.		16	master, correct?	
17	A Ends at 430?		17	A Correct.	
18	Q The Bates label that ends with 430, sir. Now,		18	Q The next one is a Lawson item number, okay? Do	
19	it's talking about what actually was imported in that		19	you see that?	
20	file, right? I asked you about whether these were		20	A Yes.	
21	required fields.		21	Q So now Lawson can create its own item number for	
22	A It could. I've not seen this before, so give me a		22	that, right?	
23	chance to look at it. You've obviously had that		23	A Correct.	
24	chance.		24	Q But you can also have a field for a universal	
25	Q That's fair.		25	product code, correct?	
		1599			160
1	A Yes. Okay.	1599	1	A Correct.	16
1 2	A Yes. Okay. Q Just confirm for us that you agreed with me when I	1599	1 2	A Correct. Q You can also have a field for stock-keeping units;	16
	,	1599	'		16
2	Q Just confirm for us that you agreed with me when I	1599	2	Q You can also have a field for stock-keeping units;	16

		1602	160
1	I appreciate that.	1	
2		2	
3	It also has a field for the UNSPSC family. Do you see that?	3	
4	A Correct.	4	
5	Q Now, if you turn to the next page. There's a	5	
6	black box around those four required fields there. Do	6	
7	you see that?	7	
8	A Correct.	8	
9	Q So what's being emphasized here is this black box.	9	
10	These are the required fields, but all these other	10	
11	fields are available, right?	11	
12	A Fair. We don't understand the content, but that	12	
13	appears to be it, yes.	13	· · · · · · · · · · · · · · · · · · ·
14	Q But these are the fields that are available in	14	4 in the Lawson system by vendor name; is that right?
15	this import process; isn't that right?	15	5 A You're searching for the alpha field.
16	A These are the fields that are available?	16	
17	Q That can be filled with catalog item data?	17	7 the vendor name, I could search by vendor name,
18	A These are for the fields, yes.	18	8 correct?
19	Q Why don't you turn to the next page.	19	9 A You would get back those entries, yes.
20	THE COURT: Wait a minute. Is everything	20	0 Q Those vendors?
21	listed on that page an available field?	21	1 A Yes.
22	THE WITNESS: Correct.	22	2 Q That I put in that user defined field?
23	THE COURT: Including the four that are	23	3 A Correct.
24	bracketed.	24	Q Could you just go to the page that ends with 437.
25	THE WITNESS: Yes.	25	That actually is identifying this vendor price
		1603	160
1	BY MR. ROBERTSON:	1	
2	Q I think you said earlier when we were talking	2	
3	about I think I made an objection as to what fields	3	
4	we were talking about.	4	
5	A Sure.	5	with don't you go to the occord to last page of
J	A Gale.		what is now Plaintiff's Evhibit 521
6	And the Court asked the question: Are they		
6	Q And the Court asked the question: Are they	6	A Bates number on that? 477?
7	between 0 and 100?	6	A Bates number on that? 477? Q 477, yes, it is.
7 8	between 0 and 100? A Right.	6 7 8	A Bates number on that? 477? Q 477, yes, it is. A Okay.
7 8 9	between 0 and 100? A Right. Q These are the fields we're talking about, right?	6 7 8 9	A Bates number on that? 477? Q 477, yes, it is. A Okay. Q Do you see there's referenced at the bottom
7 8 9 10	between 0 and 100? A Right. Q These are the fields we're talking about, right? A Absolutely.	6 7 8 9	A Bates number on that? 477? Q 477, yes, it is. A Okay. Q Do you see there's referenced at the bottom actually, I'm sorry. Let me just start over and lay a
7 8 9 10	between 0 and 100? A Right. Q These are the fields we're talking about, right? A Absolutely. Q Well, the next page that's now ending with 433	6 7 8 9 10	A Bates number on that? 477? Q 477, yes, it is. A Okay. Q Do you see there's referenced at the bottom actually, I'm sorry. Let me just start over and lay a better foundation. This is a screen shot; is that
7 8 9 10 11	between 0 and 100? A Right. Q These are the fields we're talking about, right? A Absolutely. 7 8	between 0 and 100? A Right. Q These are the fields we're talking about, right? A Absolutely. Q Well, the next page that's now ending with 433 also has a field that can be completed for UNSPSC class, right? A Correct. Q And then the next field that can be completed is for UNSPSC commodity, right? A That's correct. Q If you drop down a little bit, there's a number of user defined alpha fields. Do you see that? That's on 24 through 28 are user defined alpha fields, correct? A Uh-huh.	66 77 88 99 10 11 12 13 14 15 16 17 18 18 20 21	A Bates number on that? 477? Q 477, yes, it is. A Okay. Q Do you see there's referenced at the bottom actually, I'm sorry. Let me just start over and lay a better foundation. This is a screen shot; is that right? A Yes. Q And it's at a web address, an URL, of HTTP://support.lawson.com, correct? A That's correct. Q That's a Lawson website? A Yes. Q And we're looking here at a page on the Lawson website for customer support? A That's correct. Q And one of the things it says here under chapter 6, Importing vendor price agreements, are you with me?

1606 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	file; isn't that right? A You do get a file, yes. Q It's a catalog file, isn't it, sir? A Correct, yes. Q All right. And that price catalog file can contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct. Q The unit of measure?
2 3 4 5 6 7 8 9 10 11 12 13 14	A You do get a file, yes. Q It's a catalog file, isn't it, sir? A Correct, yes. Q All right. And that price catalog file can contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
3 4 5 6 7 8 9 10 11 12 13 14	Q It's a catalog file, isn't it, sir? A Correct, yes. Q All right. And that price catalog file can contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
4 5 6 7 8 9 10 11 12 13 14	A Correct, yes. Q All right. And that price catalog file can contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
5 6 7 8 9 10 11 12 13 14	Q All right. And that price catalog file can contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
6 7 8 9 10 11 12 13 14	contain data such as the vendors item description, correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
7 8 9 10 11 12 13 14	correct? A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
8 9 10 11 12 13 14	A Correct. Q Vendor identifier? A Correct. Q The price? A Correct.
9 10 11 12 13 14	Q Vendor identifier?A Correct.Q The price?A Correct.
10 11 12 13 14 15	A Correct. Q The price? A Correct.
11 12 13 14 15	Q The price? A Correct.
12 13 14 15	A Correct.
13 14 15	
14 15	Q The unit of measure?
15	
	A Correct.
	Q And the vendor's catalog number, correct?
	A Correct.
17	Q And the vendor can send the user the vendor price
	agreement import program, this vendor catalog we've
	been talking about, in a CSV file that contains a
	catalog of all the items the vendor can sell the user;
	isn't that right?
	A It could.
	Q Do you have any doubt about that?
24	A I have no doubt that they can do it, yes.
25	Q In fact, customers who have the EDI module that
1607	
	you sell use that EDI 832 to import catalog data,
	don't they? You are familiar with that?
	A Yes, I am. Which catalog data are you referring
	to? The whole catalog?
	Q Well, it can be the whole catalog, can't it?
	A It could be the whole catalog.
7	Q And it could be part of the catalog, right?
8	A Correct.
9	Q So it could be the entirety of the catalog or some
10	subset of the catalog, right?
11	A Right.
12	Q The customer having this EDI 832 module has the
13	capability of importing an entire vendor catalog into
14	the item master, right?
15	A It has that capability as you're defining it, yes.
16	MS. STOLL-DeBELL: I'm going to object. It's
17	outside the scope of direct.
18	THE COURT: Overruled.
	MS. STOLL-DeBELL: Your Honor, I didn't even
19	get into EDI at all.
19	
	MR. ROBERTSON: She asked him about the
20	
20 21 22	manners and the way the data was imported.
20 21

A No. Q Well, do you agree that the vendor catalog load process automatically loads item and vendor item information into the Lawson system? A Say that again. Q That the vendor catalog load process automatically loads item and vendor item information into the Lawson system? Do you agree or disagree with that statement? MS. STOLL-DeBELL: Your Honor, I object. I'm not sure what he's talking about. He just said he wasn't familiar with it. So I don't know if he's moved on.	16
1 2 3 4 5 6 7 8	MR. ROBERTSON: Your Honor, I'd like to show the witness another document, if I could. Q. This is a Lawson document; is that right, sir. A. Yes. Q. And you recognize this, sir? A. I do not. MS. STOLL-DeBELL: Your Honor, I'm going to object. These are all Lawson documents. They were produced during discovery. They should have been on the exhibit list and THE COURT: He can cross-examine from things that aren't on the exhibit list, but he can't get them into evidence unless you agree. MS. STOLL-DeBELL: Your Honor, I think he can use them for impeachment, but this isn't impeachment testimony. He's asking about documents that should have been on the exhibit list, and they're not. THE COURT: That doesn't have anything to do with whether it's impeachment or not. The correct way to do it is ask him a question first. Don't be getting the document in. Ask him the question. Then	1611	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q And you could have the price, too? A Correct. Q All right. That's fine. That's all I have with respect to that. THE COURT: See, the document never came in. BY MR. ROBERTSON: Q Now, are you familiar with the PO 25 vendor catalog load changes? A No. Q Well, do you agree that the vendor catalog load process automatically loads item and vendor item information into the Lawson system? A Say that again. Q That the vendor catalog load process automatically loads item and vendor item information into the Lawson system? Do you agree or disagree with that statement? MS. STOLL-DeBELL: Your Honor, I object. I'm not sure what he's talking about. He just said he wasn't familiar with it. So I don't know if he's moved on. THE COURT: He said he wasn't familiar with	16

THE WITNESS: Yes sir 1704 1 THE COURT: Mr. Schultz, on this situation, let's 2 Q When was the latest upgrade that Lawson provided to 2 move on. That's just sort of topical specific in their hospital because of their situation, and for good reason they A The upgrade was to the 9.01 release. don't want anybody but doctors and nurses telling them what's Q And when was that? comparable or equivalent. That's what he's talking about, so A I think it was 2009 that's not what we're dealing with this in this case. Let's go Q And Novant installed that upgrade? 7 8 MR. SCHULTZ: Actually, Your Honor, that's all I've Q We mentioned the UNSPSC codes before, the UNSPSC codes as 9 got. you phrased them. Does Novant use the UNSPSC codes in its 10 10 THE COURT: Okay. 11 Lawson system? 11 MR. SCHULTZ: Thank you, Mr. Yuhasz. We have them loaded in the data set up in the item master. 12 12 In the item master using the Lawson system, does the 13 13 CROSS-EXAMINATION UNSPSC code, does that enable a user to locate an equivalent 14 BY MR. STRAPP: 15 15 Q Good afternoon, Mr. Yuhasz. 16 MR. STRAPP: Objection, foundation, 16 17 THE COURT: He can testify about what he thinks his 17 Q Could you please put Plaintiff's Exhibit 337 back on the 18 does, but he can't testify about what all the rest of them do screen for a minute, and page three of the exhibit. Now, we MR. STRAPP: Your Honor, I also object that it calls 19 19 were -- you were discussing just recently this proposal from 20 for a legal conclusion as well. Lawson and SciQuest. I want to be perfectly clear here. This 21 THE COURT: How? is just a proposal from Lawson and SciQuest; correct? This 21 MR. STRAPP: It's asking for an expert opinion 22 isn't the system as actually implemented at Novant; isn't that 22 regarding a claim in the claim construction terms, term of 23 23 correct? 24 equivalents 24 A That's correct. MR. SCHULTZ: There is no equivalents -- Your Honor, Q And even in this depiction here, graphical proposal 25 1703 1705 that's not a claim term. 1705 1 THE COURT: You can ask him his understanding. representation, the item master, the item data, that's Lawson's in this depiction; correct? MR_SCHULTZ: Yes 3 A That's correct. Q Mr. Yuhasz, your understanding with respect to the UNSPSC Q Let's talk about the products that are actually installed codes, does the Lawson system installed by Novant have the at Novant. Novant uses the Lawson inventory control module; ability to locate an equivalent item? 6 A No Yes 8 Q Why not? Q And Novant also uses the Lawson purchase order module; 9 A In more of a clinical setting, it is difficult to correct? 10 determine equivalent items. We would rely on a clinical specialist to tell us that, two different syringes from 11 And Novant uses RSS or requisition self-service: is that 11 different manufacturers or even gauze or even hand sanitizer is 12 13 an equivalent product. 13 Yes 14 THE COURT: Wait a minute. Clinical, you mean And Novant has also licensed procurement punchout; is that 14 15 15 correct? THE WITNESS: Physicians, nurses, yes, sir. 16 16 17 THE COURT: Medical people. 17 Q Novant's been using Lawson requisition self-service for THE WITNESS: Medical people. 18 about five years; is that correct? 18 19 THE COURT: So you don't think it operates that way 19 20 because you want the doctors and the nurses to be making that 20 Q And prior to that, Lawson was using the requisitions decision, not to have a computer make it. 21 21 module; is that correct? THE WITNESS: Yes. 22 22 23 THE COURT: Okay, thank you. 23 Q Isn't it true that Lawson provided personnel to assist Q Do you have an example of a situation where the UNSPSC 24 24 Novant with the initial implementation of requisition codes would not work for finding matching equivalent items?

Yuhasz - Cross 1706 Yuhasz - Cross 1708 A Yes Q And that initial implementation took about four months: Q And those items also have part numbers sometimes: isn't that correct? A I think that was -- I couldn't put an exact date on just A Yes the requisition self-service because it is part of a larger Q And items will have vendor or manufacturer numbers; 5 6 correct? 7 Q That larger project took approximately four months; is Yes 8 that correct? Q And items sometimes have images associated with them: A No, the larger project took more than that. Yes 10 Q How long did it take? 10 Α 11 A I'm not sure I can recollect at this moment. 11 Items have price information; is that right? 12 THE COURT: Don't guess. It's okay. 13 Q Isn't it true that during that initial implementation, 13 And items sometimes will have inventory availability; Lawson provided Novant with application consulting services? 14 15 15 16 Q And with technical consulting services? 16 Now, isn't it true that the manufacturer or the vendor 17 17 provides the contract price for the items in the item master? 18 Q And isn't it true that during that initial implementation 18 19 of requisition self-service, Lawson also provided Novant with 19 Q And isn't it also true that the description of the items in the item master are provided by the manufacturer or vendor? A For requisition self-service? 21 Not without transformation by Novant personnel. 21 Q You get the descriptions of the goods from the 22 Q Correct. 22 23 A Yes 23 manufacturers; right? Q And Lawson personnel actually traveled to Novant to 24 Q You understand UNSPSC to be a classification system for provide some classroom training on requisition self-service; 25 1707 1709 Yuhasz - Cross 1707 Yuhasz - Cross 1709 isn't that correct? particular items; correct? We've discussed that? Q Novant has a maintenance agreement with Lawson for the Q Isn't it true that Lawson requisition self-service, the requisition self-service software; isn't that correct? application that's used at Novant, has the capability of using those UNSPSC codes? 5 5 6 Q And isn't it true that that maintenance agreement also A Capability exists, not used. THE COURT: You say it exists but you don't use it? allows Novant to receive ongoing upgrades to its software? 8 THE WITNESS: Yes, sir. Q Lawson also provides Novant with an online library of Q Isn't it true that by searching for items using a UNSPSC educational materials regarding its procurement package? code in Lawson requisition self-service, that if a user at Novant was to use that capability, it could find items from 11 11 12 Q Including specific product guides, for example? multiple vendors with a particular UNSPSC code? 13 MR. SCHULTZ: Objection, foundation. He said he 13 Is it true that Novant currently has about 70,000 to 14 80,000 active items in its item master database? MR. STRAPP: Your Honor, we've been talking about the 15 15 capability of the Lawson system. The door was opened on 16 16 17 Q And those are all available for ordering through direct 17 requisition self-service? 18 THE COURT: It's on cross-examination. I think he 18 A Yes. 19 19 can answer that. Q And isn't it correct that those 70,000 to 80,000 items are 20 A Could you repeat the question. 20 associated with approximately 10,000 different vendors; is that 21 21 22 correct? 22 THE COURT: If you did use it is the question. You A Yes. In rough numbers. 23 23 may ask that. Q And each of those items, those items have textual 24 Q If a user at Novant was using Lawson requisition descriptions, correct, in the item master? self-service searching for an item by using a UNSPSC code, that

Yuhasz - Cross 1712 user could find items from multiple vendors with the same MR. STRAPP: Yes, Your Honor. UNSPSC code: isn't that correct? MR. SCHULTZ: Yes. Your Honor. THE COURT: Mr. Yuhasz, thank you for being here and Q You talked a little bit about a competition, an RFP giving us your testimony, and you are released from your process at Lawson; do you recall that testimony? obligation to be here. Thank you, sir. THE WITNESS: Thank you. 6 Q And the RFP that was sent was for procure to pay solution; THE COURT: Next witness? MS. STOLL-DeBELL: Your Honor, we're calling Mr. 8 correct? 9 A Yes Keith Lohkamp back to the stand. 10 10 Q By a procure to pay solution, Novant means an end-to-end 11 solution that starts all the way from requisitioning and goes 11 KEITH LOHKAMP. through payment; correct? 12 a witness, called by the defendant, having been first duly 12 13 13 sworn testified as follows: Q The Novant Health -- the RPF, that was issued around 2008; DIRECT EXAMINATION BY MS. STOLL-DeBELL: 15 is that correct? 15 16 Mr. Lohkamp, do you have a college degree? 17 Q And that RFP we saw was sent to Lawson; isn't that 17 Yes, I do. correct, Lawson and SciQuest? When did you get your college degree? 19 19 In 1991. 20 Q It was also sent to ePlus? 20 Where did you get it from? 21 Stanford University 21 Q Isn't it true that Novant sought the same functionality And what kind of college degree did you get? 22 from ePlus that it sought from all the other vendors as part of A Bachelor's in international relations 23 this process including Lawson and SciQuest? 24 Q Do you have an advanced degree? A Yes. A Yes, I do. 25 1711 1713 1711 1713 MR. STRAPP: I have no further questions, Your Honor. Q Will you describe that for me, please. THE COURT: Any redirect? Yes, I have an MBA from the Haas School of Business at UC 3 3 Berkeley. REDIRECT EXAMINATION Q When did you get that? BY MR SCHULTZ: A I got that in 1996. 5 5 Q Mr. Yuhasz, Mr. Strapp just asked you about the RFP 6 When did you start working for Lawson? process. Did either ePlus or Lawson win that RFP process? May 2005 A No I think the other day you testified that you first learned Q Who did? about ePlus when you saw them at a trade show in 2003? 9 10 Is that correct? But at that time, you were not working 11 Q And why? 11 12 MR. STRAPP: Objection, Your Honor, relevancy. for Lawson; isn't that correct? 13 THE COURT: What difference does it make who won it? 13 A That's correct. MR. SCHULTZ: It goes to the functionality that was Q And then I believe that you testified you didn't hear 14 selected by Novant for fulfilling what they wanted out of their again of ePlus until 2008 in connection with a Cleveland Clinic 15 15 16 16 17 17 MR. STRAPP: Your Honor, the functionality -- what MR. ROBERTSON: Your Honor, I'm going to object. Novant wanted is irrelevant. What matters here is the This is cumulative. We went through this all on the first day, 18 18 19 functionality that Lawson has in its accused system. 19 both on direct and cross-examination. 20 THE COURT: It's marginally relevant, but it 20 THE COURT: Well, what do you say in response to 21 introduces delay and confusion and opens up a lot of other 21 that, Ms. Stoll-DeBell? 22 areas that we don't need to get into that really aren't 22 MS. STOLL-DeBELL: I'm trying to establish when he 23 relevant, so sustained. 23 was an employee for Lawson and compare that to when he heard 24 MR. SCHULTZ: Mr. Yuhasz, thank you for your time. 24 information about ePlus, and I will say this is the last THE COURT: Can Mr. Yuhasz be permanently excused? question on it as well, Your Honor.

Lohkamp - Direct 1720 really with those vendors, official relationship, so the to connect to a customer specific private StaplesLink.com purposes of having the contract was to make it a formalized website: is that correct? 3 MR. ROBERTSON: Objection, relevancy, Your Honor. process for bringing new supported punchout partners on as well as to set up the ground rules of how we were going to work We're talking about using a Lawson product, not using the together and set the expectations with that vendor with the simple internet browser. This has nothing relevant to the 5 6 goal of being able to support our customers who were interested accused systems. in punching out using procurement punchout to that vendor THE COURT: I'm inclined to agree with him. Ms. website. So the contract helps us kind of establish the Stoll-DeBell. I was trying to see what the difference was, but 8 9 expectations and how we were going to work together to support I think the objection is sustained. 10 MS. STOLL-DeBELL: I think that's all the questions I 10 our mutual customers. 11 Q Is it possible to use Lawson's punchout product to punch 11 have for right now. out to a vendor website if the vendor is not a supported vendor 12 THE COURT: Any cross-examination? 12 13 by Lawson? 13 14 A Yes CROSS-EXAMINATION BY MR ROBERTSON: 15 Q Is it possible for Lawson's customers to connect to 15 16 punchout vendors' websites without using Lawson's punchout 16 Q Good afternoon, Mr. Lohkamp 17 17 A Good afternoon. 18 MR. ROBERTSON: Objection, Your Honor, vague and Q I understand you have these punchout trading partners that 19 ambiguous. Is this just using the internet to go to a website 19 you have contracts with and punchout trading partners that you 20 don't have contracts with: right? A Correct MS. STOLL-DeBELL: I can ask a better question. Your 21 21 22 Honor. I'll withdraw that 22 Q But other than not having, for example, a defined contact, THE COURT: All right. I think that's what you said; that was one of the benefits of 23 23 24 Q Is it possible to use an internet browser to connect to a 24 having a contract? punchout vendor's website? A That was one of the benefits, ves. 25 1719 1721 Lohkamp - Direct Lohkamp - Cross 1721 MR. ROBERTSON: Objection, Your Honor, relevancy, Q So we're all clear on this, it doesn't matter for a MS. STOLL-DeBELL: Your Honor, I think it goes -contract punchout trading partner of Lawson's or noncontract 3 THE COURT: Why does that have anything to do with trading partner of Lawson's, the technology never changes; MS. STOLL-DeBELL: I think it goes to the 5 5 A That's correct. 6 relationship and connection between Lawson and the punchout And isn't it true that the vast majority of Lawson's 7 vendor and how the punchout vendor's website works. punchout trading partners are noncontractual; right? 8 THE COURT: They are different websites. The And but yet you work with these noncontractual punchout 9 testimony he gave earlier, or somebody gave, was if you go on 10 the internet, you get one website. If you go through the partners to the mutual benefit of both companies just like you punchout you get another, I think. Isn't that right? Ask him. do with your contractual partners; right? 11 11 12 I think -- if you go through the internet to get to what was --12 a website of somebody who is your punchout partner, you get the 13 Q So. I see. Because there's a contract, you have a mutual 13 benefit, and because you don't have a contract, there's no internet site or not, the regular site? THE WITNESS: For certain vendors, for example, like mutual benefit? 15 15 StaplesLink.com, you can go directly to StaplesLink.com versus 16 16 A I thought I understood you to say they work with them the going through punchout through a browser. 17 17 same way. THE COURT: But if you go through the punchout, it's 18 Q I'm wondering -- it doesn't matter whether you have a 19 a different website; isn't it? 19 contract or don't have a contract. It's still mutually 20 THE WITNESS: You would be logged in to -- it would beneficial to both Lawson and its punchout trading partners to 20 21 be the same website. You'd be logged into StaplesLink.com. 21 have that relationship; right? 22 THE COURT: So it's true for some of them but not for 22 23 23 MR. ROBERTSON: That's all I have, Your Honor. Thank 24 THE WITNESS: I am not familiar with all of them. 24 you. THE COURT: Any redirect? Q So with StaplesLink.com, you can use an internet browser 25

ROBERTSON: He can't testify and characterize what those documents mean and whether they do doesn't mean they comply with the Court's claim construction because they use the term "catalog." THE COURT: So the objection to the form of the question is that he doesn't have any basis for knowing what the author of a particular document meant. Is that right, Mr. Robertson? MR. ROBERTSON: Yes. Thank you for articulating that for me, sir. THE COURT: What's your response to that, Mr. McDonald? MR. McDONALD: I don't think my question was	
THE COURT: We're not go defining the catalogs. I've told yo MR. McDONALD: That was THE COURT: Well, he did. defining it. So let's don't have it. really want to have to deal with the McDonald. He can testify, but I do be constantly monitoring whether with the requirement that the term by the Court. BY MR. McDONALD: Q Do you have an understanding the item master in the Lawson system.	su-all that before. sn't my intent. He started off And I don't sis problem, Mr. Ion't want to have to there's compliance as are those defined g as to whether or not stems includes	9 10 11 12 13 14 15 16 17 18 19 20 21	form? That different documents have different reasons or that he can't testify to it or what? MR. ROBERTSON: He can't testify and characterize what those documents mean and whether they do doesn't mean they comply with the Court's claim construction because they use the term "catalog." THE COURT: So the objection to the form of the question is that he doesn't have any basis for knowing what the author of a particular document meant. Is that right, Mr. Robertson? MR. ROBERTSON: Yes. Thank you for articulating that for me, sir. THE COURT: What's your response to that, Mr. McDonald?	

	20)11.01. 1	3 Trial Transcript Day 7 1/13/2011	3:01:00 PM
	17	66	<u> </u>	1768
1	BY MR. McDONALD:	1	the keyword "Dell," then that particular record would	
2	Q Dr. Shamos, can we turn now to slide No. 17 here	2	be retrieved. But that describes what's retrieved.	
3	and your reason No. 2 for non-infringement. This is	3	It doesn't describe what gets searched. What gets	
4	another slide you prepared; is that correct?	4	searched is all of item master.	
5	A Yes.	5	Q So is it your understanding that these claims	
6	Q What is your reason No. 2 for non-infringement?	6	require that you select the catalogs to search and	
7	A Ten of the 12 claims require selecting catalogs to	7	then search them?	
8	search. If there's no catalog, and certainly if	8	A Well, the claims do require that. The selecting	
9	there's not more than one catalog, it's not possible	9	step is just the selecting step, but then the search	
10	to select catalogs to search.	10	is then restricted to those catalogs that are	
11	Q Do you have and understanding from reading	11	selected.	
12	Dr. Weaver's report as to what he is saying is how	12	Q In the Lawson keyword search, does it not have	
13	Lawson system selects a catalog or catalogs to search?	13	that process then, is that what you're saying, of	
14	A I don't recall it sitting here.	14	selecting catalogs to search and then searching them?	
15	Q All right.	15	A That's correct. There's only item master.	
16	THE COURT: I didn't hear what you said.	16	Q Now, if we could return to Claim One of the '172	
17		17		
18	THE WITNESS: I don't recall it sitting here. I'm sure I read it. I just can't spit it back out	18	patent. I think I might have overlooked it. There was a second reason. That one claim, that doesn't	
19	now.	19	explicitedly use the word "catalogs," at least another	
20	Q Do you recall whether Dr. Weaver in his report	20	reason it doesn't infringe in your opinion other than	
21	talked about a keyword search relating to selecting	21	the one you already described; is that correct?	
22	catalogs to search for purposes of the claims in this	22	A I think so.	
23	case?	23	Q Could we turn to slide No. 13, please? Did you	
24	A I do recall that.	24	also put together this slide Dr. Shamos?	
25	Q What is your understanding as to the reason	25	A Yes.	
	17	67		1769
1	Dr. Weaver says the Lawson system selects catalogs to	1	Q This relates to that 12th claim that does not	
2	search?	2	explicitly use the word "catalog," is that correct?	
3	A I couldn't make any sense out of it. There's a	3	A Yes.	
4	keyword search function and it's	4	Q What are you trying to portray to us here in this	
5	Q When you say "keyword search function," what are	5	slide with respect to your analysis of why Claim One	
6	you talking about right now?	6	of the '172 patent is not infringed?	
7	A So, for example, if I wanted to	7	A One of the elements of that claim is means for	
8	Q I'm just saying what system?	8	generating an order list. And what I have after that	
9	A S3.	9	first bullet point, the function and structure. The	
10	Q The Lawson system?	10	function is taken from the Court's construction.	
11	A The Lawson system yes.	11	Structure, I took the first part of the Court's	
12	Q So you're talking about the keyword search in the	12	construction. I left off the specific examples of	
13	Lawson system, right?	13	structure that were in the construction. But that's	
14	A Yes.	14	because I don't think that's necessary on this	
15	Q I'm sorry. Go ahead.	15	particular slide.	
16	A If a keyword appears in a record in the item	16	The question is: If there can't be an order list,	
17	master database, then it can be retrieved using	17	then there certainly can't be a means for generating	
18	keyword search. If, for example, and I think this has	18	an order list.	
19	something to do with the example in Dr. Weaver's	19	And the construction of order list is a list of	
20	report, suppose when I was entering the description of	20	desired catalog items. And if there's no catalog, you	
21	an item I happen to also put the manufacturer's name	21	can't have a list of desired catalog items. You could	
22	in there like Dell, for example, for a computer	22	have a list of desired items.	
23	manufacturer. So instead of just saying and X3D	23	MR. McDONALD: Can we go to Plaintiff's	
24	computer, I put Dell X3D.	24	Exhibit No. 3? Is that the '172 patent, Plaintiff's	
1		1	•	

And then later on someone went and searched for

25 Exhibit 3?

	1786	1788
1	instructions that we think will be appropriate.	1
2	THE COURT: Several? How about one good one?	2
3	MS. STOLL-DeBELL: One with many facets, Your	3
4	Honor.	4
5	THE COURT: Listen, I'm going to make you sit	5
6	on the jury. I think every lawyer ought to have to	6
7	sit on a jury and ought to have to listen to these	7
8	instructions and try to figure out what do they mean.	8
9	Because if you read them from the jury's standpoint,	9
10	particularly these model instructions in the patent	10
11	area, what they're doing is nobody has really made	11
12	a real good effort to simplify them yet.	12
13	Judge Spencer did better in SAP in	13
14	simplifying the instructions than almost anybody I've	14
15	ever seen, but there have with some legal changes	15
16	since that time that prohibit me from adopting them	16
17	full scale.	17
18	All right. That takes care of them. I'm not	18
19	real hopeful that you're going to get your evidence or	19
20	I don't think you ought to be hopeful that you're	20
21	going to get that evidence in, Mr. Robertson, because	21
22	it seems to me it invites the jury to speculate and	22
23	it's a problem, I think.	23
24	MR. ROBERTSON: I understand, Your Honor.	24
25	We're also concerned about prejudice given the fact we	25
	1787	

1787

- 1 proffered that in good faith when it came up with the
- witness that he had a lay opinion as to his intent. I
- thought it was relevant then because his lay opinion 3
- as to the intent I didn't think was very persuasive,
- but if you go get a legal opinion on these issues that
- 6 obviously involve the patents, and then you make the
- conscious decision not to disclose it, I think that's
- part of the circumstantial evidence they can consider.
- 9 I understand Your Honor's ruling.
- THE COURT: I haven't rules. 10
- MR. ROBERTSON: I understand Your Honor's 11
- suggestion which way you might rule, but you're going 12
- 13 to be fair and read the papers.
- 14 THE COURT: I thought maybe if I gave you all
- 15 some insight into where I was right now since we're on
- 16 the fly that your arguments might be better informed
- in the morning, just as my thinking will be better
- informed if I read what you-all tendered for me to
- 19
- 20 Thank you so much for the overnight present.
- 21 I appreciate it.

22

Q I would like to pick up where we left off, if I got it right anyway here this morning, with this slide showing some of the elements of claim one of the '516 patent on this slide that you put together. Can you walk us through THE COURT: Mr. McDonald, excuse me. Just for orientation purposes, when we left off, you had said that you were going through each claim one by one to show, and that's what you are doing. MR. McDONALD: Thank you, yes. THE COURT: I said it's a good time to take a break, so that's what we'll be doing now, is hearing Dr. Shamos's opinion on each claim that's at issue. Q We have the 12 claims. We're going to take them one at a	

1 whether or not the Lawson accused system satisfies that element

2 of claim nine?

3 A Yes. In order for there to be a second identification

4 code, there has to be a second catalog, and even if there's one

5 catalog, there weren't two catalogs in S3. So that element

6 can't be present.

7 Q Is there some language in this element about the second

8 item being, quote, generally equivalent?

9 A Yes

10 Q Do you have an opinion as to whether in the Lawson system.

11 the Lawson systems accused here, satisfy that part of that

12 element?

13 A There's no notion in the Lawson systems of general

14 equivalents. There's no way to ask the system for a generally

15 equivalent item.

16 Q Do you have an understanding as to what aspect of the

17 Lawson system is dependent in this case to satisfy that part of

18 that element?

19 A Only from expert reports.

20 Q Let's go to slide 30 then, if we can turn to that, Bill.

21 Dr. Weaver, did vou look at --

22 MR. ROBERTSON: Dr. Weaver?

23 A I am Shamos.

24 MR. McDONALD: I made it this far today.

25 Q Dr. Shamos, did you look at all at the issue of whether or

1 that has the same LINSPSC code. So there's no converting that's

2 going on. There's no matching that goes on with respect to

3 UNSPSC codes even though they may be physically present in the

4 database.

 $\,\,$ $\,$ $\,$ Q $\,$ You have here, and this is another slide we have up on the

6 screen that you prepared; is that right?

7 A Yes.

8 Q On the last point there, what's the last bullet point?

9 Can you explain what you meant by that?

10 A It's only within RSS, not the totality of the systems that

11 are accused. It's only RSS that allows even searching of the

12 UNSPSC code.

13 Q Can we turn to the next slide, please, 31.

14 A Yes.

15 Q Is this another slide you put together, Dr. Shamos?

16 A Well, I put it together, but literally it's copied out of

17 a white paper that was published explaining what UNSPSC codes

18 are. So I didn't write the words that are on the slide except

19 for the title

20 THE COURT: In other words, you made the slide.

21 THE WITNESS: I made the slide. I had an electronic

22 copy of that white paper. I had it on the screen. I used a

23 photo editor, and I did a screen capture and then cropped it

24 down and stuck it on the slide directly out of that UNSPSC

25 white paper.

1818

1820

1 not in the Lawson system the use of the UNSPSC codes would

2 satisfy any claim elements of any of the asserted claims in

3 this case relating to generally equivalent items?

4 A Did I look at that?

5 Q What was your conclusion about that?

6 A That it doesn't.

7 Q Why not?

A So, the UNSPSC code is a generally accepted international

9 coding to categorize products. There's a big difference

10 between desks and chairs, and so if you gave a code to desks,

11 you could immediately tell that something was a desk and it

12 wasn't a chair. And it happens to be hierarchically organized.

13 That is, it has different levels, so you can get to office

14 furniture, and then within office furniture you could have

15 desks, and then within desks you can desks with drawers or

16 without drawers, et cetera.

17 The Lawson software does provide the ability for a

18 customer to enter UNSPSC codes into the item master database if

19 he wants to do that, and sometimes it's useful for people who

20 are ordering things to know what the UNSPSC code is associated

21 with a particular item, but those UNSPSC codes are not used for

22 the purpose of determining whether things are generally

23 equivalent.

24 There's no automatic conversion. I can't go and say, if

25 you're out of stock of this product, please give me another one

1 Q Can you tell us in a nutshell, Dr. Shamos, what your main

2 point was for putting together this particular slide as it

3 relates to your testimony here?

4 A Yes. It was to show this eight-digit classification of

5 items and why it's hierarchical. This is the UNSPSC

6 explanation of what these codes look like. The code, as you

7 can see at the bottom where it says pen refills equals UNSPSC

8 classification 44-12-19-03.

9 The significance of those numbers, 12, 19, and 03, depend

on the fact that they are coming from 44. So 44 is office

11 equipment, accessories, and supplies. Within that, 12 is

12 office supplies. Within 12, 19 is ink and led refills, and

13 within 19, 03 is pen refills. And so what 44-12-19-03 tells

14 you is it's a pen refill.

15 It doesn't tell you what kind of pen, and so if I want to

16 buy a refill for my pen, it's going to have to have -- if

17 there's any UNSPSC classification at all, it's going to have to

18 have 44, 12, 19, 03, but I can't just buy any pen refill. It

19 has to fit in that particular pen. So these UNSPSC codes don't

20 describe substitutable or generally equivalent items.

21 Q Can we turn to the next slide, please, number 32. I think

22 you've essentially already covered the first three bullet

23 points on this slide?

24 A Yes, we can go right to number four.

25 Q What was your point with bullet point number four?

		2011.0			
		1885			188
1	MR. ROBERTSON: All right.		1	anyone.	
2	THE COURT: Just remember, the witness is		2	A The catalog has to be published by a vendor. If	
3	here. And I know zealous advocacy animates us all to		3	the information is merely selected by a customer, it's	
4	get enthusiastic about our causes, but remember the		4	not published by a vendor.	
5	concept of civility and politeness governs all court		5	Q So you have your own construction of what	
6	proceedings. And I'm not suggesting you weren't civil		6	"published by a vendor" means?	
7	and polite, but don't let it get out of hand.		7	A No.	
8	MR. ROBERTSON: Yes, sir.		8	MR. McDONALD: Objection, Your Honor.	
9	BY MR. McDONALD:		9	THE COURT: Overruled.	
10	Q The next bullet point that you have here is when		10	Q Are you aware of the Court's construction?	
11	Lawson software is installed, the item master is		11	A Yes.	
12	empty. Do you see that?		12	Q The Court says "published by a vendor" simply	
13	A Well, in a second.		13	means that at some point in time a vendor, such as a	
14	THE COURT: Wait a minute.		14	supplier, a manufacturer, or a distributor has made	
15	Q I apologize. Do we have the slides. Why don't we		15	generally known or has disclosed an organized	
16	do that?		16	collection of items and associated information	
17	THE COURT: What system are we working with?		17	preferably but not necessarily including all these	
18	Your system? So Mr. Neal can activate the ePlus side		18	descriptions for the product.	
19	of things.		19	MR. McDONALD: Your Honor, I don't think he	
20	Q The second bullet point says, When the Lawson		20	read the very first sentence of the Court's	
21	software is installed, the item master is empty,		21	construction.	
22	correct?		22	THE COURT: I also don't think I said	
23	A Yes.		23	anything about disclosed. I don't know where you got	
24	Q But you understand from your review of the		24	that.	
25	document that Lawson also provides services,		25	MR. ROBERTSON: I'm looking at what was	
		1886			188
1 i	implementation in which they will either migrate the		1	handed out, Your Honor, I think.	
	data from a legacy system to the new Lawson system or		2	THE COURT: Well, that was what you-all got.	
	they'll assist the customers in loading the item data,		3	That isn't what I read. What I read was published by	
	correct?		4	a vendor as used in the definition of the claim term	
	A Yes, I've testified to that.		5	"catalog/product catalog."	
	Q When the Court was construing "catalog," it was		6	"Published" simply means to make generally	
	referring to this collection of items and associated		7	known. At one time I was thinking about "or to	
	information that is existing in electronic format in		8	disclose," but I didn't say that. "Published by a	
	•		9	•	
	the database, right? You understood that in the		10	vendor" simply means that at some point in time a vendor such as a supplier, a manufacturer or a	
10	context of the patent?				
	A I thought you just told me to take "detabase" out				
11	A I thought you just told me to take "database" out		11	distributor has made generally known or has disclosed	
11 . 12	of the claim.		11 12	distributor has made generally known or has disclosed an organized collection of items or associated	
11 . 12 . 13	of the claim. Q Well, I told you to take the single database out		11 12 13	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a	
11 12 13 14 14 14 15 15 15 15 15 15 15 15 15 15 15 15 15	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where		11 12 13 14	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name,	
11 12 13 14 15 15 15 16 17 17 18 18 18 18 18 18 18 18 18 18 18 18 18	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data,		11 12 13 14 15	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and	
11 12 13 14 15 16	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item		11 12 13 14 15 16	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be	
11 12 13 14 15 16 17 17 1	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right?		11 12 13 14 15 16	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's	
11 12 13 14 15 16 17 18 18	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes.		11 12 13 14 15 16 17	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read.	
11 12 13 14 15 16 17 18 18	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right?		11 12 13 14 15 16	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's	
11	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes.		11 12 13 14 15 16 17	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read.	
11	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes. Q The next bullet point you say is an item master		11 12 13 14 15 16 17 18	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read. MR. ROBERTSON: I thought I was asking him	
11 12 13 14 15 16 17 18 19 20 21	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes. Q The next bullet point you say is an item master data is selected by inclusion by a customer. Do you		11 12 13 14 15 16 17 18 19 20	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read. MR. ROBERTSON: I thought I was asking him whether it just needs to be made generally known or	
11 12 13 14 15 16 17 18 19 20 21 22 1	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes. Q The next bullet point you say is an item master data is selected by inclusion by a customer. Do you see that?		11 12 13 14 15 16 17 18 19 20 21	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read. MR. ROBERTSON: I thought I was asking him whether it just needs to be made generally known or disclosed. I think Your Honor said	
11 12 13 14 15 16 17 18 19 20 11 12 22 23 16	of the claim. Q Well, I told you to take the single database out of the claim, but you understand that that's where this information, this electronic information, data, resides, correct, in the Lawson system? The item master, the database, right? A Yes. Q The next bullet point you say is an item master data is selected by inclusion by a customer. Do you see that? A Yes.		11 12 13 14 15 16 17 18 19 20 21 22	distributor has made generally known or has disclosed an organized collection of items or associated information preferably but not necessarily including a part number, price, catalog number, vendor name, vendor ID, a textual description of the item, and images of or relating to the item. And it should be items and associated information, I think. But that's what I think I read. MR. ROBERTSON: I thought I was asking him whether it just needs to be made generally known or disclosed. I think Your Honor said THE COURT: I didn't say "disclosed." I took	

		2011.0			
		1893			1895
1	catalog that was published by a vendor.		1	published by the phone company even though it has	
2	Q Well, the item master doesn't have to be published		2	phone numbers of some people in it.	
3	by the vendor, does it? It's the collection of		3	Q Where in the Court's construction of "catalog"	
4	information excuse me. It's the organized		4	does it say that you have to have all of the item	
5	collection of items and associated information that's		5	information included?	
6	published by a vendor, correct?		6	A Well, I don't think that it says all. I know it	
7	A But that's what a catalog is. The vendor		7	doesn't say all, and I don't think you have to have	
8	publishes the catalog.		8	all.	
9	Q The vendor makes that organized collection of		9	Q Where does it say you have to have most?	
10	items and associated information available to the		10	A There's a matter of degree.	
11	customer, right?		11	Q Where does it say that in here? It just says "a	
12	A Yes, the vendor publishes the catalog. I don't		12	collection of items and associated information."	
13	think there's any doubt about that.		13	A Published by a vendor. The question is: What's	
14	Q Okay. So that's all that's required of the claim		14	published by a vendor?	
15	that the vendor publish the catalog?		15	Q And you interpret that as meaning you have to have	
16	THE COURT: Is that a question?		16	how much?	
17	Q Isn't that correct?		17	A I don't know. There's some point at which it's no	
18	MR. McDONALD: Object to the form.		18	longer published by a vendor in the same sense that my	
19	THE COURT: Overruled.		19	address book is not published by the phone company.	
20	A No. If there's to be a catalog in the Lawson		20	Q If I have 50 percent of it, is that enough?	
21	system, the catalog had to have been published by the		21	A I don't know.	
22	vendor.		22	Q 75 percent?	
23	Q Fine. So point to the language then in the		23	A I don't know.	
24	Court's construction of "catalog" that you rely on to		24	Q You know that the system, the Lawson system, is	
25	say that this organized collection of items and		25	capable of incorporating all of the item data from an	
		1894			1896
1	associated information has to be selected by the		1	electronically produced catalog from a vendor, right?	
2	customer, not somebody else.		2	A It may or may not be. That may be true for some	
3	A It's not that it has to be selected by the		3	catalogs.	
4	customer. It is selected by the customer, therefore,		4	Q Did you make any investigation into that?	
	it's not an organized collection published by a		5	A Well, I know what the structure of item master is.	
5 6			6	And item master has fields, some of which are in	
7	vendor. I'm explaining why it doesn't meet the				
	Court's construction, not why it does.		7	vendor catalogs and some of which are not in some	
8	Q So what language are you relying on?		8	vendor catalogs. And if there's a field in a vendor	
9	A Published by a vendor.		9	catalog for which there's no place in item master, it	
10	Q That's the only language you're relying on about		10	cannot be imported into item master.	
11	this organized collection of items and associated		11	Q Does it have to import all the fields?	
12	information is that it's got to be published by a		12	A No.	
12 13	vendor?		13	Q The Court's claim construction made clear that	
12 13 14	vendor? A You just took me through that. We went through		13 14	Q The Court's claim construction made clear that some of the data about the item is just preferably but	
12 13 14 15	vendor? A You just took me through that. We went through everything else in the Court's construction and found		13 14 15	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right?	
12 13 14 15 16	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor."		13 14 15 16	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct.	
12 13 14 15 16 17	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position		13 14 15 16 17	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things	
12 13 14 15 16 17	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a		13 14 15 16 17	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right?	
12 13 14 15 16 17 18	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a different issue, but I think his position is clear.		13 14 15 16 17	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right? A I never assumed it did have to include those.	
12 13 14 15 16 17	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a		13 14 15 16 17	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right?	
12 13 14 15 16 17 18	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a different issue, but I think his position is clear.		13 14 15 16 17 18	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right? A I never assumed it did have to include those.	
12 13 14 15 16 17 18 19 20	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a different issue, but I think his position is clear. MR. ROBERTSON: I understand, Your Honor.		13 14 15 16 17 18 19	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right? A I never assumed it did have to include those. Q But you have seen in the item master this kind of	
12 13 14 15 16 17 18 19 20 21	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a different issue, but I think his position is clear. MR. ROBERTSON: I understand, Your Honor. I'll move on.		13 14 15 16 17 18 19 20 21	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right? A I never assumed it did have to include those. Q But you have seen in the item master this kind of data, haven't you? Part number, price, catalog	
12 13 14 15 16 17 18 19 20 21 22	vendor? A You just took me through that. We went through everything else in the Court's construction and found it was satisfied except "published by a vendor." THE COURT: I think he's made his position clear. Whether you agree with it or not is a different issue, but I think his position is clear. MR. ROBERTSON: I understand, Your Honor. I'll move on. THE COURT: Let's move on.		13 14 15 16 17 18 19 20 21 22	Q The Court's claim construction made clear that some of the data about the item is just preferably but not necessarily; isn't that right? A Correct. Q So it doesn't even have to include all the things that the Court identifies in its construction, right? A I never assumed it did have to include those. Q But you have seen in the item master this kind of data, haven't you? Part number, price, catalog number, vendor name, vendor ID, textual description of	

1 Dell was inserted.

2 Q That's where you're doing the keyword search. I'm

3 talking about the user fields that are in the system.

4 You can actually enter into a user field a vendor

5 name, can't you, sir?

6 A I think you can. I'm not sure whether you can

7 search on that field, but you can enter it.

B Q So you don't know one way or the other whether you

9 can search once you have entered a vendor name in that

10 field?

11 A In a use defined field, I don't know.

12 Q Would it change your opinion if there was evidence

13 in the record that if you did enter the vendor name

14 into one of those user fields, you could search by

15 vendor?

16 A No, because what you're postulating is the user

17 taking the system and making his own additions and

18 changes to it.

19 Q The user of the Lawson system, according to you,

20 populates all the data in the item master; isn't that

21 right?

22 A Yes, I think that's an important point.

23 Q And if the user inserts a vendor name in one of

24 those user defined fields that it can use, then it

25 could search by vendor, couldn't it?

1 A Yes

2 Q So in that scenario by using the term "laptop,"

3 which only appears in the Dell catalog, I only

4 selected the Dell catalog to search; isn't that right?

5 A No, that's false. It looked over the whole

6 database. It just happened because of the

7 circumstances you have set up that there were no

8 responsive hits from the Home Depot catalog.

9 Q So I got all the Dell items that corresponded to

10 that keyword laptop and none of the items in the home

11 Depot catalog, right?

12 A Well, that's the output of the search, yes. But

13 if Home Depot had had a laptop, then you would have

14 retrieved the laptop from the Home Depot catalog.

15 Q Well, if I added a Hewlett-Packard catalog to my

16 catalog database with Home Depot, Dell, and now

17 Hewlett-Packard, and I searched for laptops, I would

18 get hits for Hewlett-Packard and Dell, right?

19 A Yes.

Q So the selection of the catalog was made by using

21 that keyword because I didn't get any Home Depo hits,

22 but I did get Dell and Hewlett-Packard, correct?

23 A That's nonsense. It makes no sense at all. It's

24 a happenstance that one particular vendor doesn't sell

25 a thing. So by asking for pens, for example, the fact

1902

1 A If the proposition is that --

Q Can you answer that question fairly yes or no?

3 THE COURT: Just a minutes. Listen to the

question he asked and answer that question.

5 THE WITNESS: Okay.

6 A Could you repeat it?

7 Q Sure. If the user who's populating the fields

8 with information, price, unit of measure, textual

9 description also uses one of these user created fields

10 and enters a vendor name, you could search by that

11 vendor name; isn't that right?

12 A Yes. You could search by that vendor name, but --

13 Q That's fine. You have answered the question.

14 Now, let me ask you this: If I had two

15 catalogs -- just assume I have two catalogs in the

16 item database, the item master, a Home Depot catalog

17 and a Dell computer catalog, right? And just assume

18 for purposes of my question that Home Depot is not

19 selling computers, all right?

20 A Yes.

21 Q If I type in a keyword "laptop," I'm not going to

22 get any catalog data from Home Depot, am I?

23 A Not if they don't have any laptops.

24 Q I'm going to get laptops from the Dell computer,

25 correct?

1 that you don't get a vendor who doesn't sell pens

2 doesn't mean you have selected particular catalogs to

3 search.

4 There's structure in the software. The software

5 does certain things. In Lawson, it searches the

6 entire item master database. It's fortuitous that a

7 particular vendor doesn't sell a particular thing.

8 That's not a means for selection.

9 Q Why not? It didn't come back from the Home Depot

10 catalog.

11 A Because there was nothing responsive in there. If

12 you search for an item that doesn't exist, you

13 certainly wouldn't be saying that you selected no

14 catalogs.

15 Q No. but if I search for an item that does exist in

16 two catalogs that sell computers and I get results

17 from there, I've selected those two as a subset of the

18 three that are there?

19 A You have not.

20 Q All right. You understand that the item master

21 can hold a hundred thousand items or more, correct?

22 A Yes.

23 Q And tens of thousands of vendors, correct?

24 A Yes.

25 Q And you would agree, wouldn't you, Dr. Shamos,

2011.01.14 Trial Transcript Day 8 1/14/2011 2:58:00 PM independent company. It's not the plaintiff or the O This is Plaintiff's Exhibit 32 1 2 Why don't we move on while we're looking for that. department, right? A It's not the plaintiff or the department. I don't At least this white paper that you relied on know under whose auspices they created this report, identifies those commodity levels, codes, as but it's neither of the parties in the case. substitutable products, correct? Q In any event, you relied on it when you gave your 6 A Oh, it says that. testimony about the capability of the UNSPSC, right? Q Using your examples, if I went down and I got some 7 8 pen refills, couldn't I then look after I've used 9 Q Let's go to the page that ends with 036. And those codes to find the search just by looking at it, 10 under the finding and purchasing, it says, A product 10 find something that I considered to be generally 11 and service coding convention brings many benefits to equivalent that I want to purchase? the purchasing function of the company, did I read 12 A You may or may not be able to do that. 12 that correctly? Q So in some instances I could do it, right? 13 13 15 Q One of the pros is that table in the first box 15 Q You'd agree with me, sir, that this Lawson software is not something that you can buy at the says "enables buyers and employee requisitioners to 16 16 17 find all suppliers of a given catagory," correct? local Best Buy for software and load it onto your 18 A It can. If that functionality is built into the 18 computer, right? system that's using the UNSPSC code, it can, yes. A I don't think so. I'm expecting that it's 19 19 20 Q It does it by using the codes, right? probably above their price point. 21 A Well, if it has the capabilities to do that, 21 Q And it sometimes takes months to implement this Q And the Lawson accused software had the capability 22 software: isn't that right? 22 of using these UNSPSC codes. We just saw the fields. 23 A That sounds right O And it can cost tens of thousands, even hundreds 24 24 Q I want you to look at the page of this white paper of thousands of dollars, right? 25 1914 1916 you relied on that ends with 042. Do you see that at A That sounds right. 1 the bottom? It says UNSPSC is a hierarchal MR. McDONALD: Objection. We don't need to classification having five fields. get into the revenues for things. I think, at this A Levels, it says. point to make whatever point he's trying to make. Q Excuse me. Five levels, I apologize. The levels 5 THE COURT: I'm not sure why that's relevant. allow users to search products more precisely because MR. ROBERTSON: I'll move on. Your Honor. 6 searches will be confined to logical categories and BY MR. ROBERTSON 8 eliminate irrelevant hits. It allows managers to Q So you understand as part of your review of the documents in this case in forming your opinions that 9 perform expenditures analysis on categories that are 10 relevant to the company's situation. Do you see that? 10 Lawson employees can be at a customer's facilities for 11 months to design, install, implement, configuration Q Now, you went through the segment level, the and test the system for the customer, correct? 12 12 13 family level, the class level, and the commodity A I don't think I was aware of the specific amount level, do you see that? of time that they would spend, but I was aware that 15 A Yes 15 they do go to customer sites to assist with

16 Q Under commodity, doesn't this white paper represent that when you get to that level, you have a 17 group of substitutable products or services, correct? 18 19 A Well, I think they say that, but it's clearly not

20 21 Q Well, do you know that they have classifications down to like, say, for specific white-out right down

23 to that level?

A Well, I don't think you can. There are only two 24

digits down at that level.

implementation. Q In reviewing the documents in this case, you saw 17 18 manuals and guides that are provided to the customers 19 to an assist them in how to operate the software? 20

really isn't an issue in dispute here.

MR. McDONALD: Your Honor, I think this is

outside the scope of his testimony and his report. It

18	Court indicated that the structure, corresponding		18	items. Now, it's your position that you can't search	
19	structure, is what's described, and at the end he		19	for matching items among the selected product catalogs	
20	indicates "and their equivalents," do you see that?		20	because, first, you say there are no catalogs in the	
21	A Yes.		21	item master, right?	
22	Q You weren't asked by Mr. McDonald about the		22	A That's one reason.	
23	equivalents, were you?		23	Q Let's assume there are catalogs there.	
				-	
24 25	A No. Q If you'll go to page 3, the means for generating		24 25	A Yes. Q Let's assume that the vendor identified the vendor	
,	and a list. 1470 astest. Claim One	1930		and the second of the second o	193
1	an order list. '172 patent, Claim One.		1	name in one of those user defined fields. I could	
2	Now, for this means claim, the Court identified		2	then select that catalog, I think you've indicated, by	
3	the corresponding structure as being a user interface		3	using the vendor name, and then I could search in it,	
4	operating on a computer through which a user may		4	couldn't I?	
5	select from results of a search program or a search		5	A I did not indicate that, and you can't.	
6	program that generates an order list of matching		6	Q Doesn't the Court indicate that the corresponding	
7	items; is that right?		7	structure here is a search program and modules	
8	A That was almost right. I think you read one word		8	operating on a computer system with access to data in	
9	wrong.		9	a database or other file system, correct?	
10	Q Let me start over then. The Court identified the		10	A Yes, but you were talking about selected product	
11	corresponding structures that are disclosed as a user		11	catalogs.	
12	interface operating on a computer through which a user		12	Q I said assume that we have a vendor name and a	
13	may select from results a search program or a search		13	vendor field and we have selected that vendor name and	
14	program that generates an order list of matching		14	got results.	
15	items?		15	A That's not selecting a vendor catalog. That's	
16	A You omitted a word that time. I don't think it		16	selecting a particular field in a database.	
17	really matters.		17	Q Don't I get results from that is the catalog that	
18	Q Tell me which word I omitted.		18	has that vendor name?	
19	A "From." Select from results from a search		19	A Well	
20	program. The second "from" was omitted.		20	Q Can you answer that fairly yes or no? If I just	
21	THE COURT: It probably was a typographical		21	search using that vendor field that I've populated	
22	error, isn't it? I don't know.		22	with the vendor names, and I just want Dell, and I put	
23	Q Well, in any event, the reason you say this can't		23	Dell computer in that vendor name, I'll get Dell	
20	a, in any event, the reason you say this can't		1 23	20. 00pator in that vondor harrie, til get Dell	
24	he satisfied is hecause you say catalogs aron't		24	results won't 12	
24 25	be satisfied is because you say catalogs aren't present in the accused system, right?		24 25	results, won't I? A Yes, you search the entire catalog to get Dell	

ENG - REDIRECT 2045 and get these binders that you sent up here at the 2 very beginning, not now, because you-all are both adopting a new mode, and I need the space to put in the exhibits that you are using. 5 I'd like to say that I'd like to commend, and it's obvious to me there's been some hard work put in 6 by the legal assistants in this case. There have been very few problems, and when there have been problems, 8 9 they have been solved immediately. And you can't do that unless you know what you're doing. 10 11 And the IT people, I think you-all have done a fine job, too. Of course, the lawyers. I don't 12 13 mean to take anything away from you, but I remember 14 well who does most of the work. 15 MR. McDONALD: Your Honor, just one more 16 thing with respect to that last video that Ms. Huey 17 would like to offer. 18 MS. HUGHEY: I'd like to offer it as 19 Defendant's Exhibit 401. 20 THE COURT: What is it? MS. HUGHEY: This is the transcript of what 21 was read in. My understanding is that Ms. O'Loughlin's deposition transcript was read in, I believe, and it will be marked as an exhibit for the 25 record.

```
ENG - REDIRECT
          THE COURT: Any objections? It's admitted.
           THE CLERK: What number is that?
           THE COURT: 401. Defendant's 401.
           (Defendant's Exhibit 401 is admitted into
5
     evidence.)
           THE COURT: All right. Anything else anybody
6
     has so we can get ready to go on Tuesday morning?
7
8
          MR. McDONALD: Nothing else, Your Honor, for
9
     the defense
           THE COURT: All right.
10
           MR. ROBERTSON: Sorry, Your Honor. I didn't
11
12
13
          THE COURT: I just want to know if there's
     anything else so that we can solve it and get going
     and actively out of the box at nine o'clock Tuesday
15
16
           MR. ROBERTSON: Nothing by the plaintiff.
17
18
           THE COURT: Okay. That sounds good. All
19
     right.
20
21
           (The proceedings were adjourned at 5:20 p.m.)

met, there is no infringement that, and 10,000 vendors and you don't have a catalog of what's 1 2 To answer your question, I do agree with ePlus's in there just because it came from multiple sources. That's 3 position that capability allows for infringement. The second what you are saying. You're saying you can't -- you don't have a catalog because it came from 10.000 different vendors or a question with respect to the specific issue of catalogs is that 5 here, there is no catalog. Like I said, both parties agree 6 that at some point data that's been drawn from a catalog, a 6 MS. HUGHEY: No, that's not why it's not a catalog. vendor catalog and changed is not a catalog. It's not a catalog because it doesn't meet the Court's 7 THE COURT: But you don't even agree if I put my definition of catalog. The Court's definition of catalog 9 whole catalog in, that I've got a catalog in the item master requires an organized collection of items and associated information published by a vendor. 10 10 11 MS. HUGHEY: I would agree that that would be an 11 At no point was any of the information pulled from a infringement if that happened, but it does not, nor is it 12 catalog and then transformed, as we've gone through in great 12 detail, and then put into the item master, also known as a capable of happening. That's my point. 13 13 14 THE COURT: Why isn't it capable of happening? In 14 fact, every witness that testified said it is, including Mr. 15 THE COURT: In fact, that's exactly what Mr. 15 Christopherson. What he said was, in words of one syllable, 16 Christopherson said did happen under the ETL process that he 16 17 sure, that can done, but that isn't the way it's usually used. testified to in connection with this exhibit, and the T in that 18 That's what he said. 18 is transformation. That is exactly what he did. MS. HUGHEY: The transformation is the whole point of 19 MS. HUGHEY: The evidence that was coming in was that 19 20 the item master -- all the evidence that came in about the item 20 change. There is a -- everyone agrees that the Sears catalog 21 master is that it is uniquely organized and created by a 21 or the Montgomery Ward catalog is a catalog. It comes from customer, it does not look like a published catalog, it's a 22 that point, it is -- it is changed and then put in the item 22 23 private collection of personal items, has special price 23 master like a grocery list. That is the T. That is what we're 24 information. These are not -- this is a not a catalog, a 24 talking about. It's not the same. vendor catalog like the Sears catalog. This is a grocery list. 25 THE COURT: I don't understand why it isn't. 25 2830 2832 1 THE COURT: That isn't the question. Your witness MS. HUGHEY: It's not the same because it doesn't testified that the -- that I could put one or more entire meet the Court's definition of catalog. The Court's definition of catalog is an organized collection of items and associated 3 catalogs into the item master if I wanted to depending on the 3 capacity of the item master I bought, and your position is that information published by a vendor. even if I do that, the item master parts list, vendor item list 5 THE COURT: What is wrong with that? You can't just cite the whole thing. You now need to tell me what part of the isn't a catalog, and I don't understand that at all. 6 6 MS. HUGHEY: Your Honor, the evidence that came into definition it doesn't fit 8 this case is that the item master is like a grocery list, and MS. HUGHEY: Yes. Specifically the published by a 9 so, yes, people were saying in theory -- in context, they were 9 vendor. It requires the items --10 talking about what kind of information could be drawn in, but 10 THE COURT: Why isn't it published by a vendor? in reality, all the evidence came in that that item master is a 11 MS. HUGHEY: The items in the item master have never 11 12 grocery list. It is not a catalog. 12 been published by a vendor. 13 THE COURT: What about something -- you make it sound 13 THE COURT: Of course they have. Where did they come like a grocery list that my wife goes to the store or sends me from in the first place? 15 to the store with a list of 20 items. There are hundreds of 15 MS_HUGHEY: There was a published vendor catalog 16 thousands of items in most of these item masters, and they 16 THE COURT: And that was published by the vendor. came -- all that information came from vendors, and it was --17 MS. HUGHEY: That was 17 THE COURT: Then I go to the catalog. I look at it. 18 and the information -- your user transformed some of it, edited 18 19 some of it and moved some of it, gave some information that's 19 and then I have Remmington shotgun model 12 in there. Well, my not in the catalog such as price because they worked out a 20 system won't take a Remmington shotgun model 12, so what I do 20 is I take that vendor information, and I transform it to RSG 21 special price deal, but what's in the catalog that is created 21 22 by the item master is the price, or what's in the item master, and 12 so it will fit the number of characters 23 whatever you want to call it, is the price, for example. 23 All I've done is transformed the exact data, loaded

Now, I don't understand how you can have something

that's a hundred thousand items, or in many instances more than

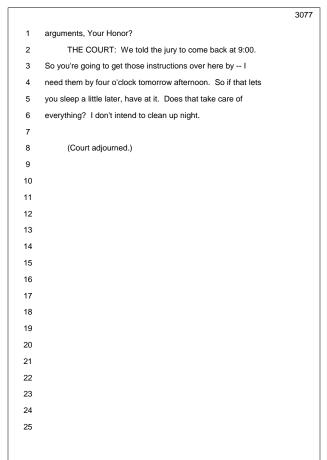

24

24

that into my system, and I have my own little catalog there.

If I want a AK-47 and a Berretta and a long gun, and I take

1 got back information that it was temporarily out of stock nunchout architecture to show you Lawson keeps a hear hug 2 please check back soon. Clearly, using the Lawson system, around this entire process, if we can go to the punchout using that punchout capability, there was the capability of architecture slide determining whether a selected matching item was available in This was one of the Lawson documents. It's the 5 procurement punchout guide, I believe, Plaintiff's Exhibit 6 That functionality is also available with the systems Number 211. Dr. Weaver testified as to the eight steps that that use the EDI or electronic data interchange capability. are necessary in order to do the punchout process. These eight 7 8 Dr. Weaver showed you, if we're using the electronic data steps are set up by Lawson in order to provide this 9 interchange module, the purchase order goes to a vendor, and functionality through a user of the punchout system. 10 the vendor can reply and the purchase order responds as to 10 I'm not going to go through all eight, but that 11 whether that item is available in inventory, for example, exhibit is back in evidence, and it demonstrates clearly that whether or not the item was backordered. During his 12 Lawson is the one that has created, designed, and instituted 12 demonstration, he showed you a situation in which that this entire process to provide that architecture to the user of 13 13 14 happened, and you'll be able to look at that when you're in the system in order to perform the search, the selection, and your deliberations. 15 retrieval of the information necessary to then fill out a 15 16 Let's talk a little bit about this punchout 16 requisition and build the purchase orders 17 capability. As you know, there's a punchout application that 17 Indeed, I thought it was very interesting. The term 18 Lawson includes that is accused of infringement in one of the 18 that Mr. Lohkamp used is that they have to create the handshake five configurations. Dr. Weaver's demonstration of the 19 with their punchout trading partners in order to do that. Each 19 20 punchout capability showed how a punchout user can determine 20 of these steps is controlled by Lawson, and Lawson controls the 21 whether an item is available in inventory, and it showed how 21 authorization process, and Lawson establishes the connection, 22 Lawson creates, communicates, and controls the punchout trading 22 and Lawson retrieves the information in order to complete the 23 partner websites that an S3 user punches out to 23 entire purchase process 24 24 You don't punch out to Dell.com, for example, when It was Mr. Lohkamp who also confirmed that Lawson 25 you are doing that. You punch out to a specially created Dell 25 provides the assistance to its customers including manuals, 3123 3125 punchout website that Lawson has worked with Dell in order to training services, and implementation services all to help them 1 set up the communication protocols in order to do that. configure the procurement punchout with its partners. Indeed, 3 For example, we can look at the next slide. Here the user of the Lawson system tells Lawson what punchout you'll see, and the testimony was that Lawson, when you use trading partners they want available to their system, and then this punchout capability, you are always within the Lawson Lawson will indeed to do that, and then they charge for that system and that this is not, notwithstanding we are looking at 6 products that are available from the Dell catalog, this is a May I have the next slide, 43. Indeed, I asked 8 special Dell website for this, and Dr. Weaver pointed out that Mr. Christopherson, when the Lawson system punches out to the you can tell that from what's called the URL address. 9 punchout creating the partner's catalog, you remain connected 10 You are at the Lawson server.corpnet.lawson.com when 10 to the Lawson system; correct? Correct. you are there looking at these Dell products. Lawson 11 I'd like to talk to you a little bit now about what's 11 established that, Lawson created that, Lawson designed it, and 12 call indirect infringement, some of these issues about inducing 12 13 Lawson set up all of the necessary architectures and 13 and contributory infringement. Indirect infringement, like communication protocols in order to do that direct infringement, is still infringement, and ePlus, we 15 You even heard from Mr. Lohkamp, the product 15 believe, has shown through the testimony, again, of Lawson's 16 strategist, about how Lawson enters into agreements with its own witnesses and its own documents that Lawson infringes the punchout trading partners to develop that connection. He also 17 claims of the patent both directly and indirectly. 17 The Court will instruct you that Lawson may directly 18 explained how the punchout partners pay Lawson to configure and 18 19 test and set up the connection. He said those contracts were 19 infringe the patents even if they believe in good faith what 20 mutually beneficial. 20 they are doing is not infringement of any of the patents. The

If I can just talk to you a little bit about the

Lawson and to the trading partners, he said, yes.

Now, he also said he had a number of relationships

with punchout trading partners that were not contractual, but

when I asked him, were they mutually beneficial as well to both

patents

Court will also explain to you the law concerning indirect

infringement. In a nutshell, ePlus asserts that Lawson has

both induced and contributed to the infringement of ePlus's

So what does that mean? Well, to show induced

3298 3300 (Jury in.) least two attorneys here at all times so I can be reached by 2 phone. I'm just right down here at the Hilton Garden Inn, so I 3 THE COURT: The jury has decided that it would like to return home for the evening and then return in the morning THE COURT: Do you have to trade shoes or can you --5 and deliberate. What is your pleasure on the time to 5 MR. ROBERTSON: I come equipped. I will be right 6 deliberate? Do you want to start at 9:00, start at 9:30? 6 over here pronto, but we'll have somebody here at all times Nine o'clock we'll be here and have stuff ready for THE COURT: That's fine. you, and you be ready and you can have -- you can take whatever MR. ROBERTSON: All right. Thank you. 8 8 9 time you feel like you need to deliberate. If you leave your 9 THE COURT: Now, is he coming back? Mr. McDonald or notebooks the way you usually do, Mr. Neal will take came of 10 10 Ms. Stoll-DeBell? 11 them. Thank you. Drive carefully. 11 MR. CARR: As far as I know, he's not coming back. 12 THE COURT: Well, then, I know not to schedule any 12 13 (Jury out.) 13 arguments, I guess, until I'm certain. All right. I guess 14 14 that solves it for now. Thank you very much. We'll be in 15 THE COURT: Have all these transcripts and these 15 adjournment. 16 things -- you've got everything you need; right? 16 MR. STRAPP: Yes. 17 17 (Court adjourned.) 18 MR. CARR: I believe so 18 THE COURT: One thing I need for you all to do is to 19 19 20 see if there's anything that needs to be cleaned up that I need 20 to decide. For example, they've got these motions that have 21 21 been filed yesterday -- this morning or yesterday. I don't 22 22 23 know what -- by Lawson. 23 24 I need a briefing schedule on them and see what I'm 24 supposed to do, and that means you all need to get moving and 25 25

- decide how you want to proceed, little things like that so we can get that sorted out. I'd like to get all this done just as
- 3 soon as I can.

- 4 MR. ROBERTSON: I'll call Mr. McDonald tomorrow once
- 5 he gets back to Minnesota. I understand he's gone back.
- 6 THE COURT: He's what?
- 7 MR. ROBERTSON: I'll call Mr. McDonald tomorrow in
- 8 Minnesota. I know he's traveling --
- 9 THE COURT: He's in Minnesota?
- 10 MR. CARR: He is leaving this evening, yes.
- 11 THE COURT: Are you fully empowered?
 - MR. CARR: Yes, sir.
- 13 MR. ROBERTSON: I'll just --
 - THE COURT: Does he understand that the juries have a
- 15 lot of questions sometimes?
- 16 MR. CARR: He does.
- 17 THE COURT: Okay.
- 18 MR. ROBERTSON: I'll work out a briefing schedule,
- 19 Your Honor, and we'll take care of it in short order. Maybe we
- $\,$ 20 $\,$ $\,$ can decide some of things have been mooted by some of Your
- 21 Honor's rulings.
- 22 THE COURT: They very well may have. I don't know
- $23\,$ $\,$ the answer to that. Some of them may not, but I want to make
- 24 sure we get it done.
- MR. ROBERTSON: Your Honor, I intend on having at
